(57) **CLAIM**

The ornamental design for a display housing for remote inspection device, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of an exemplary remote inspection device which embodies a display housing in accordance with the present design;

FIG. 2 is a perspective view of a first embodiment of the display housing;

FIG. 3 is a rear view of the first embodiment of the display housing;

FIG. 4 is a side view of the first embodiment of the display housing, the other side view being a mirror image thereof;

FIG. 5 is a front view of the first embodiment of the display housing;

FIG. 6 is a top view of the first embodiment of the display housing;

FIG. 7 is a bottom view of the first embodiment of the display housing;

FIG. 8 is a perspective view of the second embodiment of the display housing;

FIG. 9 is a rear view of the second embodiment of the display housing;

FIG. 10 is a side view of the second embodiment of the display housing, the other side view being a mirror image thereof;

FIG. 11 is a front view of the second embodiment of the display housing;

FIG. 12 is a top view of the second embodiment of the display housing;

FIG. 13 is a bottom view of the second embodiment of the display housing;

FIG. 14 is a perspective view of the third embodiment of the display housing;

FIG. 15 is a rear view of the third embodiment of the display housing;

FIG. 16 is a side view of the third embodiment of the display housing, the other side view being a mirror image thereof;

FIG. 17 is a front view of the third embodiment of the display housing;

FIG. 18 is a top view of the third embodiment of the display housing; and,

FIG. 19 is a bottom view of the third embodiment of the display housing.

It is to be understood that those portions of the display housing shown in broken line in the accompanying figures do not constitute an integral part of the claimed design and, therefore, are disclaimed as part of the claimed design.
