(57) **CLAIM**

The ornamental design for an object carrier with exchangeable flexible support arm, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an object carrier with exchangeable flexible support arm;

FIG. 2 is a front view of the object carrier with exchangeable flexible support arm shown in FIG. 1;

FIG. 3 is a left side view of the object carrier with exchangeable flexible support arm shown in FIG. 1; a right side view is mirror-reversed,

FIG. 4 is a rear view of the object carrier with exchangeable flexible support arm shown in FIG. 1,

FIG. 5 is a top view of the object carrier with exchangeable flexible support arm shown in FIG. 1; and,

FIG. 6 is a perspective bottom view of the object carrier with exchangeable flexible support arm shown in FIG. 1.

The object carrier with exchangeable flexible support arm is used for mounting supports for apparatus or instruments such as mobile telephones, hand-held computers, PDAs, navigation devices by way of a suction cup on smooth surfaces such as windshields in positions convenient for the user.
