(57) **CLAIM**

The ornamental design for a signal and power bypass switch assembly, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view looking toward the bottom of a signal and power bypass switch assembly showing my new design with a centrally located plunger in a first position and opposing end caps in a first position for my new design;

FIG. 2 is a top plan view thereof;

FIG. 3 is a bottom plan view thereof;

FIG. 4 is a left side elevational view thereof;

FIG. 5 is a rights side elevational view thereof;

FIG. 6 is a front elevational view thereof;

FIG. 7 is a back elevational view thereof;

FIG. 8 is a perspective view looking from the bottom of the signal and power bypass switch assembly showing the new design with the centrally located plunger in a second position and opposing end caps in a first position;

FIG. 9 is a top plan view thereof with the plunger in its second position;

FIG. 10 is a bottom plan view thereof with the plunger in its second position;

FIG. 11 is a left side elevational view thereof with the plunger being in its second position, the right side elevational view being a mirror image thereto;

FIG. 12 is a front elevational view thereof with the plunger in its second position;

FIG. 13 is a back elevational view thereof with the plunger in its second position;

FIG. 14 is a perspective view looking toward the bottom of a signal and power bypass switch assembly showing my new design with a centrally located plunger in a first position and opposing end caps in a second position for my new design;

FIG. 15 is a top plan view relative to FIG. 14;

FIG. 16 is a bottom plan view relative to FIG. 14;

FIG. 17 is a left side elevational view relative to FIG. 14;

FIG. 18 is a rights side elevational view relative to FIG. 14;

FIG. 19 is a front elevational view relative to FIG. 14;

FIG. 20 is a back elevational view relative to FIG. 14;

FIG. 21 is a perspective view looking from the bottom of the signal and power bypass switch assembly showing the new design with the centrally located plunger in a second position and opposing end caps in a second position;

FIG. 22 is a top plan view relative to FIG. 21;

FIG. 23 is a bottom plan view relative to FIG. 21;

FIG. 24 is a left side elevational view relative to FIG. 21, the right side elevational view being a mirror image thereto;

FIG. 25 is a front elevational view relative to FIG. 21; and,

FIG. 26 is a back elevational view relative to FIG. 21.
