(57) **CLAIM**

We claim the ornamental design for a video screen with interface using hand image, as shown and described.

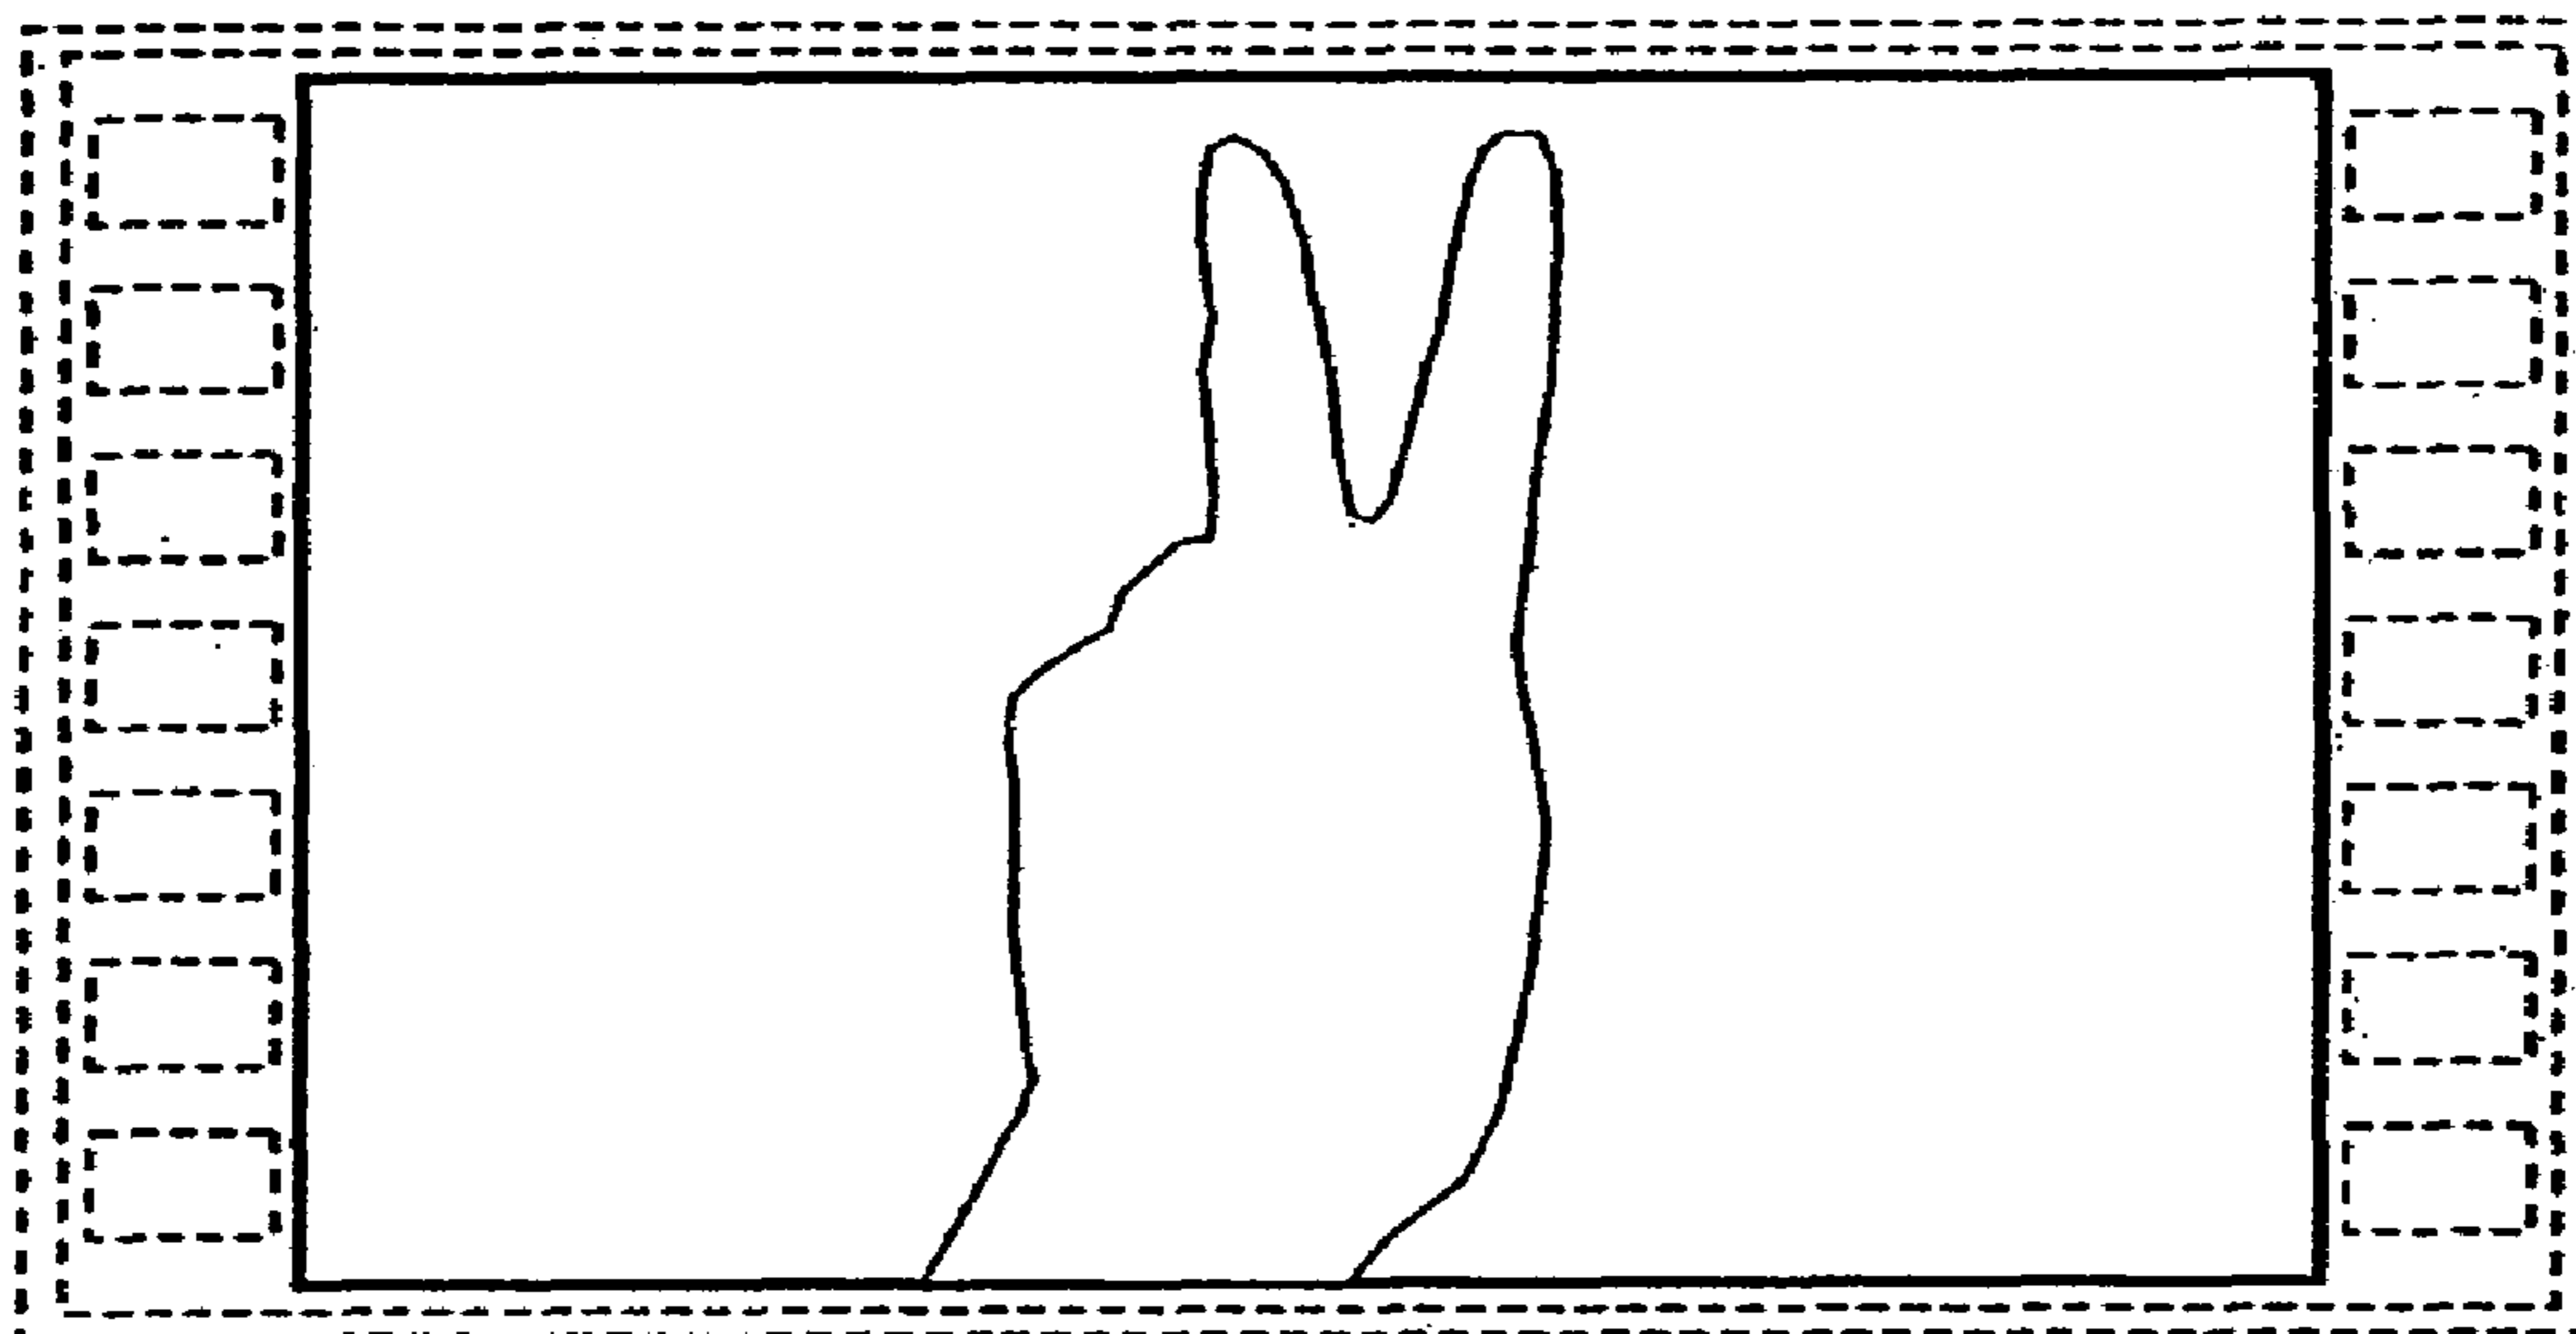

DESCRIPTION

FIGURE is a front view of a video screen with user interface using hand image of the present invention.

The broken line showing of a video screen is included for the purpose of illustrating environmental structure and forms no part of the claimed design.

The FIGURE shows an image of a hand shown on a video screen which a user places under a video camera. The user operates the hand image on the video screen by moving his hand under the video camera.
