(57) **CLAIM**

The ornamental design for a computer-generated icon and portion of an engine instrument display, as shown and described.

DESCRIPTION

A portion of the disclosure of this patent document contains material that is subject to copyright protection. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, but otherwise reserves all copyright rights whatsoever.

The claimed “Computer-Generated Icon and Portion of an Engine Instrument Display” is used as a visual instrument interface for monitoring engine performance, for example, in an aircraft.

Cross-reference is made to related design patent applications both titled “Computer-Generated Icon and Portion of an Engine Instrument Display,” which are filed concurrently herewith, assigned application Ser. Nos. 29/263,353 and 29/263,355.

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of an element for a computer-generated icon of the engine instrument display showing the design;

FIG. 2 is a front view of a second embodiment thereof;

FIG. 3 is a front view of a third embodiment thereof;

FIG. 4 is a front view of a fourth embodiment thereof; and,

FIG. 5 is a front view of a fifth embodiment thereof.

The broken-lines of the figure(s) depict an instrument panel display border as well as related elements of the instrument display. These broken line features are depicted for illustrative purposes, and form no part of the claimed design.
