#### CLAIM (57)

The ornamental design for a set of chess pieces, as shown and described.

### DESCRIPTION

FIG. 1 is a perspective view of a chess set, showing my new design, the broken lines showing the game board are for illustrative purposes only, and form no part of the claimed design; and

FIG. 2 is a top or bottom end view of the pawn chess piece according to a first embodiment of the present invention;

FIG. 3 is a right or left side view of the pawn chess piece according to a first embodiment of the present invention;

FIG. 4 is a front or back view of the pawn chess piece according to a first embodiment of the present invention;

FIG. 5 is a perspective view of the pawn chess piece according to a first embodiment of the present invention;

FIG. 6 is a top or bottom end view of the queen chess piece according to a first embodiment of the present invention;

FIG. 7 is a right or left side view of the queen chess piece according to a first embodiment of the present invention;

FIG. 8 is a front or back view of the queen chess piece according to a first embodiment of the present invention;

FIG. 9 is a perspective view of the queen chess piece according to a first embodiment of the present invention;

FIG. 10 is a top or bottom end view of the king chess piece according to a first embodiment of the present invention;

FIG. 11 is a right or left side view of the king chess piece according to a first embodiment of the present invention;

FIG. 12 is a front or back view of the king chess piece according to a first embodiment of the present invention;

FIG. 13 is a perspective view of the king chess piece according to a first embodiment of the present invention;

FIG. 14 is a top or bottom end view of the knight chess piece of the present invention;

FIG. 15 is a right or left side view of the knight chess piece according to a first embodiment of the present invention;

FIG. 16 is a front or back view of the knight chess piece according to a first embodiment of the present invention;

FIG. 17 is a perspective view of the knight chess piece according to a first embodiment of the present invention;

FIG. 18 is a top or bottom end view of the rook chess piece according to a first embodiment of the present invention;

FIG. 19 is a right or left side view of the rook chess piece according to a first embodiment of the present invention;

FIG. 20 is a front or back view of the rook chess piece according to a first embodiment of the present invention;

FIG. 21 is a perspective view of the rook chess piece according to a first embodiment of the present invention;

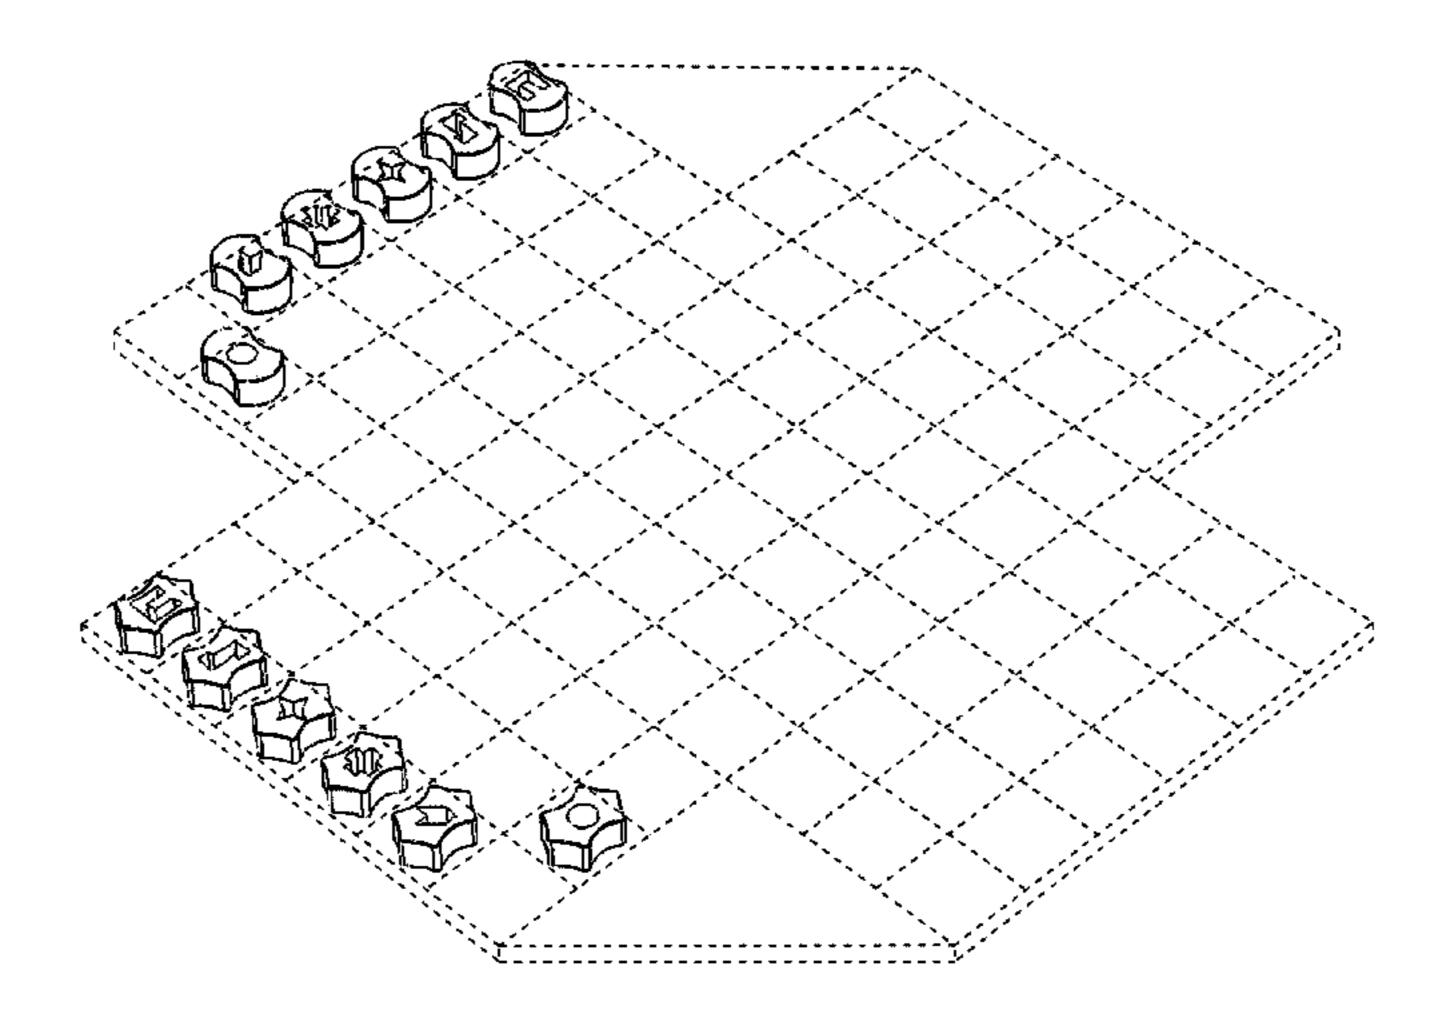

FIG. 22 is a top or bottom end view of the bishop chess piece according to a first embodiment of the present invention; FIG. 23 is a right or left side view of the bishop chess piece according to a first embodiment of the present invention; FIG. 24 is a front or back view of the bishop chess piece according to a first embodiment of the present invention; FIG. 25 is a perspective view of the bishop chess piece according to a first embodiment of the present invention; FIG. 26 is a top or bottom end view of the pawn chess piece according to a second embodiment of the present invention; FIG. 27 is a right or left side view of the pawn chess piece according to a second embodiment of the present invention; FIG. 28 is a front or back view of the pawn chess piece according to a second embodiment of the present invention; FIG. 29 is a perspective view of the pawn chess piece according to a second embodiment of the present invention; FIG. 30 is a top or bottom end view of the queen chess piece according to a second embodiment of the present invention; FIG. 31 is a right or left side view of the queen chess piece according to a second embodiment of the present invention; FIG. 32 is a front or back view of the queen chess piece according to a second embodiment of the present invention; FIG. 33 is a perspective view of the queen chess piece according to a second embodiment of the present invention; FIG. 34 is a top or bottom end view of the king chess piece according to a second embodiment of the present invention; FIG. 35 is a right or left side view of the king chess piece according to a second embodiment of the present invention; FIG. 36 is a front or back view of the king chess piece according to a second embodiment of the present invention;

FIG. 37 is a perspective view of the king chess piece according to a second embodiment of the present invention; FIG. 38 is a top or bottom end view of the knight chess piece according to a second embodiment of the present invention; FIG. 39 is a right or left side view of the knight chess piece according to a second embodiment of the present invention; FIG. 40 is a front or back view of the knight chess piece according to a second embodiment of the present invention; FIG. 41 is a perspective view of the knight chess piece according to a second embodiment of the present invention; FIG. 42 is a top or bottom end view of the rook chess piece according to a second embodiment of the present invention; FIG. 43 is a right or left side view of the rook chess piece according to a second embodiment of the present invention; FIG. 44 is a front or back view of the rook chess piece according to a second embodiment of the present invention; FIG. 45 is a perspective view of the rook chess piece according to a second embodiment of the present invention; FIG. 46 is a top or bottom end view of the bishop chess piece according to a second embodiment of the present invention; FIG. 47 is a right or left side view of the bishop chess piece according to a second embodiment of the present invention; FIG. 48 is a front or back view of the bishop chess piece according to a second embodiment of the present invention; and,

1 Claim, 13 Drawing Sheets

FIG. 49 is a perspective view of the bishop chess piece

according to a second embodiment of the present invention.
