(57) **CLAIM**

The ornamental design of a lighting fixture, as shown and described.

**DESCRIPTION**

FIG. 1 is an underside isometric view of a lighting fixture incorporating our new design, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. 2 is a top side isometric view of the lighting fixture of FIG. 1, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. 3 is a side elevation view thereof;

FIG. 4 is a front end elevation view thereof;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a top plan view thereof;

FIG. 7 is an underside isometric view of another embodiment of a lighting fixture incorporating our new design, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. 8 is a top side isometric view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. 9 is a side elevation view thereof;

FIG. 10 is a front elevation view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. 11 is a bottom plan view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **12** is a top plan view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **13** is an underside isometric view of another embodiment of a lighting fixture incorporating our new design, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **14** is a top side isometric view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **15** is a side elevation view thereof;

FIG. **16** is a front elevation view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **17** is a bottom plan view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **18** is a top plan view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **19** is an underside isometric view of another embodiment of a lighting fixture incorporating our new design, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **20** is a top side isometric view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **21** is a side elevation view thereof;

FIG. **22** is a front elevation view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design;

FIG. **23** is a bottom plan view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design; and,

FIG. **24** is a top plan view thereof, wherein the break lines indicate indeterminate length and the phantom lines form no part of the claimed design.
