(57) **CLAIM**

We claim the ornamental design for a lighting fixture reflector, as shown and described.

DESCRIPTION

FIG. **1** is a perspective view of the lighting fixture reflector according to a first embodiment;

FIG. **2** is a front elevation view thereof.

FIG. **3** is a right side elevation view thereof; the left side being a mirror image thereof;

FIG. **4** is a bottom plan view thereof;

FIG. **5** is a front elevation view of the lighting fixture reflector according to the second embodiment;

FIG. **6** is a right side elevation view thereof; the left side being a mirror image of FIG. **9**;

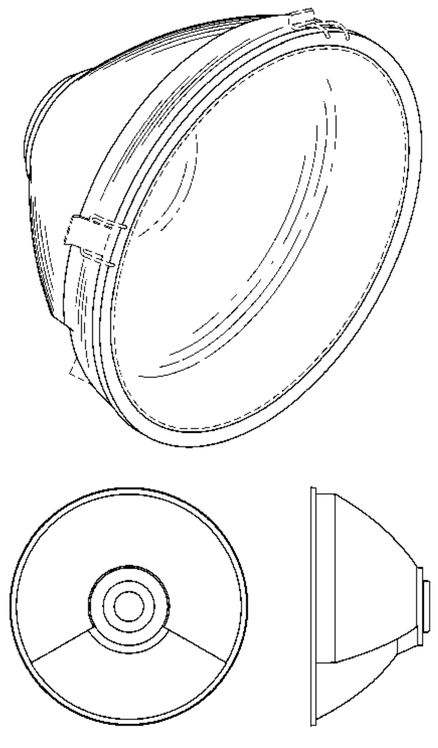

FIG. **7** is a bottom plan view thereof;

FIG. **8** is a front elevation view of the lighting fixture reflector according to a third embodiment;

FIG. **9** is a right side elevation view thereof; the left side being a mirror image of FIG. **6**;

FIG. **10** is a bottom plan view thereof;

FIG. **11** is a front elevation view of the lighting fixture reflector according to a fourth embodiment;

FIG. **12** is a right side elevation view thereof; the left side being a mirror image thereof;

FIG. **13** is a bottom plan view thereof;

FIG. **14** is a front elevation view of the lighting fixture reflector according to a fifth embodiment;

FIG. **15** is a right side elevation view thereof; the left side being a mirror image of FIG. **18**;

FIG. **16** is a bottom plan view thereof;

FIG. **17** is a front elevation view of the lighting fixture reflector according to a sixth embodiment;

FIG. **18** is a right side elevation view thereof; the left side being a mirror image of FIG. **15**;

FIG. **19** is a bottom plan view thereof;

FIG. **20** is a front elevation view of the lighting fixture reflector according to a seventh embodiment;

FIG. **21** is a right side elevation view thereof; the left side being a mirror image thereof;

FIG. **22** is a bottom plan view thereof;

FIG. **23** is a front elevation view of the lighting fixture reflector according to an eighth embodiment.

FIG. **24** is a right side elevation view thereof, the left side being a mirror image of FIG. **26**;

FIG. **25** is a bottom plan view thereof;

FIG. **26** is a front elevation view of the lighting fixture reflector according to a ninth embodiment;

FIG. **27** is a right side elevation view thereof, the left side being a mirror image of FIG. **24**; and,

FIG. **28** is a bottom plan view thereof.

The rear views can be understood from the isometric views of these drawings.

The broken line showing of the lens and the attachment latches is included for the purpose of illustrating only and forms no part of the claimed design.
