(57) **CLAIM**

I claim the ornamental design for a baseball rally cap, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a baseball rally cap;

FIG. 2 is a top plan view thereof;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a left side elevational view thereof;

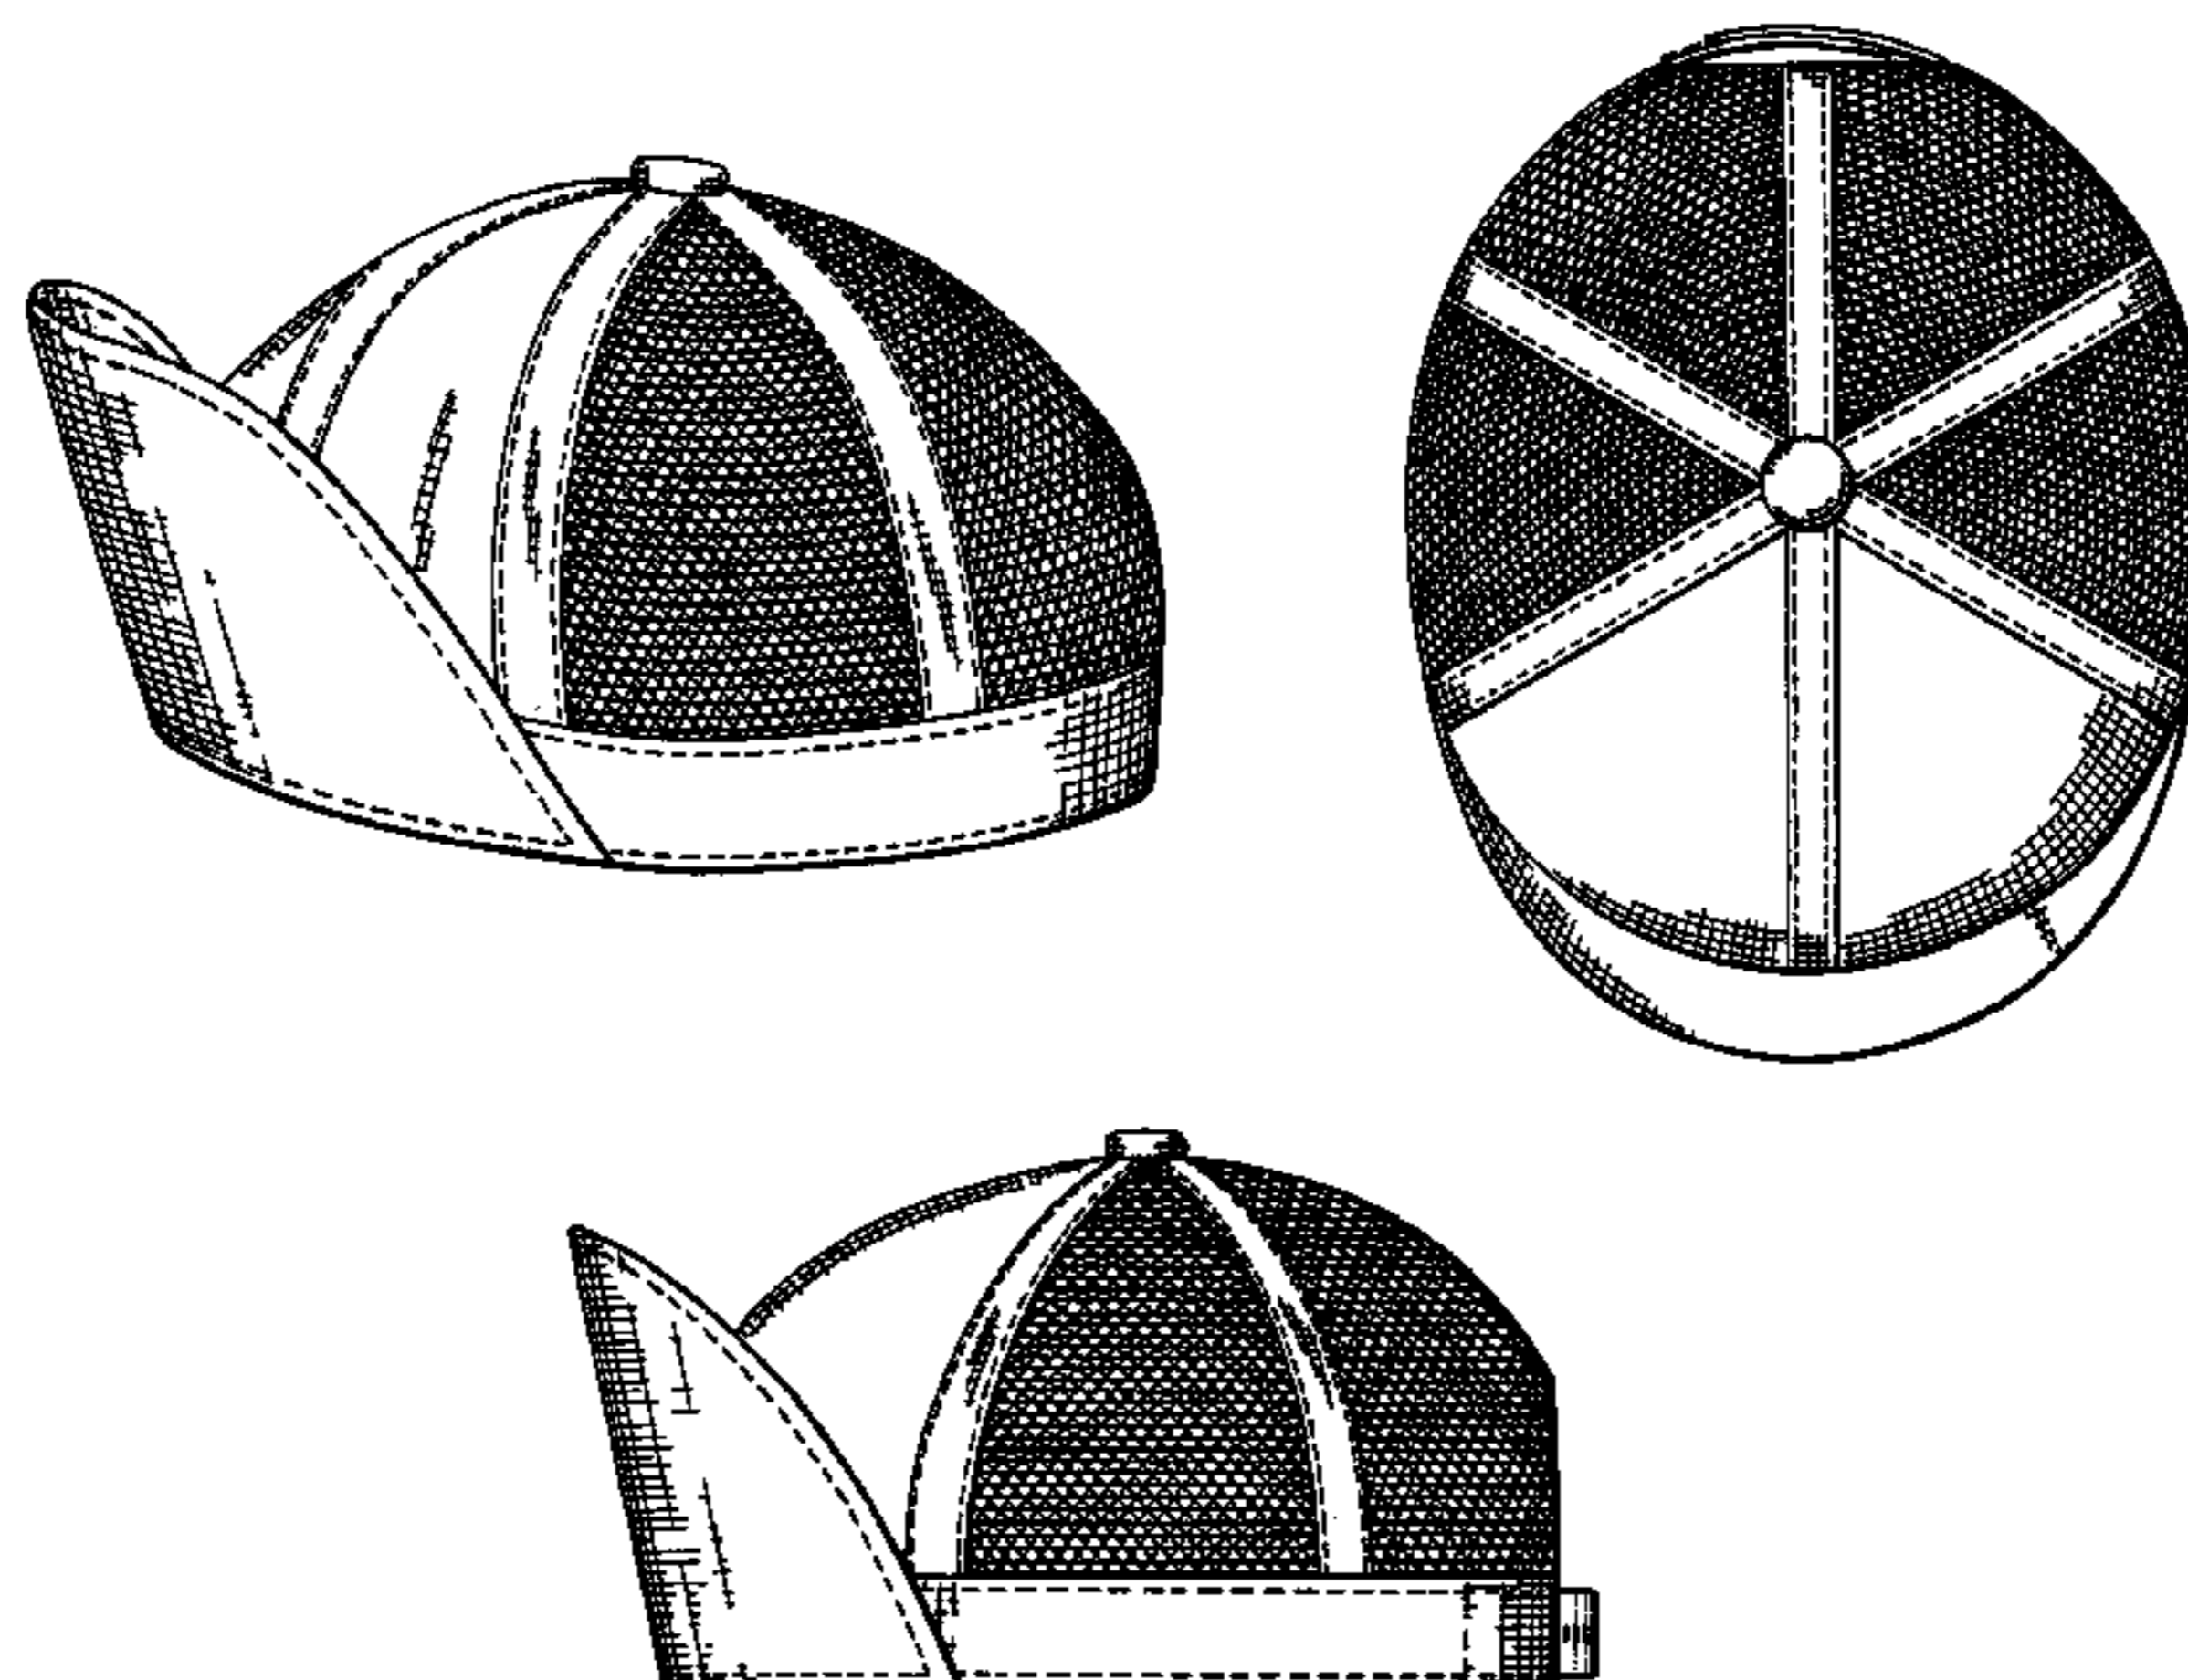

FIG. 5 is a rear elevational view thereof; and,

FIG. 6 is a right side elevational view thereof.

A baseball rally cap is shown having a frontal brim permanently fixed in an upward position.

The broken lines illustrate stitching, and are a part of the claimed design. In addition, the intermittent cross-hatching on the visor, the gore bias seams, the button, the two forward gores, and the band at the base of the crown illustrates fabric, and extends uniformly to the entirety of the surface upon which it is shown. The cross-hatching on the four rearward gores represents mesh.
