**DESCRIPTION**

FIG. 1 is a partial front perspective view of the design for the computer having a door, wherein a central portion of the door has upper and lower perforated portions disposed about an intermediate non-perforated portion, the upper and lower perforated portions each have a series of vertical grooves, and the door is illustrated in a closed or latched position with respect to a chassis of the computer;

FIG. 2 is a front view of the design for the computer having a door as illustrated in FIG. 1;

FIG. 3 is a partial front view of the design for the computer having a door as illustrated in FIG. 1, further illustrating perforations in the upper and lower perforated portions as taken along the dashed line in FIG. 2;

FIG. 4 is a top plan view of the design for the computer having a door as illustrated in FIG. 1, wherein the bottom plan view is the same as the illustrated top plan view; and,

FIG. 5 is a partial front perspective view of the design for the computer having a door as illustrated in FIG. 1, wherein the door is illustrated in an open or unlatched position rotated partially away from the chassis of the computer.

In these drawings, the solid lines illustrate the claimed ornamental design, whereas the broken lines illustrate environmental features that form no part of the claimed ornamental design.
