CLAIM

We claim the ornamental design for an arcuate movable shutter for architectural openings, as shown and described.

DESCRIPTION

FIG. 1 is an isometric of the arcuate movable shutter for architectural openings of the present invention showing movable vanes in a closed 0° position.

FIG. 2 is a front elevation of the arcuate movable shutter for architectural openings of FIG. 1.

FIG. 3 is a top plan view of the arcuate movable shutter for architectural openings of FIG. 1.

FIG. 4 is a right side view of the arcuate movable shutter for architectural openings of FIG. 1.

FIG. 5 is a bottom plan view of the arcuate movable shutter for architectural openings of FIG. 1.

FIG. 6 is an isometric of the arcuate movable shutter for architectural openings of FIG. 1 with the movable vanes in a 45° position.

FIG. 7 is a front elevation of the arcuate movable shutter for architectural openings as seen in FIG. 6.

FIG. 8 is a top plan view of the arcuate movable shutter for architectural openings as seen in FIG. 6.

FIG. 9 is a right side elevation of the arcuate movable shutter for architectural openings as seen in FIG. 6.

FIG. 10 is a bottom plan view of the arcuate movable shutter for architectural openings as seen in FIG. 6.

FIG. 11 is an isometric of the arcuate movable shutter for architectural openings of FIG. 1 with the movable vanes in a 90° or fully open position.

FIG. 12 is a front elevation of the arcuate movable shutter for architectural openings as seen in FIG. 11.

FIG. 13 is a top plan view of the arcuate movable shutter for architectural openings as seen in FIG. 11.

FIG. 14 is a right side elevation of the arcuate movable shutter for architectural openings as seen in FIG. 11.

FIG. 15 is a bottom plan view of the arcuate movable shutter for architectural openings as seen in FIG. 11.

FIG. 16 is an isometric looking at the front of a vane used in the arcuate movable shutter for architectural openings of FIG. 1.

FIG. 17 is an inverted isometric showing the reverse side of the vane of FIG. 16.

FIG. 18 is a front elevation of the vane as seen in FIG. 17.

FIG. 19 is a top plan view of the vane as shown in FIG. 18 with a dashed line representation of adjacent vanes when the vanes are in a closed 0° position as shown in FIG. 1; and,

FIG. 20 is a bottom elevation of the vane of FIG. 18.
