(57) **CLAIM**

The ornamental design for a radiation therapy device, as shown and described.

DESCRIPTION

The radiation therapy device according to the design is provided for inserting a treatment table with a patient placed thereon into an opening at the front face of an annular body of the therapy device to provide treatment. In the radiation therapy device, a rotating portion is provided with a radia-

tion irradiator on the inside of the annular body of the therapy device, the rotating portion is rotated around the patient as viewed from the front to determine the position of the irradiator, and an affected area is irradiated with radiation from the irradiator to provide treatment. Further, in the radiation therapy device, the annular body of the therapy device can be rotated with respect to the base as viewed from the top to adjust the orientation of the body of the therapy device.

FIG. 1 is a front view of a radiation therapy device showing our new design;

FIG. 2 is a rear view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom view thereof;

FIG. 5 is a right side view thereof;

FIG. 6 is a left side view thereof;

FIG. 7 is a front perspective view thereof;

FIG. 8 is sectional view thereof taken along line 8—8 of FIG. 1;

FIG. 9 is a front view thereof with the radiation irradiator member in an alternative position;

FIG. 10 is a top plan view thereof with the body portion of the radiation therapy device in an alternative position;

FIG. 11 is a front view of another embodiment of the radiation therapy device;

FIG. 12 is a rear view thereof;

FIG. 13 is a top plan view thereof;

FIG. 14 is a bottom view thereof;

FIG. 15 is a right side view thereof;

FIG. 16 is a left side view thereof;

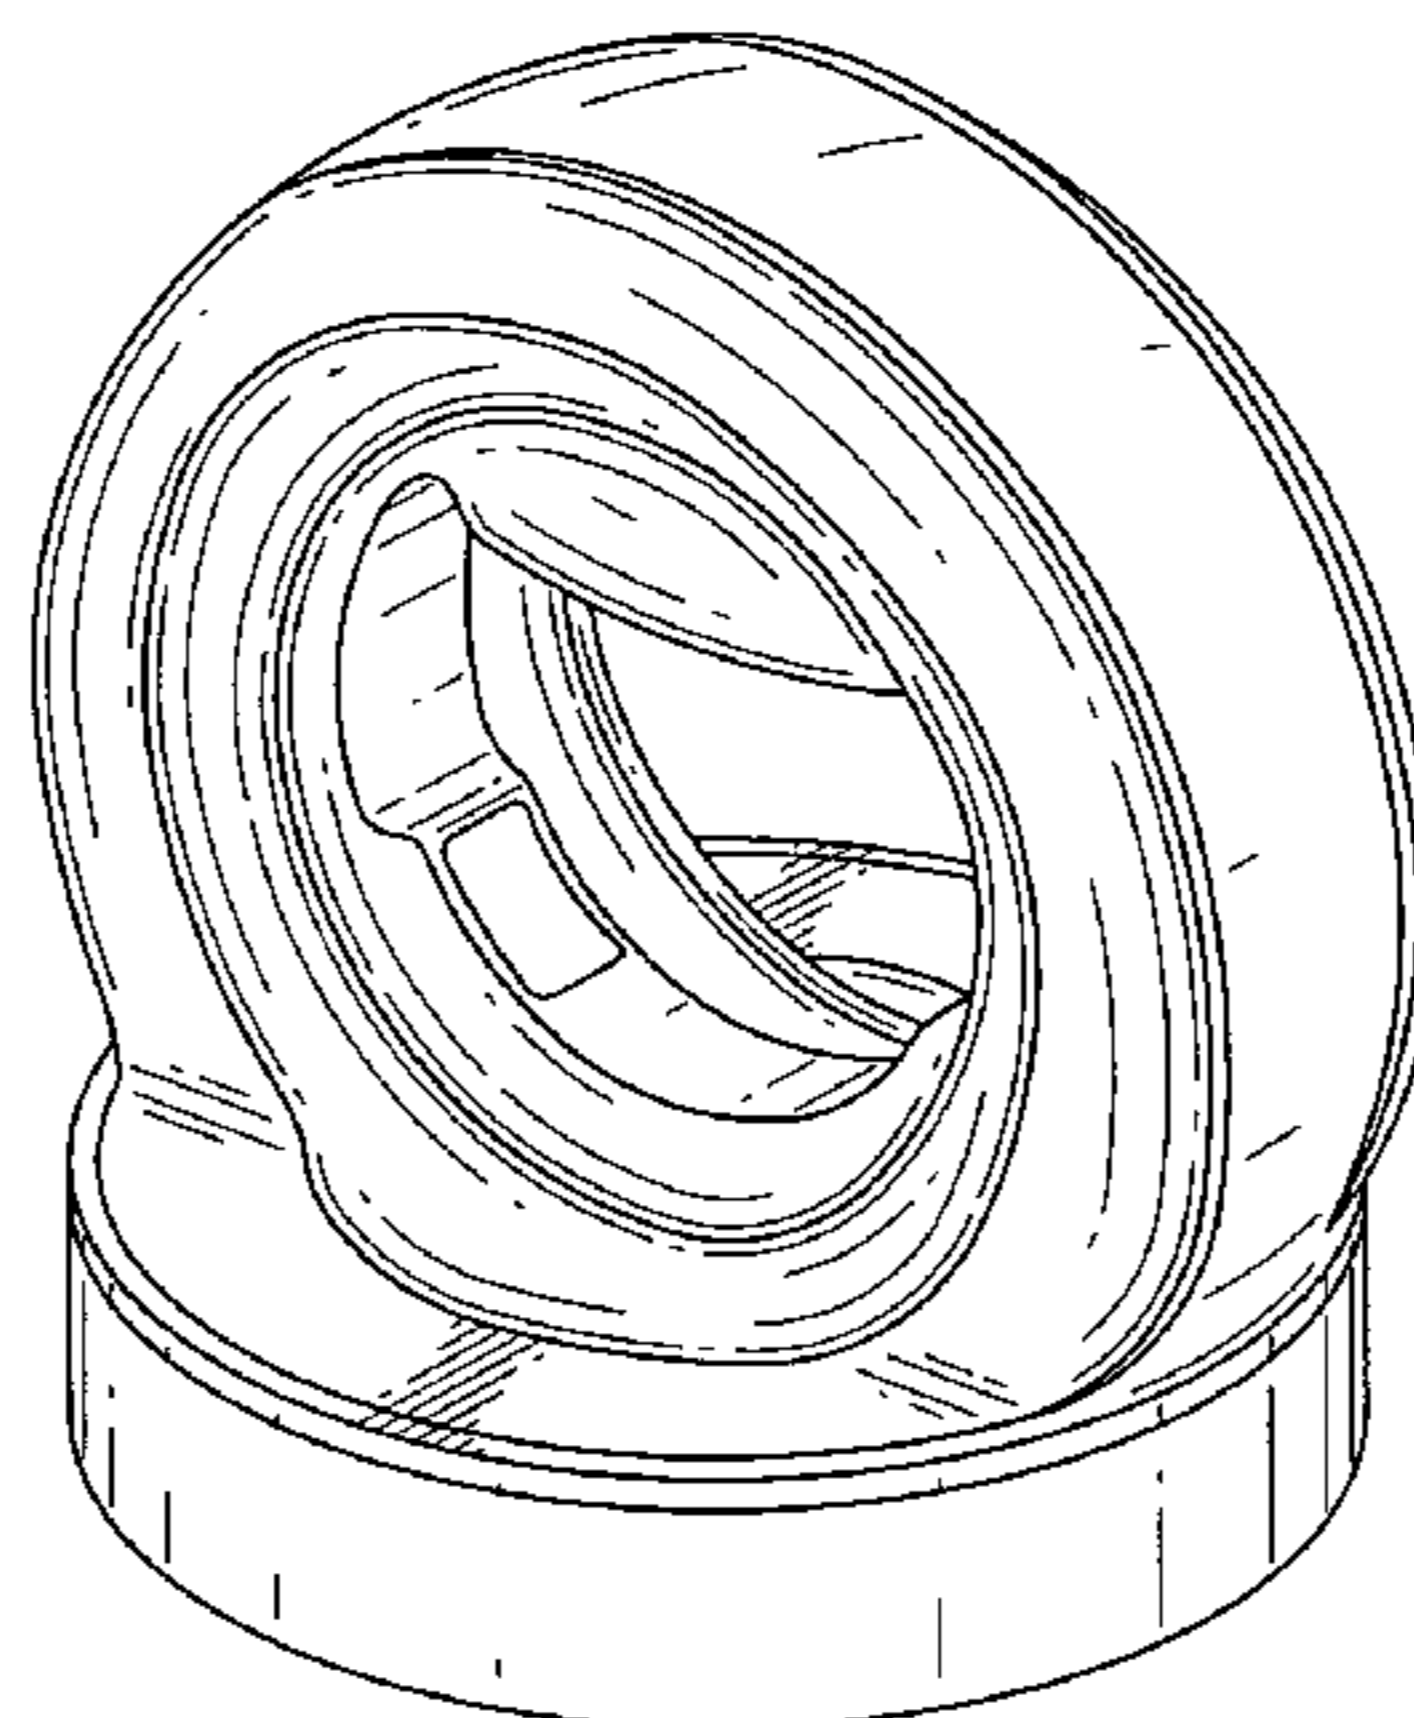

FIG. 17 is a front perspective view thereof;

FIG. 18 is a sectional view thereof taken along line 18—18 of FIG. 11;

FIG. 19 is a front view thereof with the radiation irradiator member in an alternative position; and,

FIG. 20 is a top plan view thereof with the body portion of the radiation therapy device in an alternative position.
