(57) **CLAIM**

The ornamental design for a glove portion, as shown and described.

DESCRIPTION

The figure is a top plan view of a glove showing my new design.

All other views of each embodiment are not claimed.

Features illustrated with the broken lines are not considered features of the invention being claimed, but rather illustrate an exemplary environment for the claimed features illustrated with solid lines.

The exemplary embodiments each are illustrated as a portion for either a left or right hand glove. Features of exemplary portions for the other hand of the glove would be a mirror image of each of the views for each respective embodiment and comprise further exemplary embodiments. In addition, each of the views for each of the embodiments of the portions of the glove portions illustrated can be combined with corresponding views of the respective above described portions for the other hand to form sets of portions for sets of gloves and comprise yet additional embodiments.

Exemplary materials for the glove portions include but are not limited to leather, synthetic leather, natural (e.g. cotton) or synthetic fabric, woven or unwoven, or combinations thereof.

1 Claim, 1 Drawing Sheet
