DESCRIPTION

Shirt to be used by shoulder surgery patients eliminating the need to move upper limbs while being dressed. Easily adornable patient shirt is designed with shoulder and neck seams that are held together with snaps to allow complete opening of the entire shoulder and neck area. The open shoulder and neck create a shirt tube that the wearer can step into. The easily adornable patient shirt is pulled up over the body under the arms and the shoulder seams are snapped closed. Special relief neck opening provides increased area for neck taken up by heavy shoulder dressings.
