(57) **CLAIM**

I claim the ornamental design for floating water sunglasses, as shown and as described.

**DESCRIPTION**

Many water sports and activities utilize sunglasses including surfing, wind surfing, kite boarding, wake boarding, kayaking, jet skiing, and water skiing. Because of the many water related activities utilizing sun glasses, there is a need for sunglasses that float and not sink when they are dropped in the water. As such, these sunglasses are specially designed to float, when dropped into the water. And these “floating water sunglasses” are designed for various water related sports and activities.

FIG. 1 is a perspective view of the floating water sunglasses showing the front, side, and top;

FIG. 2 is a front view of the floating water sunglasses;

FIG. 3 is a rear view of the floating water sunglasses;

FIG. 4 is a side view of the floating water sunglasses;

FIG. 5 is the other side view of the floating water sunglasses;

FIG. 6 is a top view of the floating water sunglasses; and,

FIG. 7 is a bottom view of the floating water sunglasses.
