(57) **CLAIM**

The ornamental design for a vehicle tail light lens, as shown  
and described in FIGS. 1-14.

**DESCRIPTION**

FIG. 1 is a perspective view of a right vehicle tail light lens  
attached to a vehicle, no part of the vehicle is claimed;

FIG. 2 is a perspective view of the right vehicle tail light  
lens; (front and frontal as used herein describe a view of the  
rear of a vehicle);

FIG. 3 is a front side elevational view of the right vehicle tail  
light lens (front and frontal as used herein describe a view of  
the rear of a vehicle);

FIG. 4 is a left side elevational view of the right vehicle tail  
light lens;

FIG. 5 is a right side view of the right vehicle tail light lens;

FIG. 6 is a top plan view of the right vehicle tail light lens;

FIG. 7 is a bottom plan view of the right vehicle tail light  
lens;

FIG. 8 is an alternative embodiment of the invention illus-  
trated in FIGS. 1-6 showing a perspective view of a left  
vehicle tail light lens attached to a vehicle, no part of the  
vehicle is claimed;

FIG. 9 is a perspective view of the left vehicle tail light lens;  
FIG. 10 is a front side elevational view of the left vehicle tail  
light lens;

FIG. 11 is a right side elevational view of the left vehicle tail  
light lens;

FIG. 12 is a left side view of the left vehicle tail light lens;

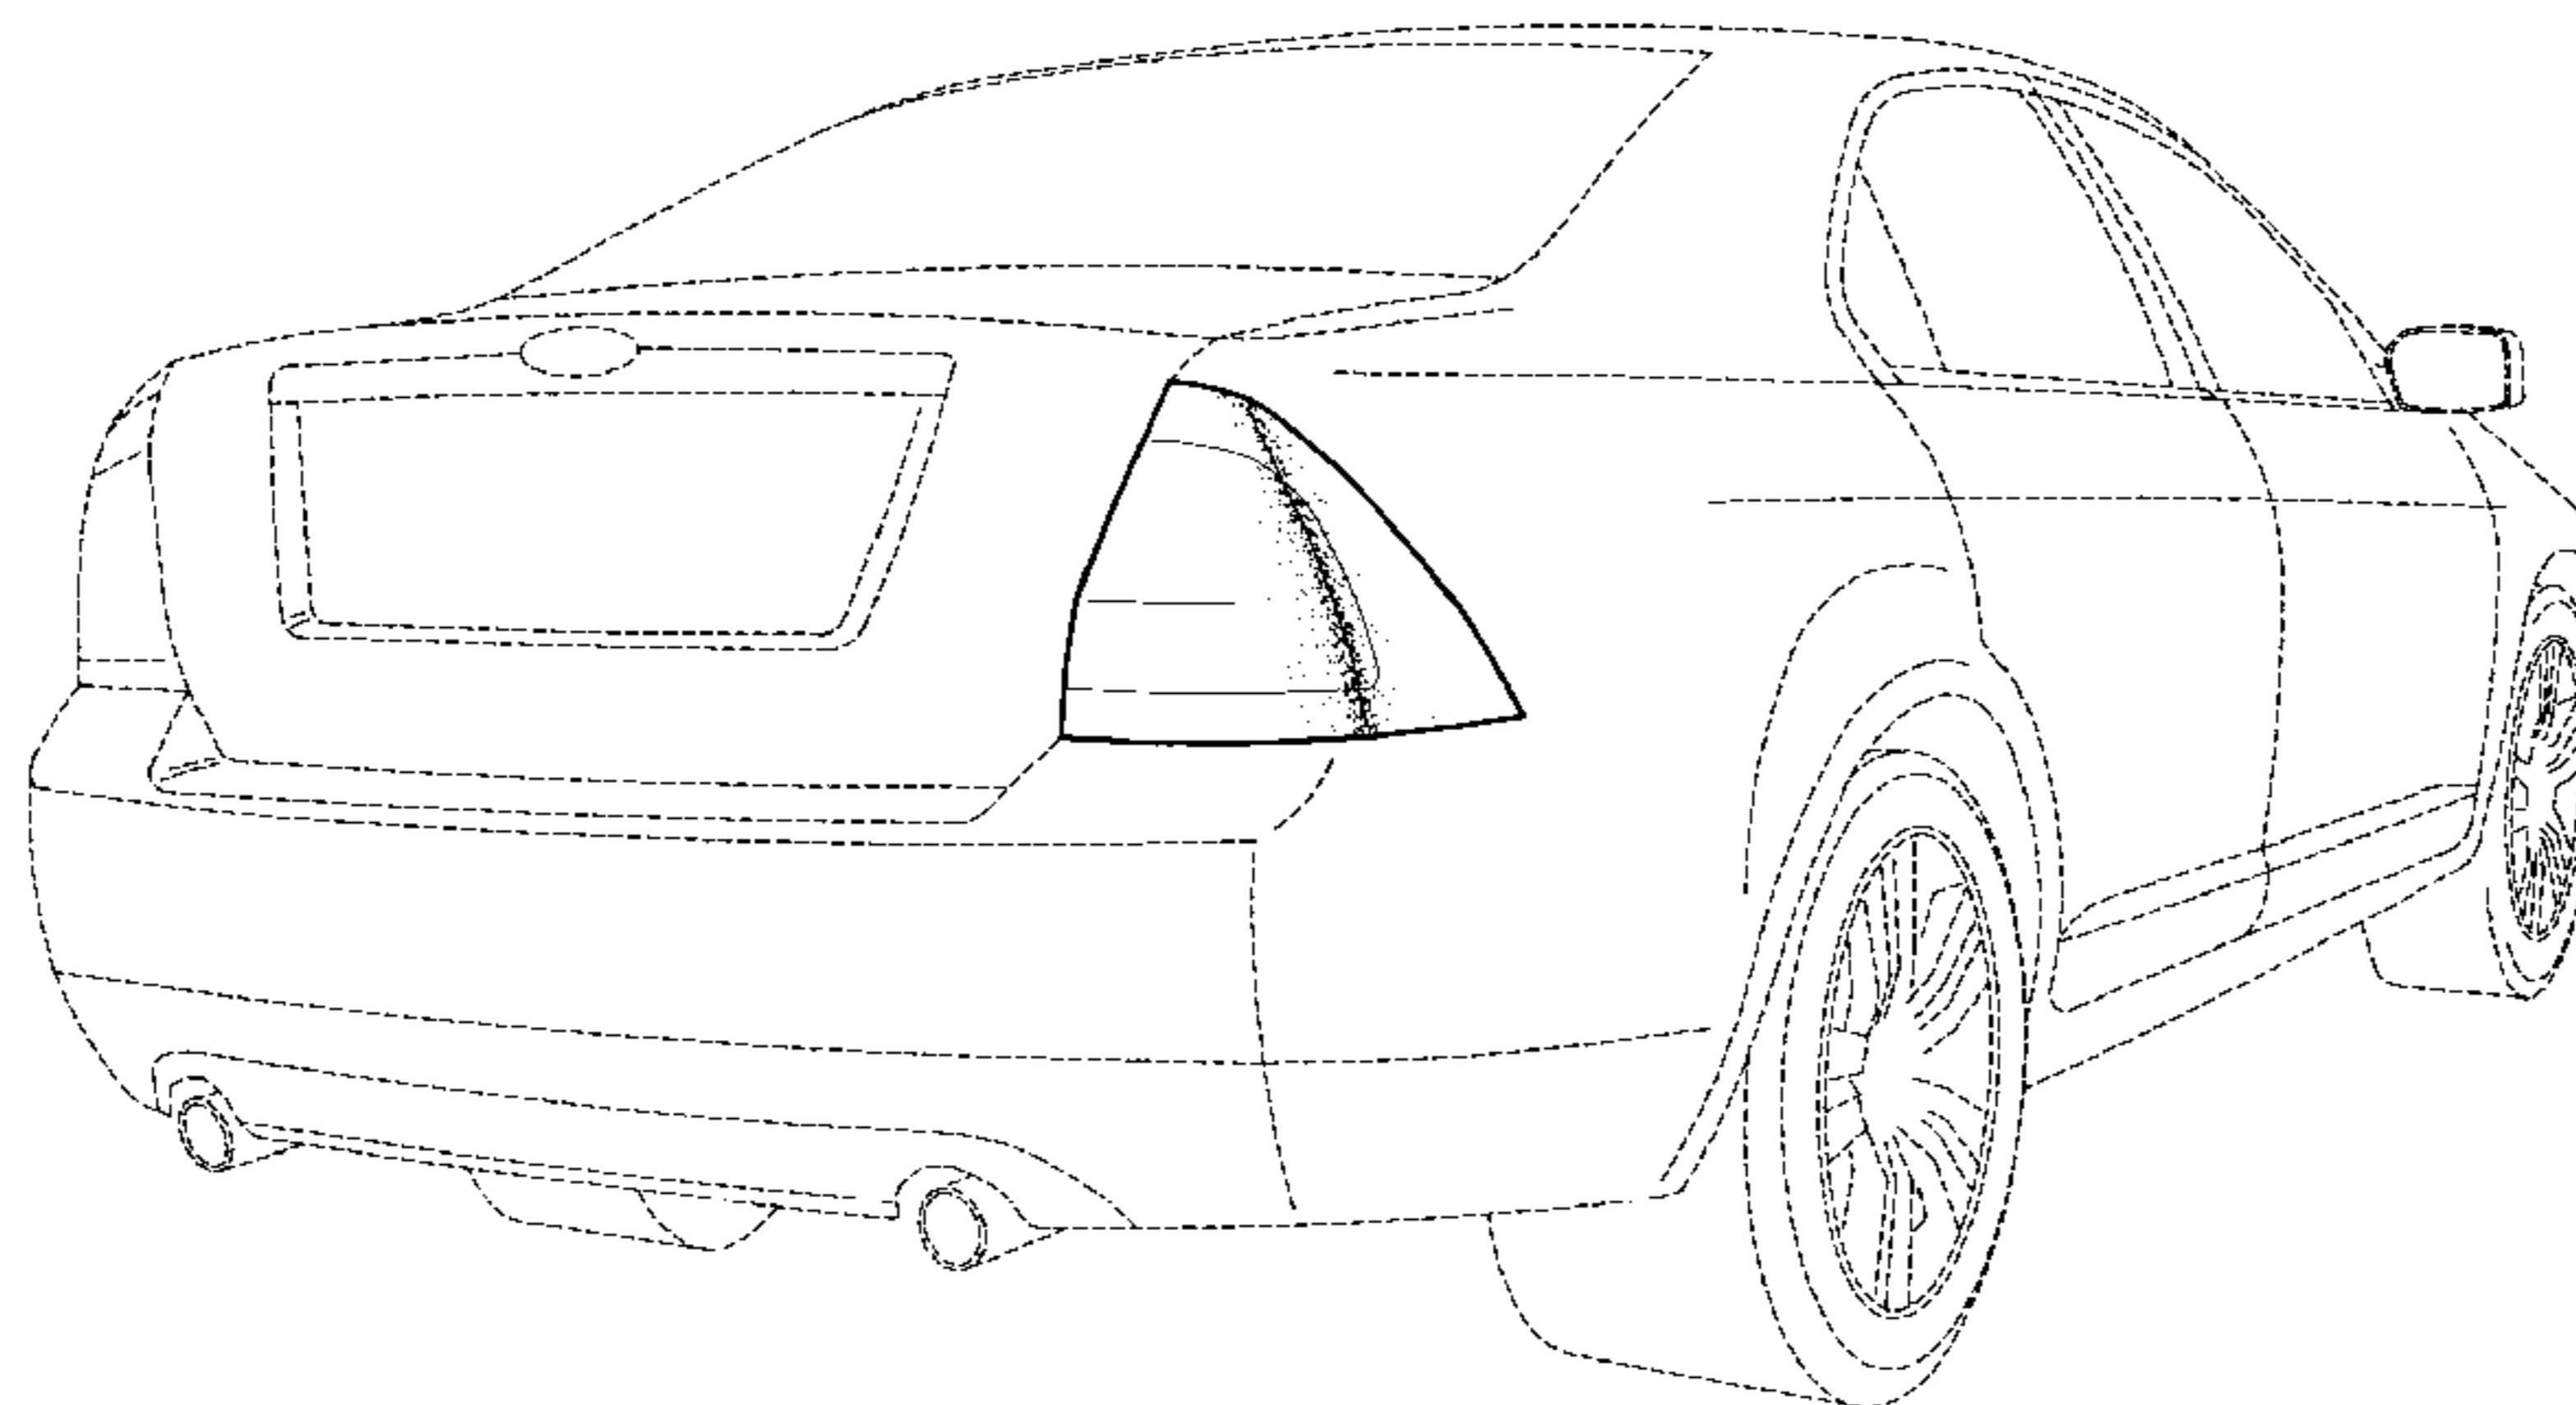

FIG. 13 is a top plan view of the left vehicle tail light lens;  
and,

FIG. 14 is a bottom plan view of the left vehicle tail light  
lens.

The stippling indicates the curvature of the vehicle tail light  
lens. The vehicle tail light lens has a triangular shape having  
a angular edges intersecting curved faces. The vehicle tail  
light lens has an inner portion and a surrounding portion on  
the outboard perimeter.

The phantom lines are not a part of the claimed invention.
