DESCRIPTION

FIG. 1 is a top perspective view of a flush valve actuator with the sensor, an external passageway and parts separation line are shown in broken lines that do not form a part of the new design made in accordance with the present design;

FIG. 2 is a front elevational view thereof with the sensor and parts separation line shown in broken lines;

FIG. 3 is a rear elevational view thereof with the parts separation line shown in broken lines;

FIG. 4 is a right side elevational view thereof with the parts separation line and the passageway shown in broken lines;

FIG. 5 is a left side elevational view thereof with the parts separation line shown in broken lines;

FIG. 6 is a top plan view thereof; and,

FIG. 7 is a bottom plan view thereof with another passageway shown in broken lines, the passageway does not form part of the invention.
