Primary Examiner—Antoine D. Davis

(57) **CLAIM**

The ornamental design for a bubble level drawer pull, as shown and described in the Figure.

DESCRIPTION

The FIGURE is a perspective view of the bubble level drawer pull showing my new design, the subject matter of the invention, with the connecting legs shown in dotted outline to show the manner that the device can connect to a face of a drawer (although the legs can take a variety of configurations and thus form no part of the subject invention).

1 Claim, 1 Drawing Sheet
