(57) **CLAIM**

The ornamental design for a lighting fixture, as shown and
described.

DESCRIPTION

The single FIGURE is a perspective front view of a lighting
fixture showing the new design, for which a perspective view
rotated 72° with respect thereto would be identical, for which
a perspective view rotated 144° with respect thereto would be
identical, for which a perspective view rotated 216° with
respect thereto would be identical, and for which a perspec-
tive view rotated 288° with respect thereto would be identical.

The broken lines form no part of the claimed design and either
represent the bounds of the claimed design (e.g., the broken
lines immediately adjacent shaded areas and the broken lines
immediately adjacent portions of the design represented in
solid lines) or are directed to environment (e.g., different
portions of the shades) and are for illustrative purposes only.
