(57) **CLAIM**

The ornamental design for a corner safety protector for motor home slide-out, as shown and described.

DESCRIPTION

The article in which the design is embodied is a safety guard corner protector intended to be used for protecting the corner of a mobile home slide-out wall extension and a trailer slide-out wall extension.

FIG. 1 is a left side view of one preferred embodiment of the corner safety protector for motor home slide-out of the present invention. The right side view is a mirror image of FIG. 1.

FIG. 2 is a front view of said one preferred embodiment of the corner safety protector for motor home slide-out. The rear view is a mirror image of FIG. 1.

FIG. 3 is a bottom view of said one preferred embodiment of the corner safety protector for motor home slide-out.

FIG. 4 is a top view of said one preferred embodiment of the corner safety protector for motor home slide-out.

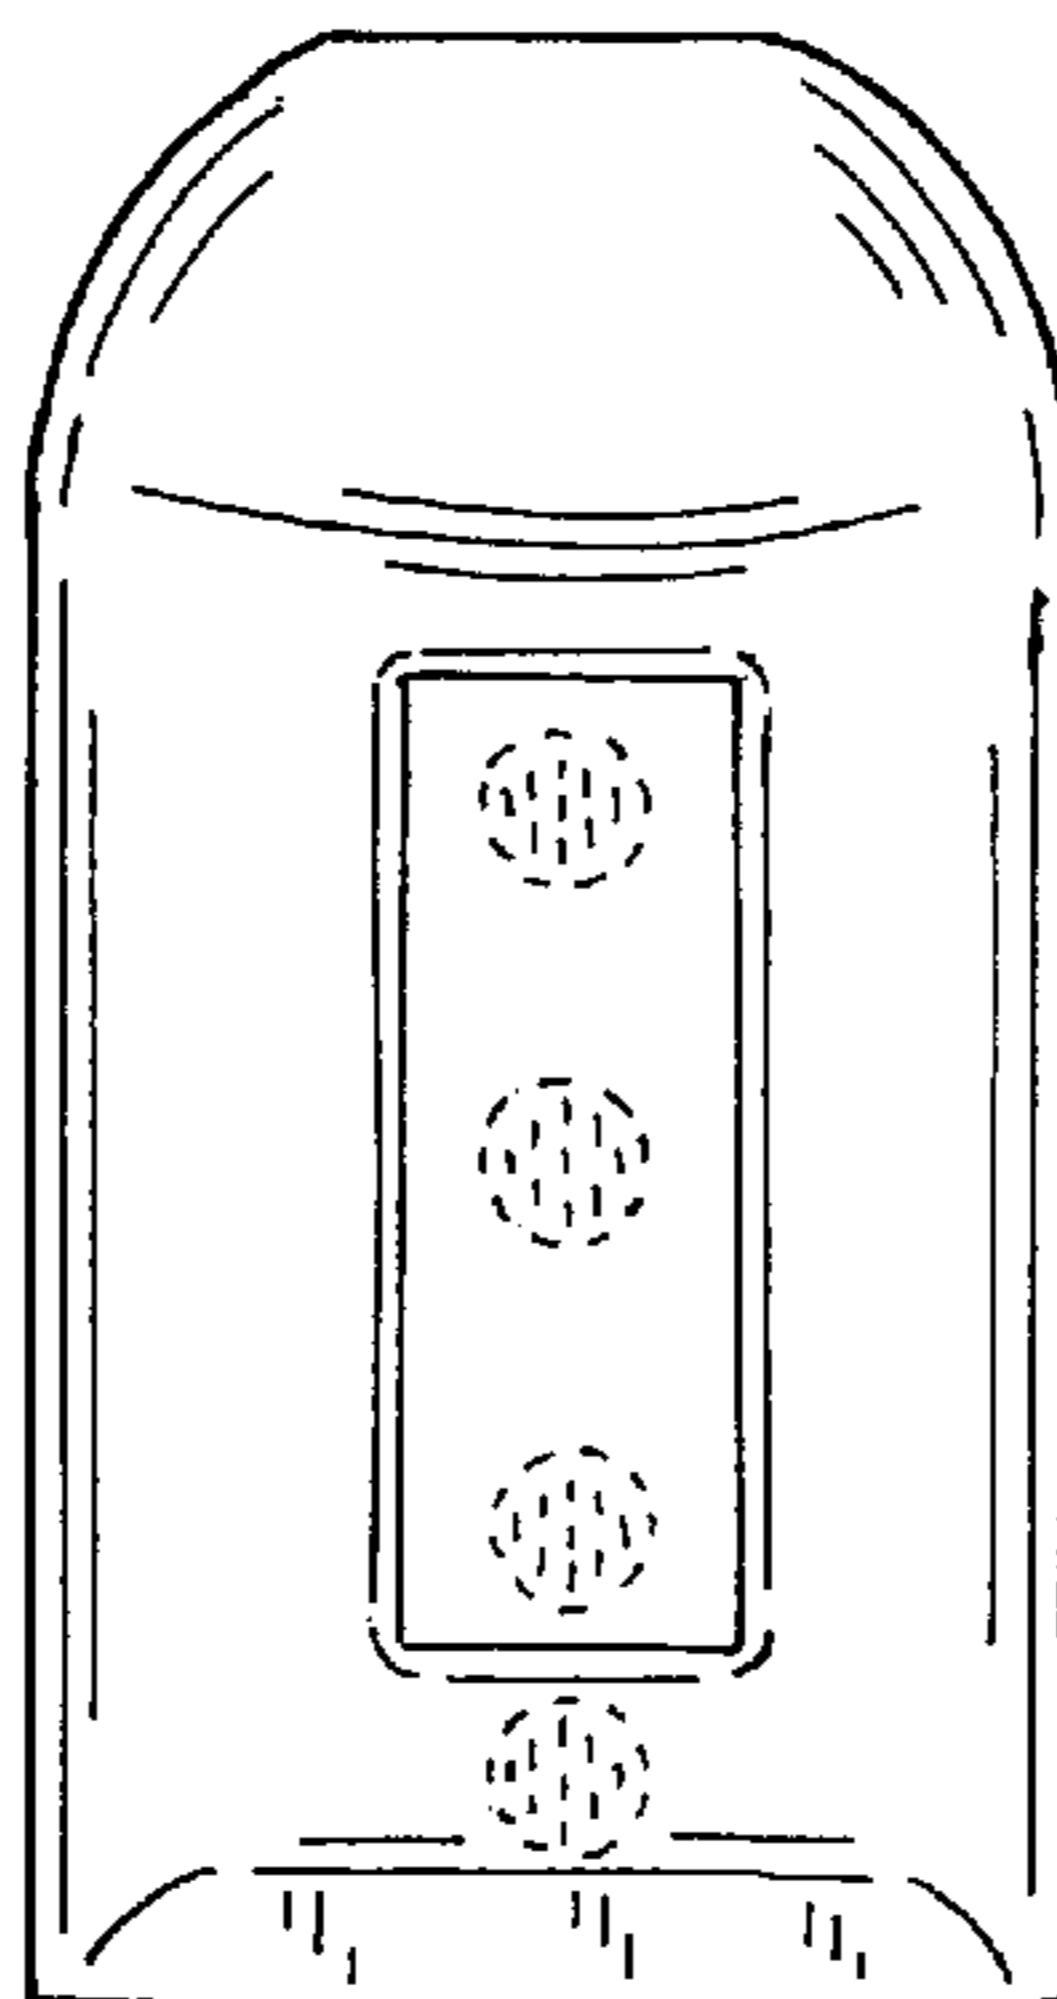

FIG. 5 is a perspective view of said one preferred embodiment of the corner safety protector for motor home slide-out, shown inverted from FIG. 1.

FIG. 6 is a side sectional view of said one preferred embodiment of the corner safety protector for motor home-slide out, taken along the line 6—6 shown in FIG. 3; and,

FIG. 7 is a side sectional view of said one preferred embodiment of the corner safety protector for motor home-slide out, taken along the line 7—7 shown in FIG. 3.

The circular patterns with vertical lines shown in FIGS. 1–5 are environmental structure, namely, vent markings from the mold used in forming the article in which is embodied the design of said one preferred embodiment of the corner safety protector for motor home-slide out, and are not part of the claimed invention. The dotted vertical lines within these dotted circles are environmental structure, namely, ribbing created by the mold used in forming said one preferred embodiment of the corner safety protector for motor home-slide out, are not shading to reflect color and are not stippling to represent a section through said one preferred embodiment of the corner safety protector for motor home-slide out, and are not part of the claimed invention. The dotted circular pattern with radial dotted lines in the center of the ball shown in FIG. 4 is environmental structure, namely, markings from the mold used in forming said one preferred embodiment of the corner safety protector for motor home-slide out, and is not part of the claimed invention.
