FIG. 1 is a front view of a butt portion of a roofing shingle of the invention, showing patches of different colors with every other patch having a shadow line at an upper portion thereof.

FIG. 2 is an elevational view of the bottom edge of the roofing shingle shown in FIG. 1, wherein the top edge is a mirror image thereof.

FIG. 3 is an elevational view of the left side of the roofing shingle shown in FIG. 1, wherein the right side is a mirror image thereof.

FIG. 4 is a front view of a butt portion of a roofing shingle according to another embodiment of the invention, showing patches of different colors with every other patch having a shadow line at an upper portion thereof.

FIG. 5 is an elevational view of the bottom edge of the roofing shingle shown in FIG. 4, wherein the top edge is a mirror image thereof.

FIG. 6 is an elevational view of the left side of the roofing shingle shown in FIG. 4, wherein the right side is mirror image thereof.

FIG. 7 is a front view of a butt portion of a roofing shingle according to another embodiment of the invention, showing patches of different colors with every other patch having a shadow line at an upper portion thereof.

FIG. 8 is an elevational view of the bottom edge of the roofing shingle shown in FIG. 7, wherein the top edge is a mirror image thereof;

FIG. 9 is an elevational view of the left side of the roofing shingle shown in FIG. 7, wherein the right side is a mirror image thereof;

FIG. 10 is a front view of a butt portion of a roofing shingle according to another embodiment of the invention, showing patches of different colors with every other patch having a shadow line at an upper portion thereof.

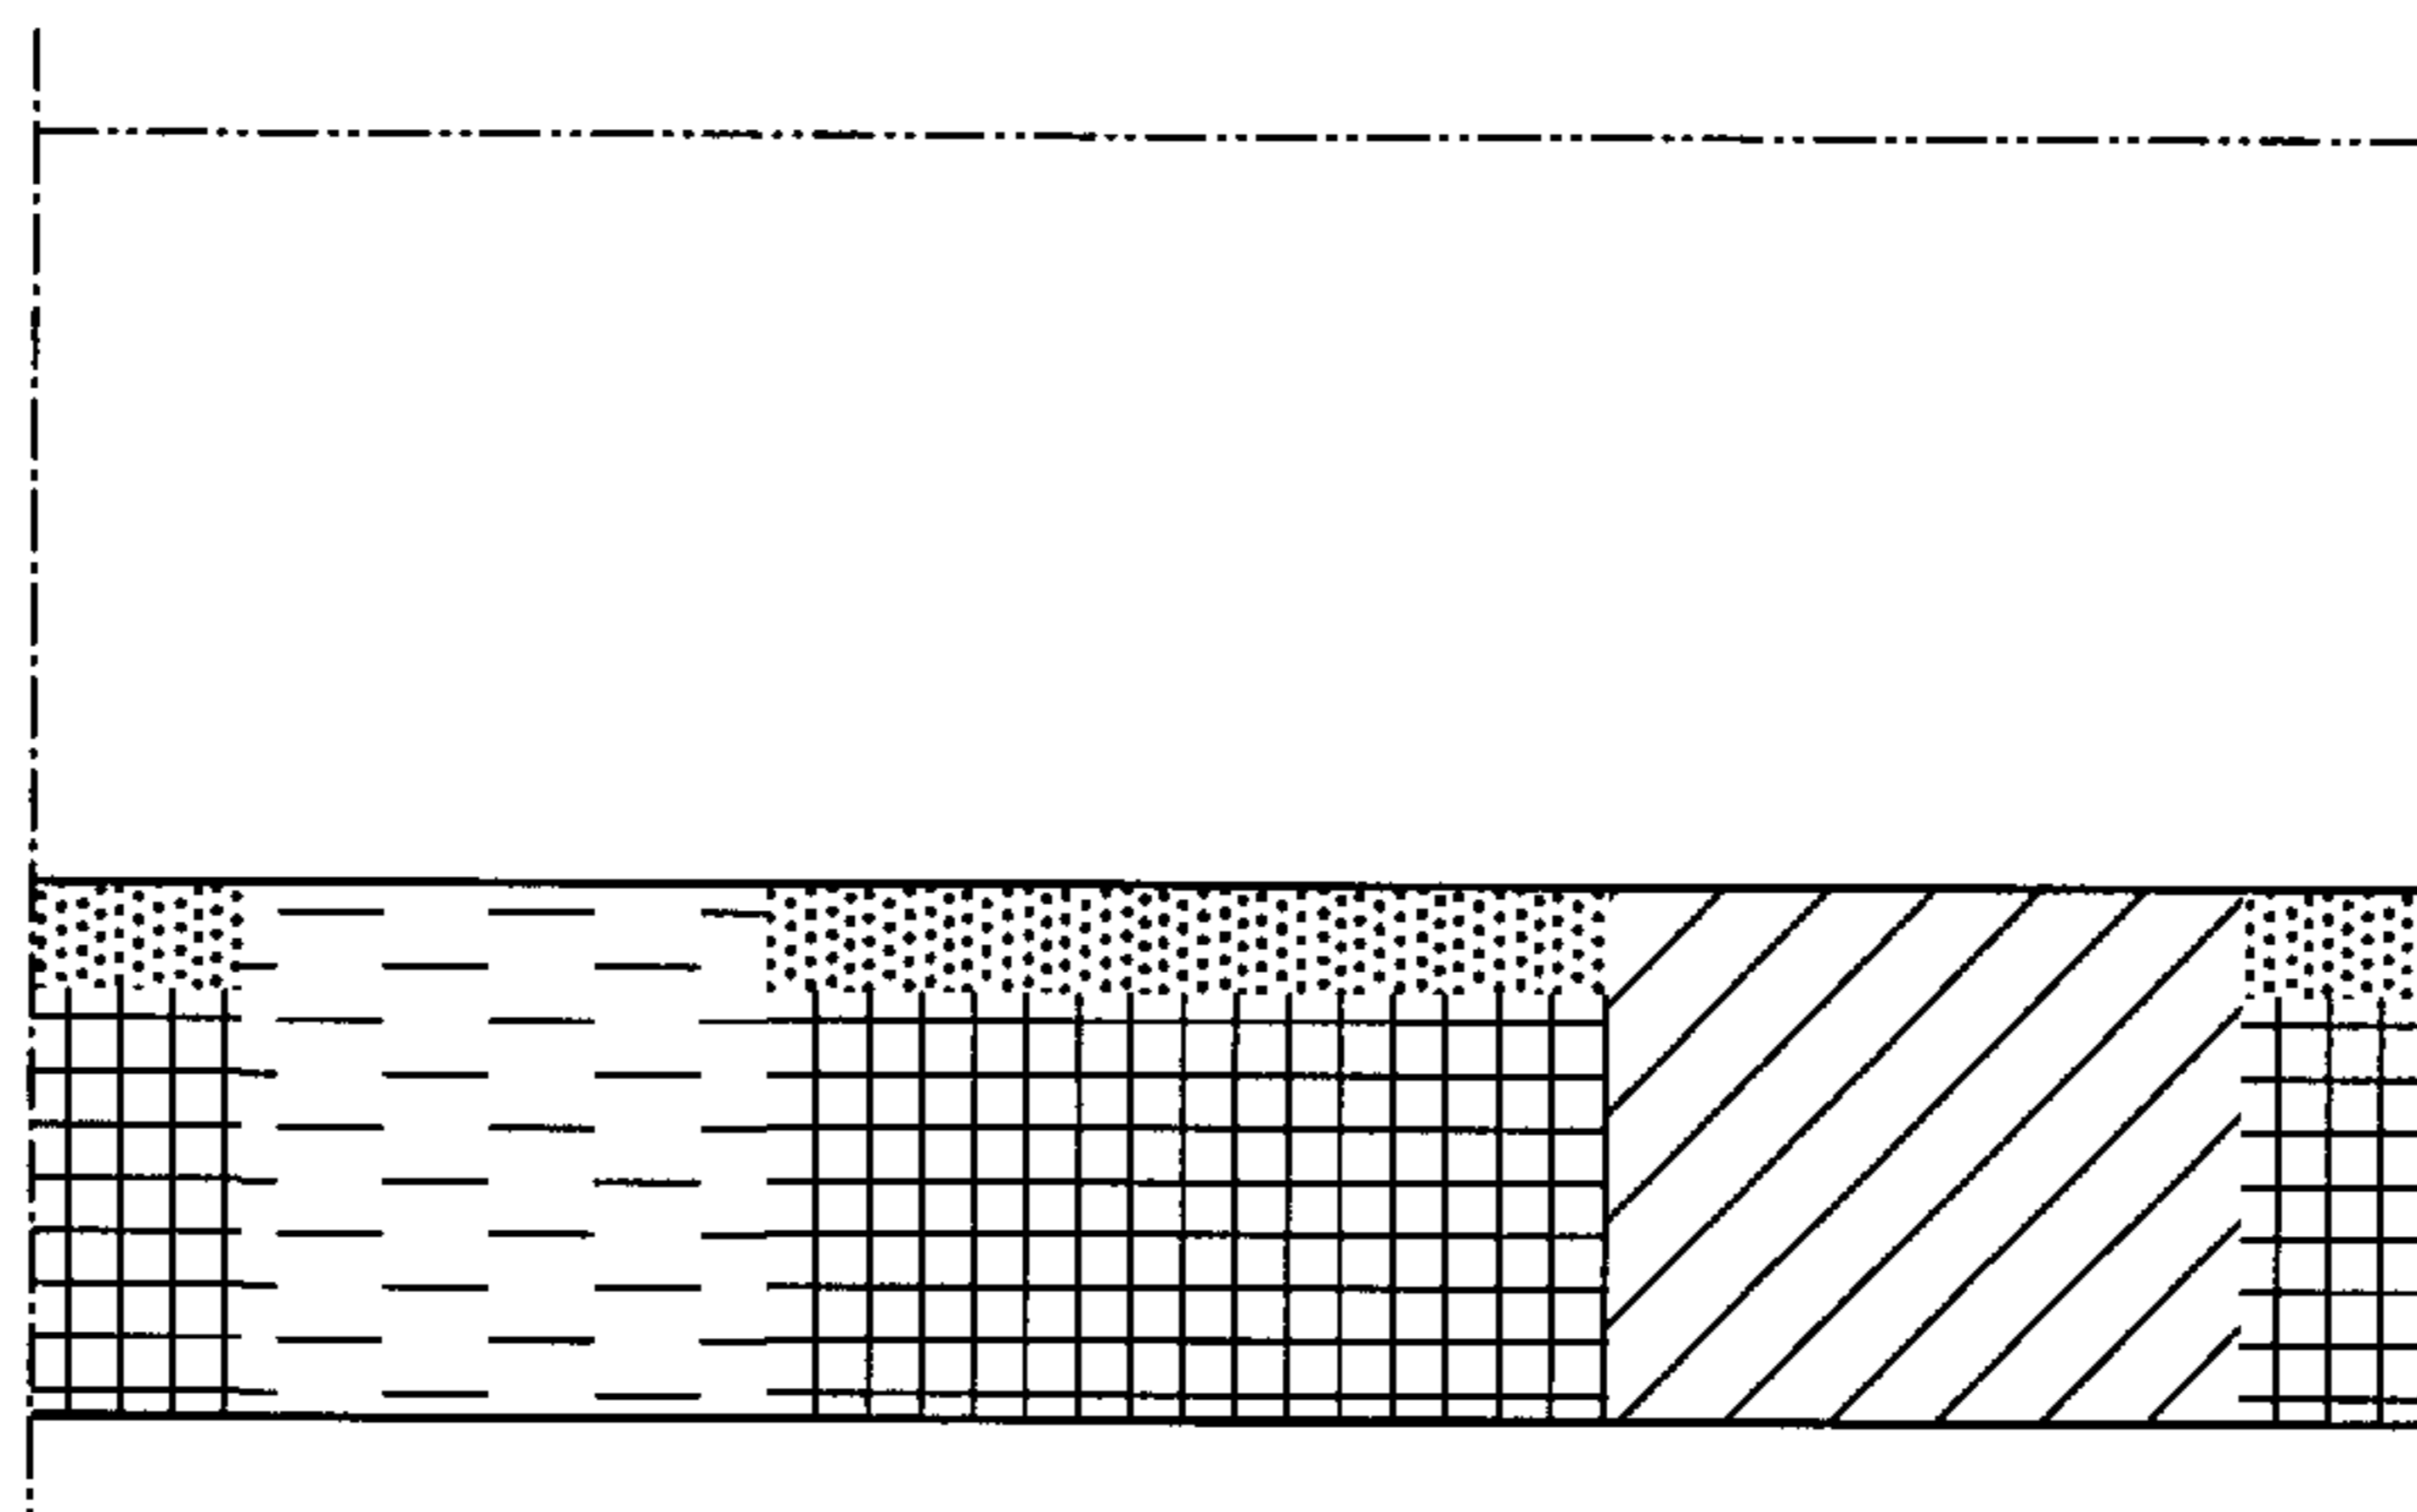

FIG. **11** is an elevational view of the bottom edge of the roofing shingle shown in FIG. **10**, wherein the top edge is a mirror image thereof.

FIG. **12** is an elevational view of the left side of the roofing shingle shown in FIG. **10**, wherein the right side is a mirror image thereof.

FIG. **13** is a front view of a butt portion of a roofing shingle according to another embodiment of the invention, showing patches of different colors with every other patch having a shadow line at an upper portion thereof.

FIG. **14** is an elevational view of the bottom edge of the roofing shingle shown in FIG. **13**, wherein the top edge is a mirror image thereof.

FIG. **15** is an elevational view of the left side of the roofing shingle shown in FIG. **13**, wherein the right side is a mirror image thereof.

FIG. **16** is a front view of a butt portion of a roofing shingle according to another embodiment of the invention, showing patches of different colors with every other patch having a shadow line at an upper portion thereof.

FIG. **17** is an elevational view of the bottom edge of the roofing shingle shown in FIG. **16**, wherein the top edge is a mirror image thereof; and,

FIG. **18** is an elevational view of the left side of the roofing shingle shown in FIG. **16**, wherein the right side is a mirror image thereof.

The figures illustrate the butt portions of roofing shingles or portions of the butt portions of shingles. The broken lines in the figures are for illustrative purposes only and form no part of the claimed design.

The drawings are lines for color.
