(57) **CLAIM**

I claim the ornamental design for a drinking vessel, as shown
and described.

DESCRIPTION

FIG. 1 is a top and side perspective view of a drinking vessel
showing my new design;

FIG. 2 is a side elevation view thereof, wherein the position of
a middle portion is on a split between two inner walls, the
opposite view being the same;

FIG. 3 is a side elevation view thereof, wherein the position of
the middle portion is centered on an inner wall (rotated 90
degrees from the view in FIG. 2), the opposite view being the
same, wherein views from other sides can be understood from
the perspective view;

FIG. 4 is a top plan view thereof;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a vertical longitudinal sectional view along line 6—6
of FIG. 4;

FIG. 7 is a top and side perspective view of another embodi-
ment of my new design;

FIG. 8 is a side elevation view thereof, wherein the position of
a middle portion is on a split between two inner walls, the two
other like views being the same;

FIG. 9 is a side elevation view thereof, wherein the position of
the middle portion is centered on the intersection of two inner
walls (opposite the view in FIG. 8), the two other like views
being the same, wherein views from other sides can be under-
stood from the perspective view;

FIG. 10 is a top plan view thereof;

FIG. 11 is a bottom plan view thereof;

FIG. 12 is a vertical longitudinal sectional view along line
12—12 of FIG. 10;

FIG. 13 is a top and side perspective view of another embodi-
ment of my new design;

FIG. 14 is a side elevation view thereof, wherein the position
of a middle portion is on a split between two inner walls, the
three other like views being the same;

FIG. 15 is a side elevation view thereof, wherein the position
of the middle portion is centered on the intersection of two
inner walls (rotated 45 degrees from the view in FIG. 14),
wherein views from other sides can be understood from the
perspective view;

FIG. 16 is a top plan view thereof;

FIG. 17 is a bottom plan view thereof; and,

FIG. 18 is a vertical longitudinal sectional view along line
18—18 of FIG. 16.

The oblique line surface treatment indicates a translucent as
well as a transparent article.
