(57) **CLAIM**

The ornamental design for a “fixture base for LED lighting strip,” as shown and described.

DESCRIPTION

This application may be deemed related to commonly owned copending U.S. Design patent application Ser. No. 29/272, 880 entitled “Lighting Fixture End Caps” filed even date herewith, which application is expressly incorporated herewith by reference.

FIG. 1 is a front left side perspective view showing an indefinite length of a fixture base for LED lighting strip which embodies my new and original design therefore;

FIG. 2 is a front elevation view thereof;

FIG. 3 is a rear elevation view thereof;

FIG. 4 is a top plan view thereof;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a left side elevation view thereof, the right side elevation view being a mirror image thereof; and,

FIG. 7 is a front left side perspective view similar to FIG. 1 but showing structural components in broken lines that are in the environment of the claimed design.

The broken lines in FIGS. 6 and 7 represent structural components (e.g., a light emitting diode (LED) lighting strip as shown in both FIGS. 6 and 7 and a left side end cap as shown in FIG. 7) which are in the environment of the claimed design, but which do not form part of the claimed design.
