(57) **CLAIM**

The ornamental design for a 3-dimensional visor display unit, as shown and described.

DESCRIPTION

FIG. **1** is a front view of the 3-dimensional visor display unit according to the present invention.

FIG. **2** is a rear view of the 3-dimensional visor display unit according to the present invention.

FIG. **3** is a top view of the 3-dimensional visor display unit according to the present invention.

FIG. **4** depicts a perspective view of a bottom portion of the 3-dimensional visor display unit according to the present invention.

FIG. **5** is a side view of the 3-dimensional visor display unit according to the present invention.

FIG. **6** is a side view of the 3-dimensional visor display unit from the opposite side as shown in FIG. **5** according to the present invention; and,

FIG. **7** depicts a perspective view of a front portion of the 3-dimensional visor display unit according to the present invention.

It should be understood that the labels used herein for describing orientation (e.g., front, rear, top, bottom, right and left) are merely for reference, and the design may be disposed in any manner and still be within the scope of the present invention. The portions of the article in broken lines are shown for illustrative purposes only and form no part of the claimed design.

The broken lines shown in the drawings represent portions of the 3-dimensional visor display unit, that form no part of the claimed design.
