(57) **CLAIM**

The ornamental design for a display screen with tabbed user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with tabbed user interface, showing our new design, with the portion of the user interface having a first appearance state;

FIG. 2 is a front view of the display screen with tabbed user interface, having a second appearance state;

FIG. 3 is a front view of the display screen with tabbed user interface, having a third appearance state;

FIG. 4 is a front view of the display screen with tabbed user interface, having a fourth appearance state;

FIG. 5 is a front view of the display screen with tabbed user interface, having a fifth appearance state;

FIG. 6 is a front view of a display screen with tabbed user interface, showing our new design, with the portion of the user interface having a first appearance state;

FIG. 7 is a front view of the display screen with tabbed user interface, having a second appearance state;

FIG. 8 is a front view of the display screen with tabbed user interface, having a third appearance state;

FIG. 9 is a front view of the display screen with tabbed user interface, having a fourth appearance state;

FIG. 10 is a front view of the display screen with tabbed user interface, having a fifth appearance state;

FIG. 11 is a front view of a display screen with tabbed user interface, our new design, with the portion of the user interface having a first appearance state;

FIG. 12 is a front view of the display screen with tabbed user interface, having a second appearance state;

FIG. 13 is a front view of the display screen with tabbed user interface, having a third appearance state;

FIG. 14 is a front view of the display screen with tabbed user interface, having a fourth appearance state; and,

FIG. 15 is a front view of the display screen with tabbed user interface, having a fifth appearance state.

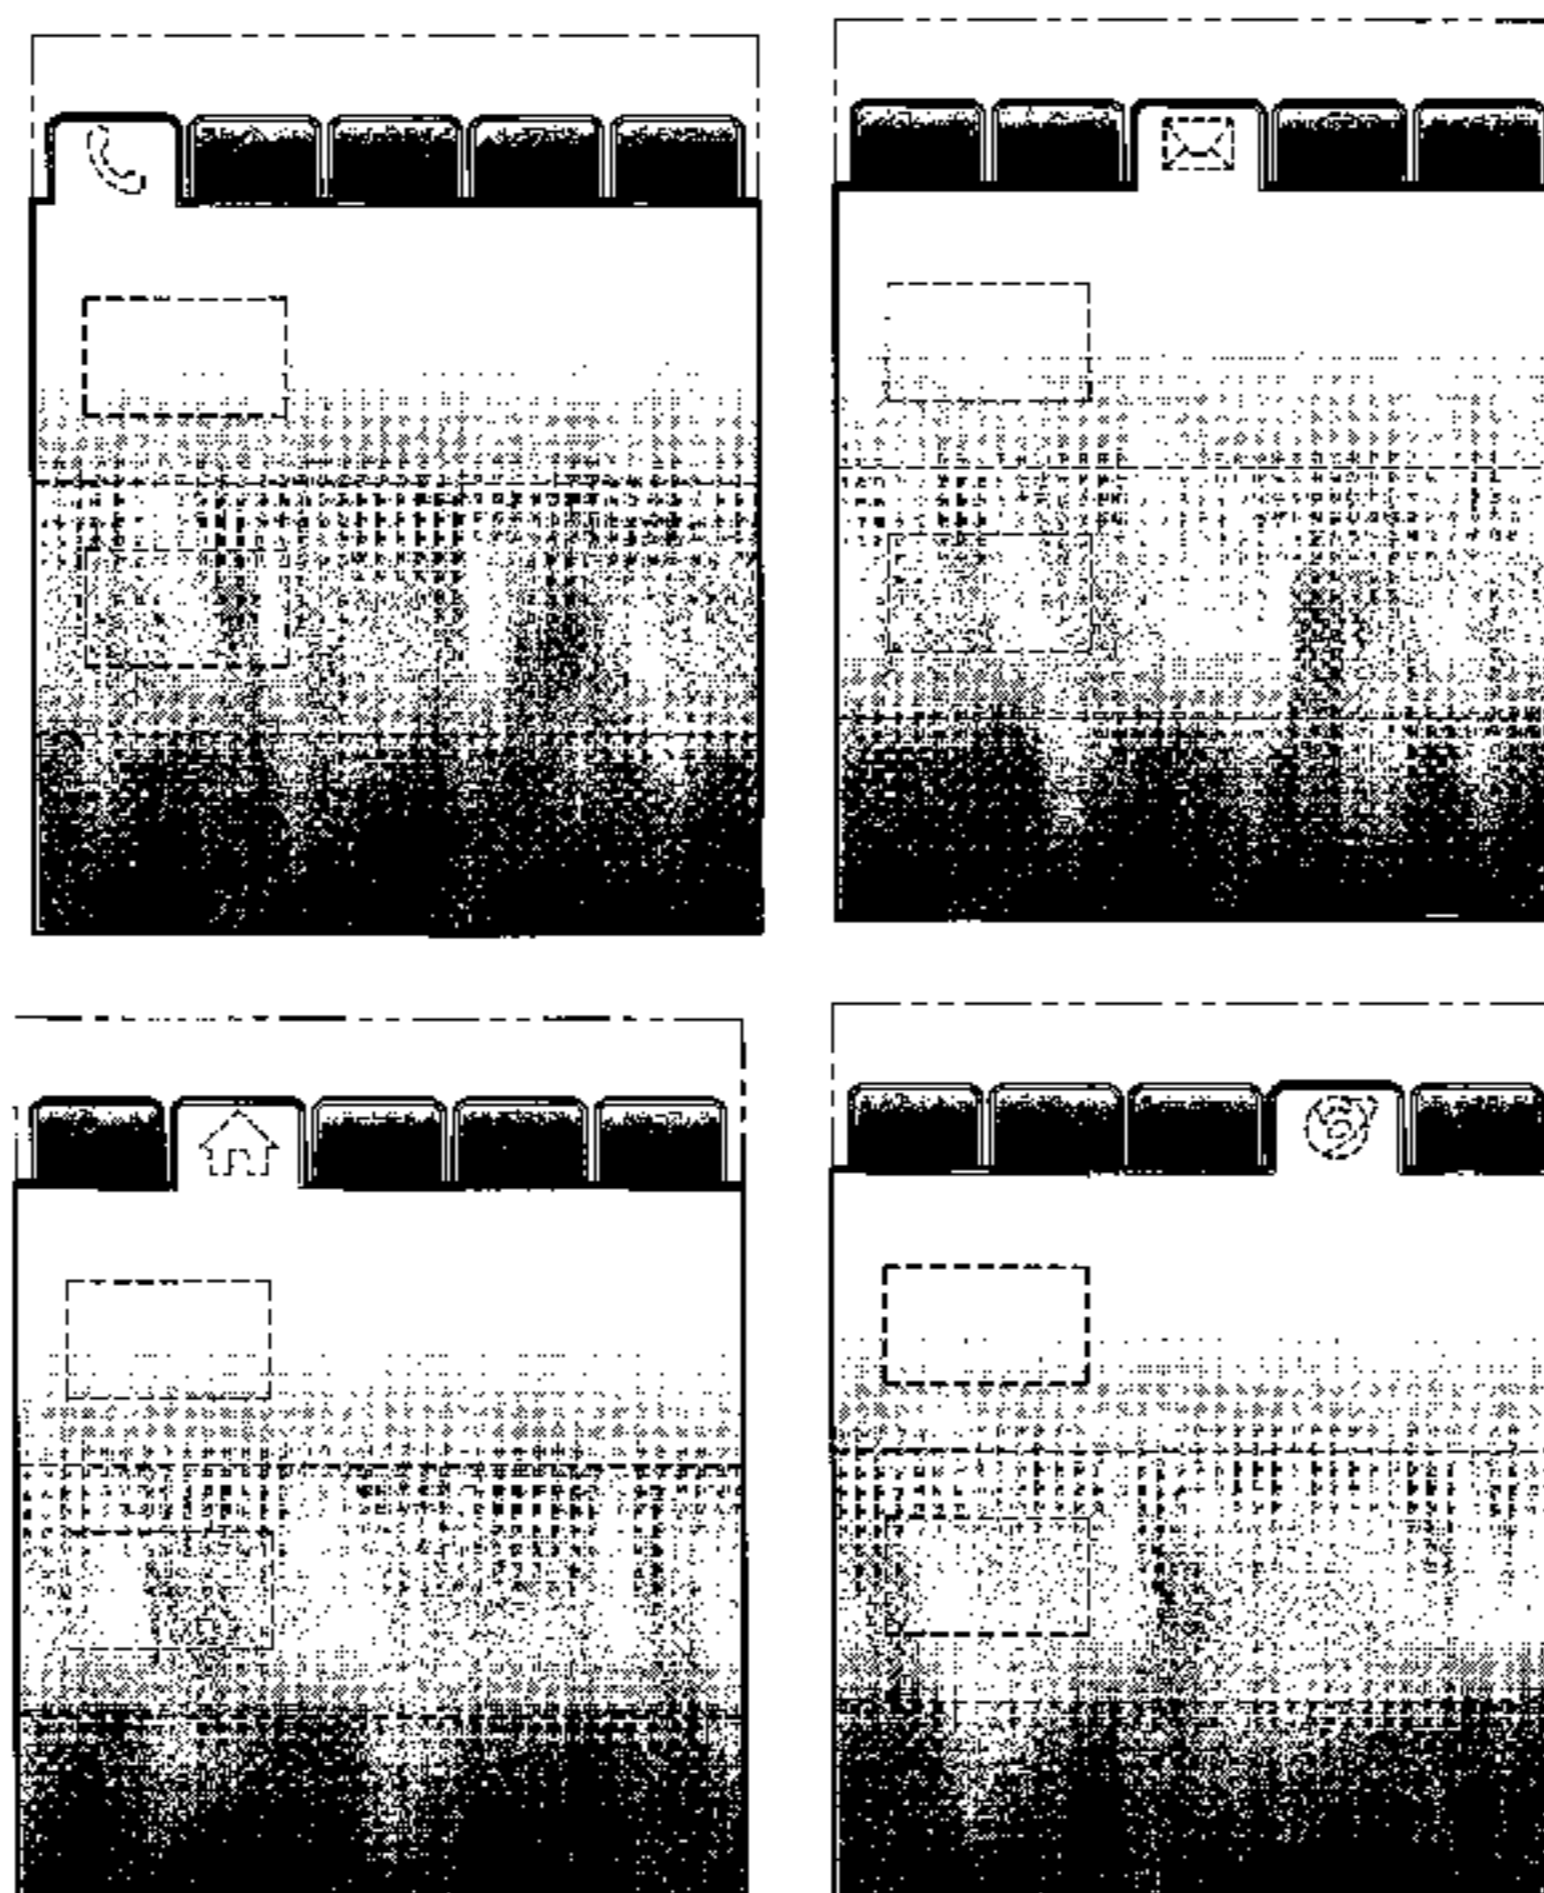

The appearances of the display screens with tabbed user interface are shown by the representative consecutive appearance states in FIGS. 1-5, 6-10, and 11-15, with a sequence of transitions between the appearance states, rendering animations.

The broken line showing of a display screen, windows, and various graphical representations is for illustrative purposes only and forms no part of the claimed design.

The subject matter in this application includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

The perimeters of the claimed design and the underlying unclaimed display screen are understood to be flush.
