(57) **CLAIM**

The ornamental design for an adjustable pillow for supporting
an infant, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an adjustable pillow for sup-
porting an infant consistent with the present invention. The
pillow is shown in use with a caregiver supporting an infant.

FIG. 2 is an enlarged side view of the adjustable pillow of
FIG. 1, shown in an alternate unfolded configuration.

FIG. 3 is a slightly enlarged side perspective view of the
adjustable pillow of FIG. 1, shown with one end folded back
upon itself; and,

FIG. 4 is a further enlarged fragmentary perspective view of
a pocket and a loop coupled to the adjustable pillow, shown in
use with a feeding accessory passed through the loop and
secured to the pillow.

In the drawings, the broken lines showing the caregiver and
infant in FIG. 1 and the feeding accessory in FIG. 4 represent
environmental structure and form no part of the claimed
design. The broken lines on the pocket feature of the pillow
represent stitching forming part of the claim. The raised cir-
cular features represent a type of fabric, therefore represent-
ing environmental structure and forming no part of the
claimed invention.
