Related U.S. Application Data

The ornamental design for an adjustable pillow for supporting an infant, as shown and described.

(63) Continuation of application No. 11/057,722, filed on Feb. 14, 2005, now abandoned.

DESCRIPTION

(51) **LOC (8) Cl.** **06-09**

FIG. 1 is a perspective view of an adjustable pillow for supporting an infant consistent with the present invention. The pillow is shown in use with a caregiver supporting an infant.

(52) **U.S. Cl.** **D6/601**

FIG. 2 is an enlarged side view of the adjustable pillow of FIG. 1, shown in an alternate unfolded configuration.

(58) **Field of Classification Search** D6/595–597,
D6/601, 604; 5/630, 632, 636, 644, 646,

D24/190; 428/136.9; 84/453

FIG. 3 is a slightly enlarged side perspective view of the adjustable pillow of FIG. 1, shown with one end folded back upon itself; and,

See application file for complete search history.

FIG. 4 is a further enlarged fragmentary perspective view of a pocket and a loop coupled to the adjustable pillow, shown in use with a feeding accessory passed through the loop and secured to the pillow.

(56) **References Cited**

In the drawings, the broken lines showing the caregiver and infant in FIG. 1 and the feeding accessory in FIG. 4 represent environmental structure and form no part of the claimed design. The broken lines on the pocket feature of the pillow represent stitching forming part of the claim. The raised circular features represent a type of fabric, therefore representing environmental structure and forming no part of the claimed invention.
