(57) **CLAIM**

The ornamental design for a computer having a door, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of the computer having a door, wherein the door has a series of horizontal bars each having a non-illuminable left portion and an illuminable right portion, and the door is illustrated in a closed or latched position with respect to a chassis of the computer;

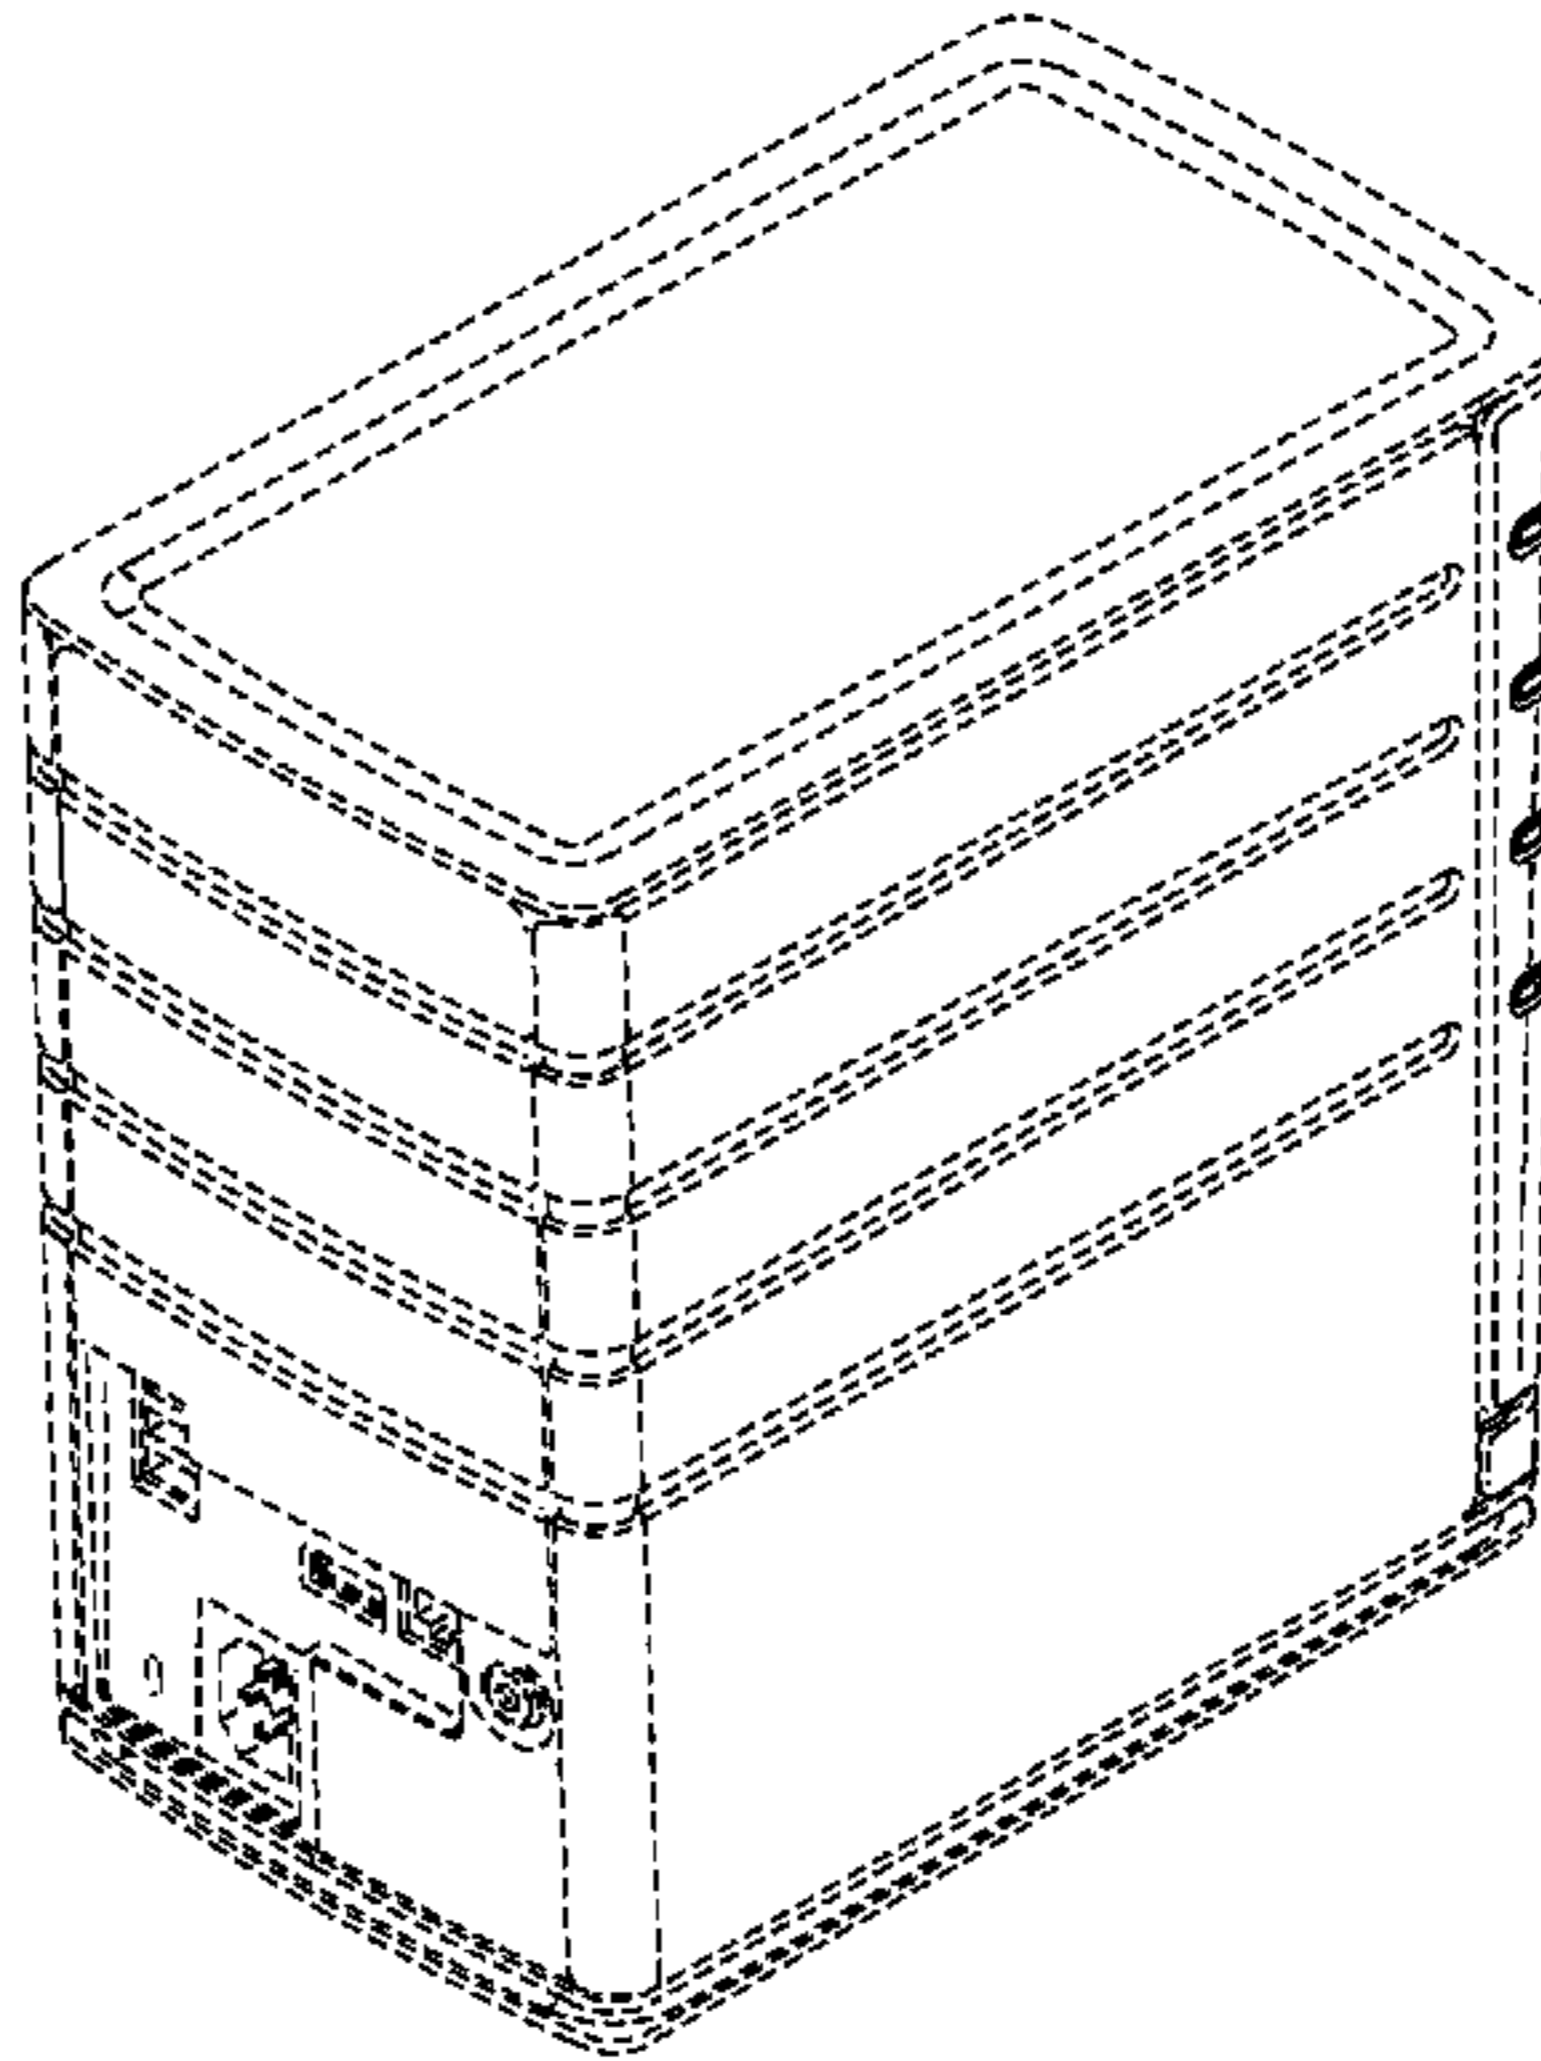

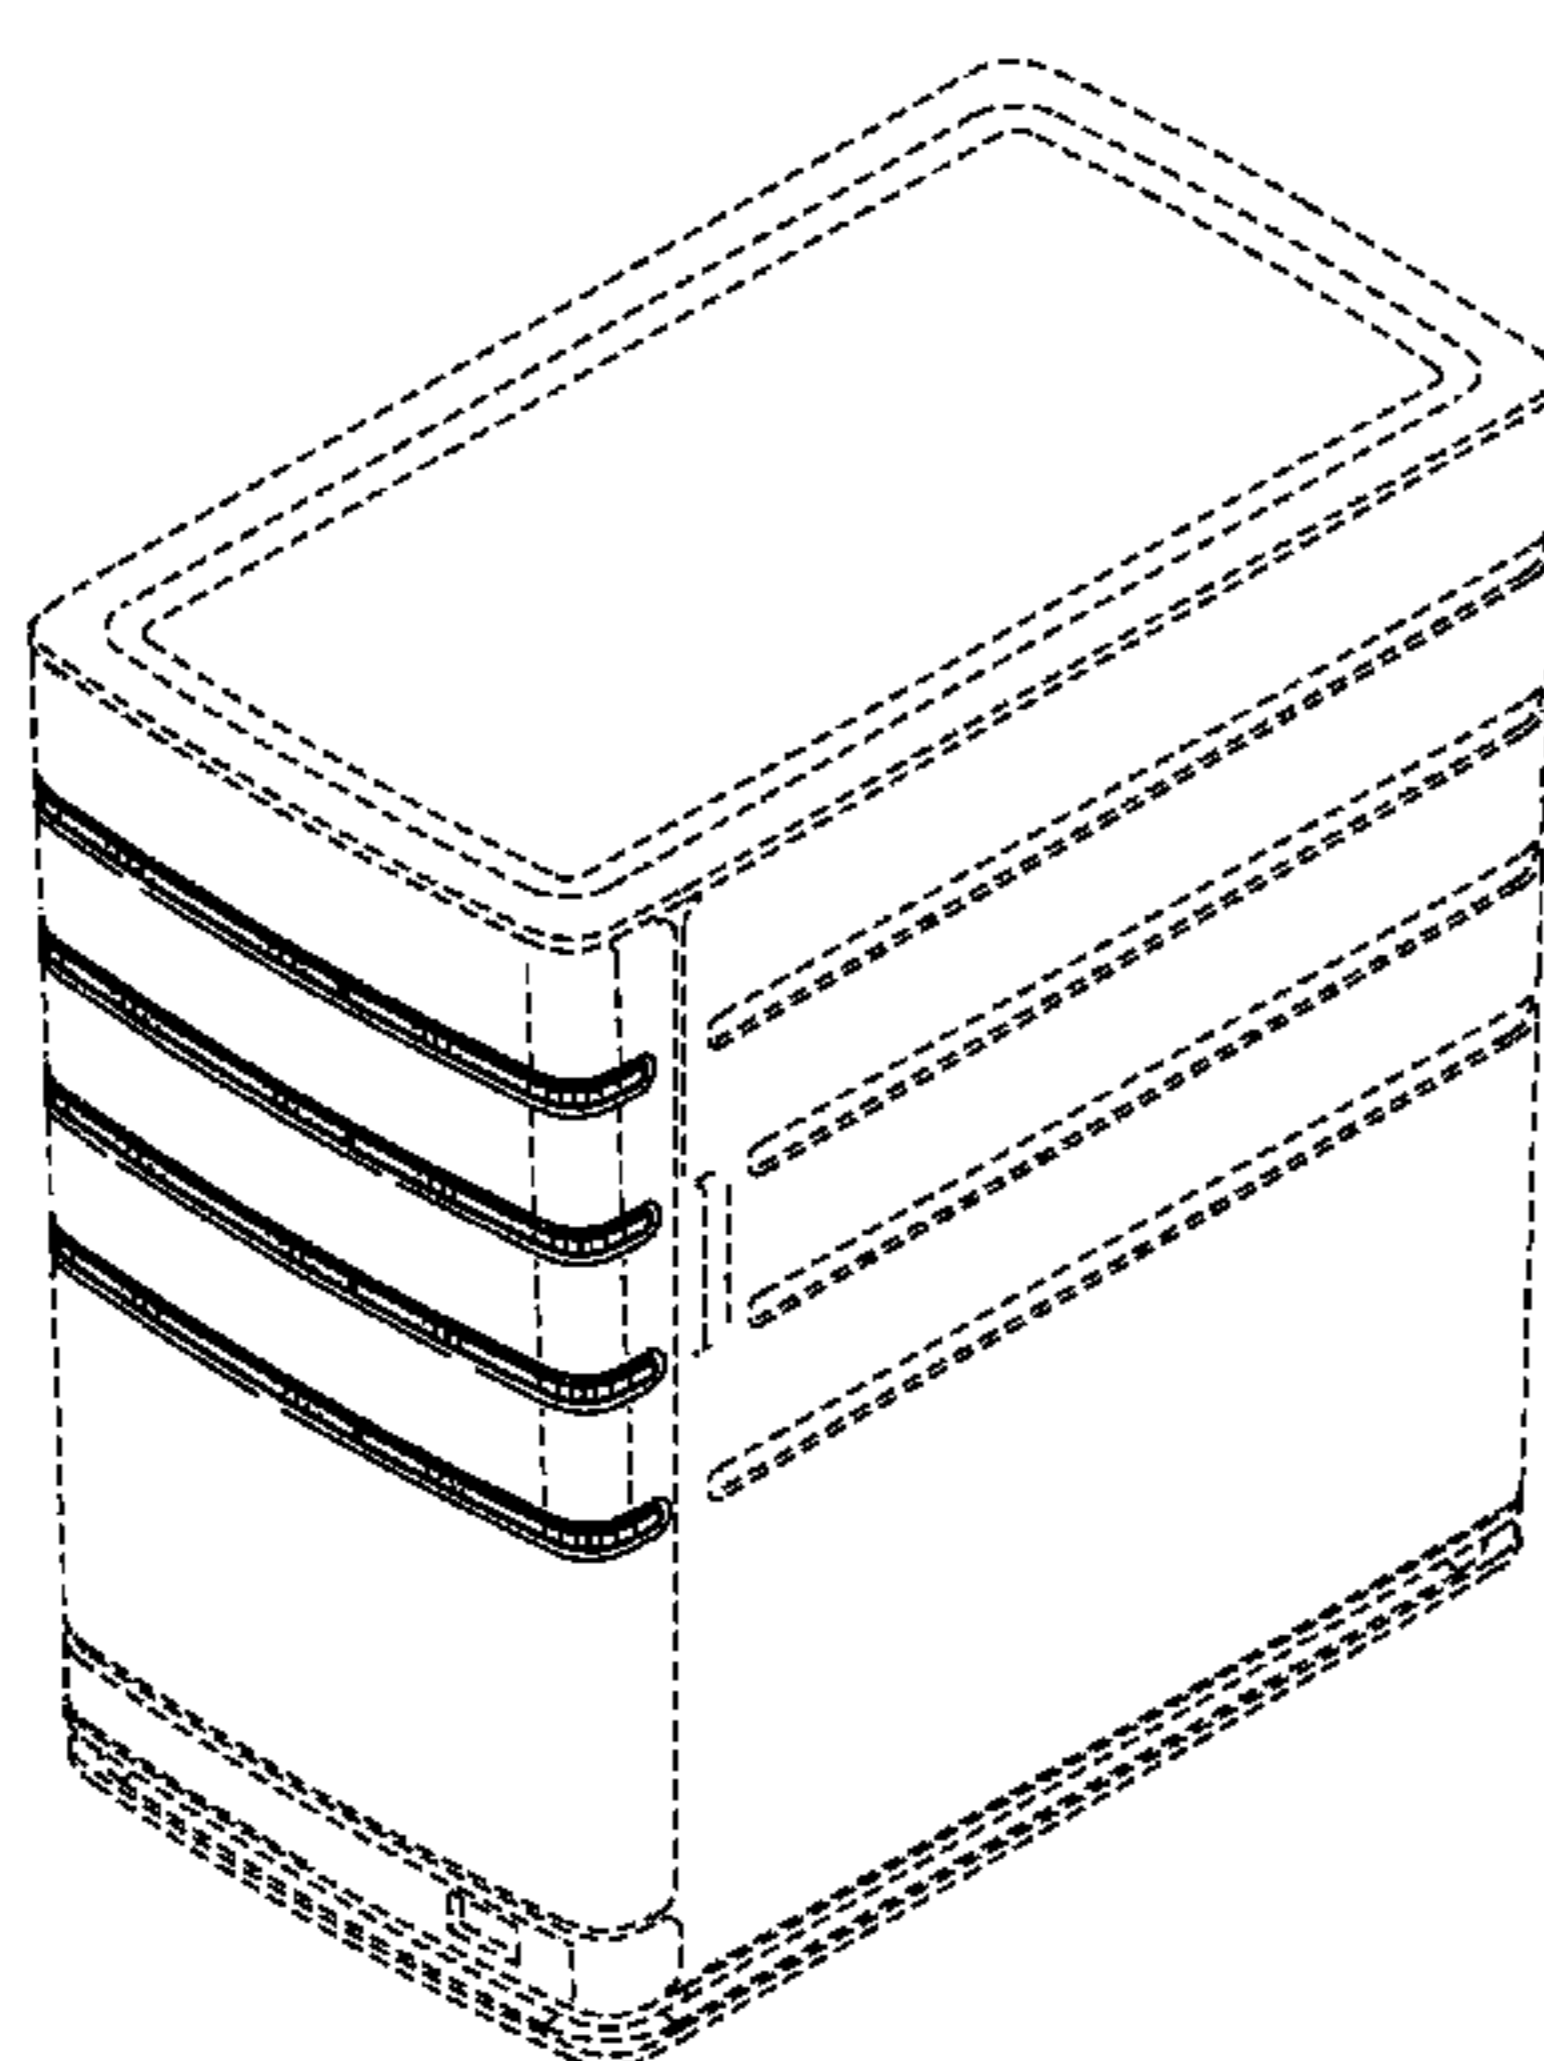

FIG. 2 is a rear perspective view of the computer having a door as illustrated in FIG. 1;

FIG. 3 is a front view of the computer having a door as illustrated in FIG. 1; and,

FIG. 4 is a right side elevational view of the computer having a door as illustrated in FIG. 1, wherein the left side is generally the same as the illustrated right side.

In these drawings, the solid lines illustrate the claimed ornamental design, whereas the broken lines illustrate environmental features that form no part of the claimed ornamental design.
