(57) **CLAIM**

The ornamental design for a storage device with slide, as shown and described.

DESCRIPTION

FIG. **1** is a front isometric view of the storage device with slide in an operational configuration;

FIG. **2** is a rear view of the storage device with slide in the operational configuration;

FIG. **3** is a top view of the storage device with slide in the operational configuration, the bottom being a mirror image thereof;

FIG. **4** is a front view of the storage device with slide in the operational configuration;

FIG. **5** is a left-side view of the storage device with slide in the operational configuration;

FIG. **6** is a right-side view of the storage device with slide in the operational configuration;

FIG. **7** is a front isometric view of the storage device with slide in a non-operational configuration;

FIG. **8** is a rear view of the storage device with slide in the non-operational configuration;

FIG. **9** is a top view of the storage device with slide in the non-operational configuration, the bottom being a mirror image thereof;

FIG. **10** is a front view of the storage device with slide in the non-operational configuration;

FIG. **11** is a left-side view of the storage device with slide in the non-operational configuration; and,

FIG. **12** is a right-side view of the storage device with slide in the non-operational configuration.

The broken-line showing of a Universal Serial Bus (USB) male connector in the various figures is for environmental purposes only and forms no part of the claimed design.
