(57) **CLAIM**

The ornamental design for a binder divider with flash drive storage compartments, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a binder divider with flash drive storage compartments showing my new design;

FIG. 2 is an elevational view of one side, the opposite side being a mirror image thereof;

FIG. 3 is a plan view of the top, the bottom being a mirror image thereof;

FIG. 4 is an elevational view of the front face thereof; and,

FIG. 5 is an elevation view of the back face thereof.

The cross hatch shading employed in the drawings is understood to represent fabric and is understood to repeat uniformly throughout the area on which it is applied. The uniformly spaced dashed lines are understood to represent stitching. The broken line depiction of a flash drive shown in FIG. 1 forms no part of the claimed design.

In an alternative embodiment, the perspective, side, top and bottom views are identical to FIGS. 1–4 described above and the back face thereof is a mirror image of FIG. 4.
