FIG. 1 is a front perspective view of the product package having a ribbon in place holding the product package in the closed position, and having a front label insert showing through the translucent material which makes up the product package;

FIG. 2 is a rear perspective view of the product package having a ribbon in place holding the product package in the closed position, and having a rear label insert showing through the translucent material which makes up the product package;

FIG. 3 is a front elevational view of the product package;

FIG. 4 is a top plan view of the product package showing the product package in the fully open position;

FIG. 5 is a bottom view of the product package showing the product package in the fully open position;

FIG. 6 is a side elevational view of the product package showing the product package in the fully open position;

FIG. 7 is a top plan view of the product package showing the product package in the partially open position;

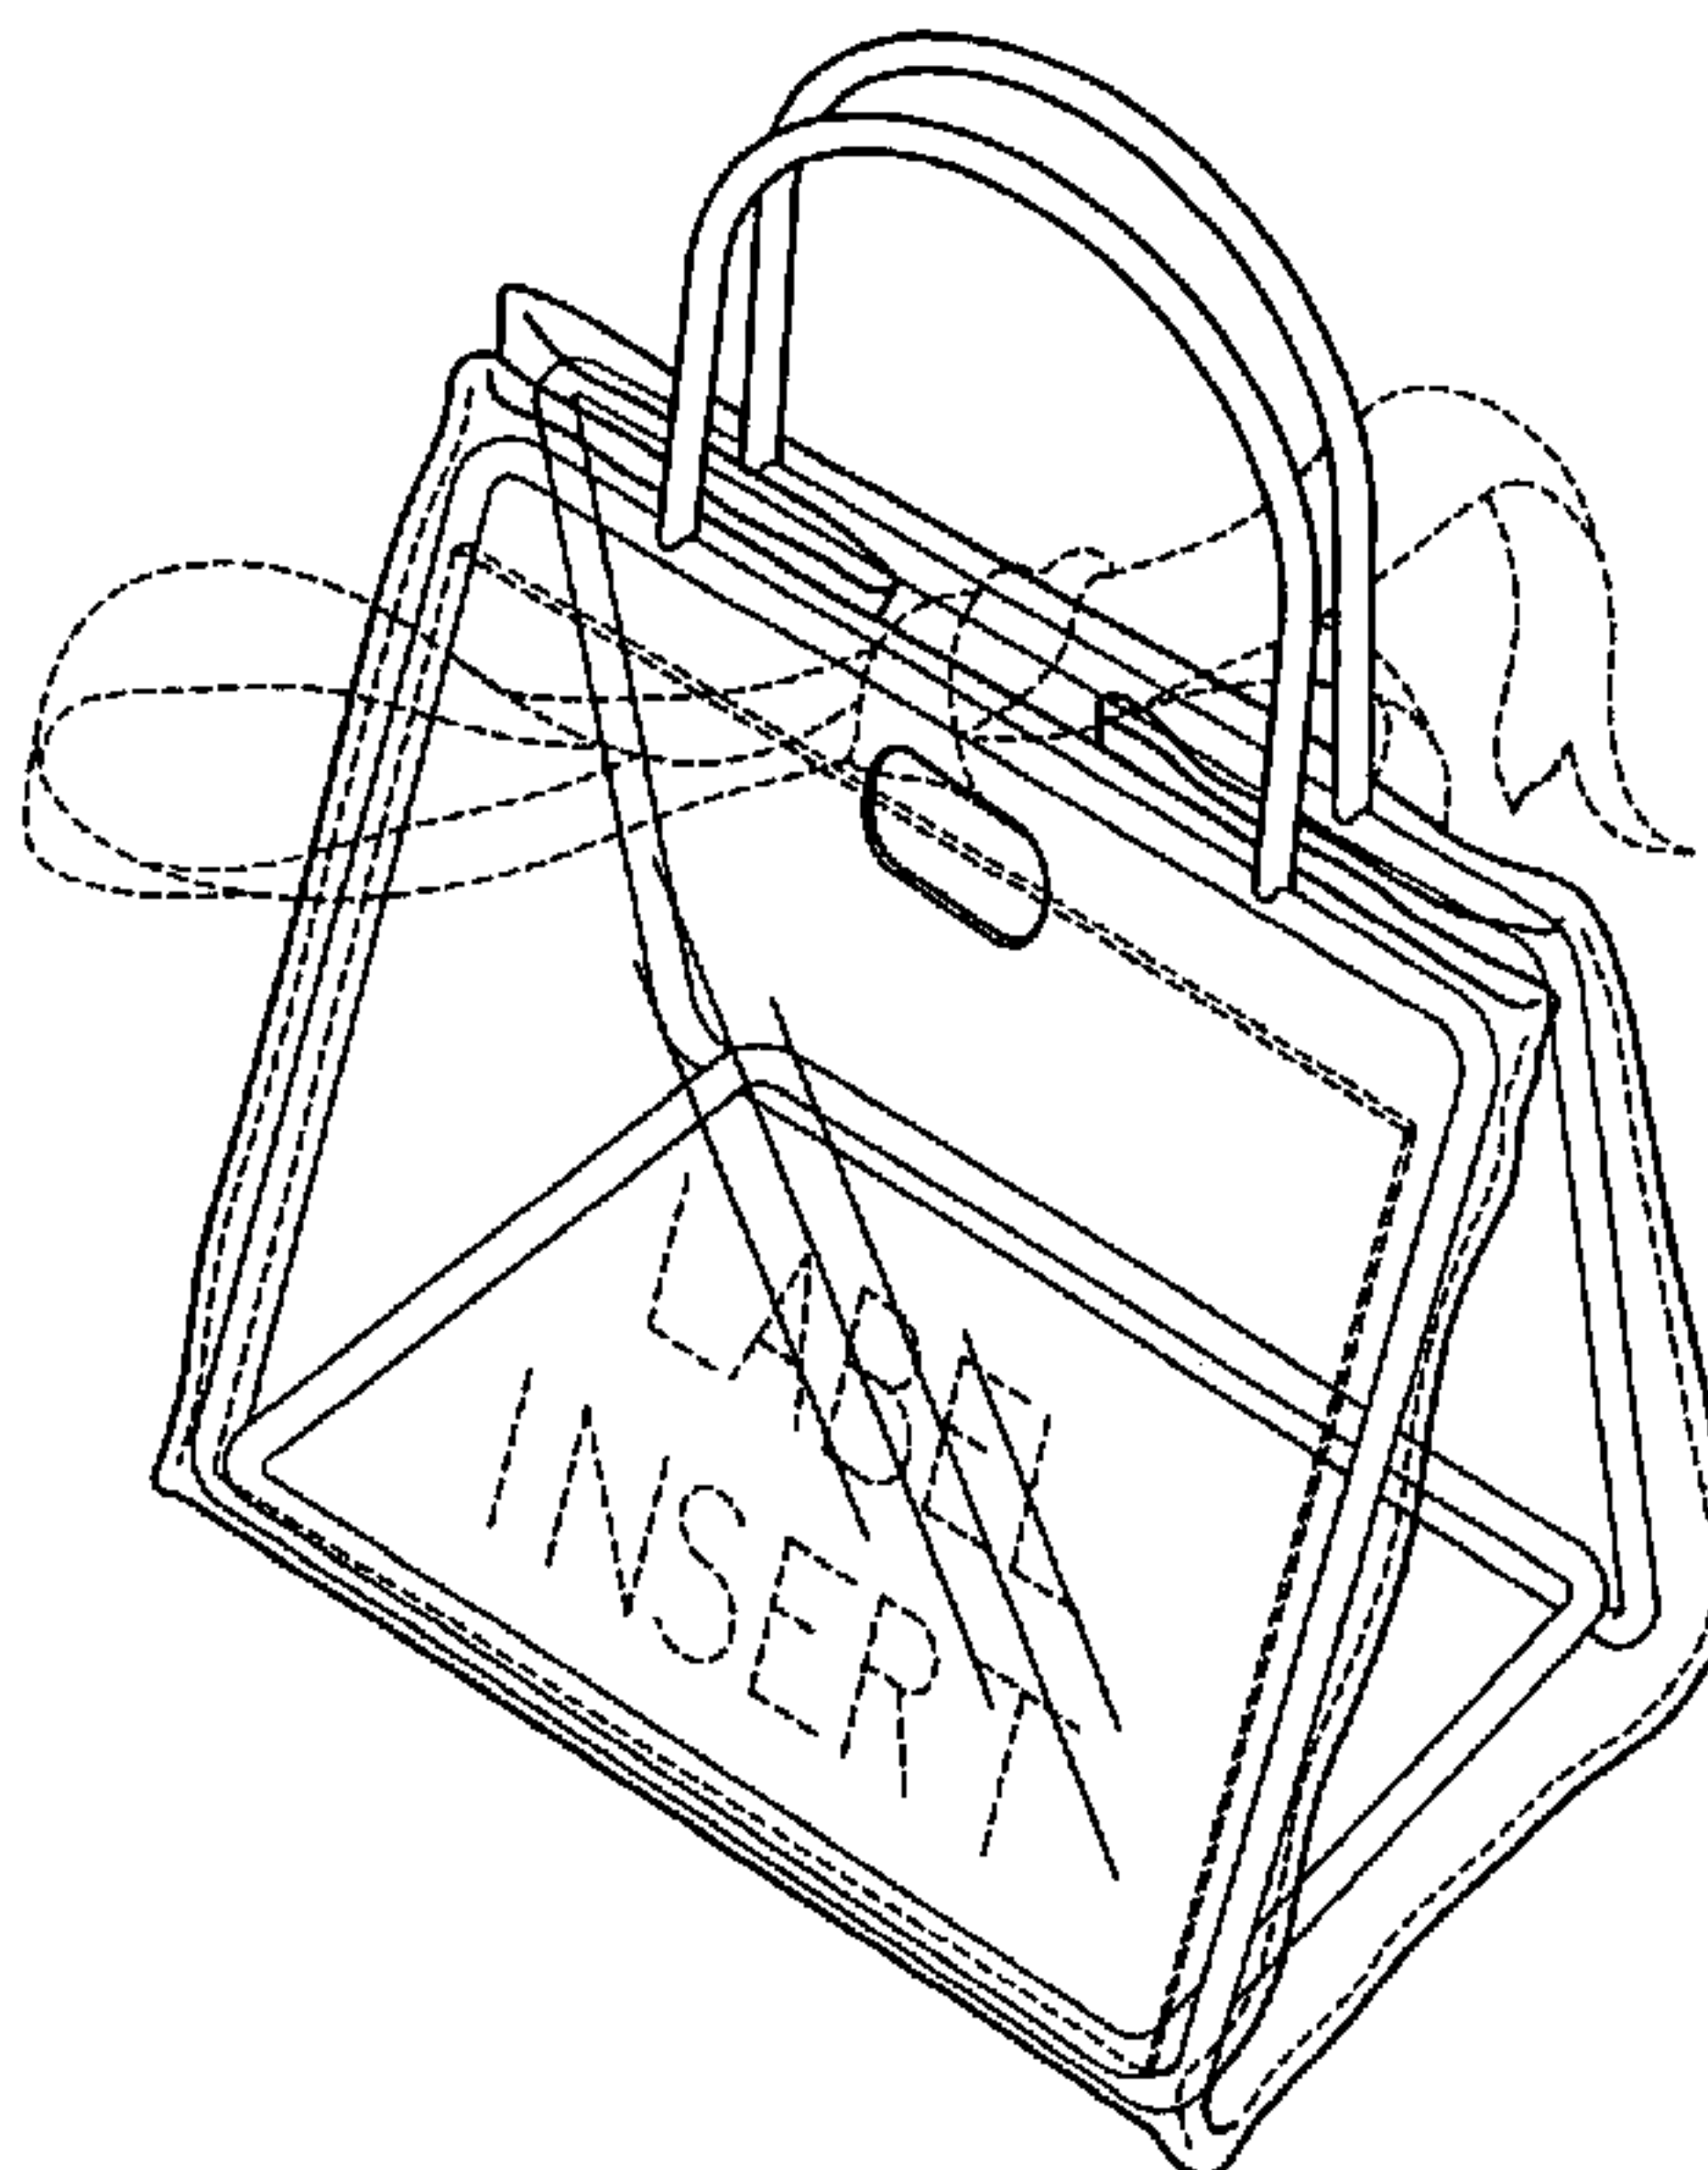

FIG. 8 is a side elevational view of the product package showing the product package in the partially open position;

FIG. 9 is a top plan view of the product package showing the product package in the fully closed position; and,

FIG. 10 is a side elevational view of the product package showing the product package in the fully closed position.

The broken lines shown in FIGS. 1 and 2 of the drawings, are for illustrative purposes only and form no part of the claimed design.
