(57) **CLAIM**

The ornamental design for a vehicle hood, as shown and  
described.

**DESCRIPTION**

FIG. 1 is left side perspective view of a vehicle hood;  
FIG. 2 is right side perspective view of the vehicle hood;  
FIG. 3 is a front elevational view of the vehicle hood;  
FIG. 4 is a left side elevational view of the vehicle hood;  
FIG. 5 is a right side elevational view of the vehicle hood;  
FIG. 6 is a top plan view of the vehicle hood;  
FIG. 7 is a bottom plan view of the vehicle hood; and,  
FIG. 8 is a rear elevational view of the vehicle hood.

The vehicle hood is styled independently of adjacent vehicle  
panels. To the extent that any feature lines are illustrated, they  
are intended to illustrate the crest and valley of the feature and  
are not necessarily sharp bends in the part. Shading is used to  
illustrate the curvature of the part and not color. Areas shown  
in or sounded by broken lines are not claimed. Any functional  
features of the vehicle hood are not claimed. Views are  
orthogonal projections unless otherwise noted. The various  
views are not necessarily to scale in order to better illustrate  
the design. The vehicle hood is normally attached to a struc-  
tural support frame. The frame is not illustrated nor a part of  
this invention.
