FIG. 5 is a perspective view of a second embodiment of a tire for motorcycle showing my new design, it being understood that the pattern repeats uniformly throughout the circumference of the tread and that the opposite side perspective view is a mirror image thereof; and,

FIG. 6 is a front elevational view of a second embodiment, it being understood that an enlarged fragmentary view thereof would be substantially identical to that shown in FIG. 4, with the exception of the inclusion of the sidewall in solid lines.

In the drawings, the broken line showing of the sidewall, inner bead and the peripheral boundary between the tire tread and the sidewall in FIGS. 1 through 4 depict environmental subject matter and form no part of the claimed design.
