(57) **CLAIM**

The ornamental design for a computer network events and alerts interface for a computer screen, as shown and described.

**DESCRIPTION**

The claimed interface provides a view of the conditions that are specific to all individual devices connected to the computer network, such as servers, applications, routers, for example. The claimed interface also provides status, availability, capacity and capability to perform designated functions, along with indicating the current level of system and device performance, in addition to indicating the actions that are being undertaken.

The single FIGURE is a front view of a computer network events and alerts interface for a computer screen. The perimeters of the portion of the underlying computer screen and the computer network events & alerts interface are understood to be flush.

**1 Claim, 1 Drawing Sheet**
