(57) **CLAIM**

The ornamental design for a support structure for tracking solar collectors, as shown and described.

DESCRIPTION

The support structure for tracking solar collectors is used to support solar collectors to obtain energy from solar radiation.

FIG. 1 is a front, top, right side isometric view of a support structure for tracking solar collectors with the outline of solar collectors and base supports shown in broken lines;

FIG. 2 is a top plan view thereof;

FIG. 3 is a right side elevational view thereof, the left side elevational view being a mirror image;

FIG. 4 is a front elevational view thereof; and,

FIG. 5 is a rear elevational view thereof.

The broken lines in the drawings show environmental structure that forms no part of the claimed design.
