(57) **CLAIM**

The ornamental design for a lighted beverage pourer, as
shown and described.

DESCRIPTION

The lighted beverage pourer is designed to fit into the narrow
opening of a beverage bottle. When the pourer is used, the
light is turned on by the push of a button. The light is directed
towards the opening of the pourer so that the person serving
the beverage can see how much fluid is being poured. After
pouring, the light may be turned off by pushing the same
button.

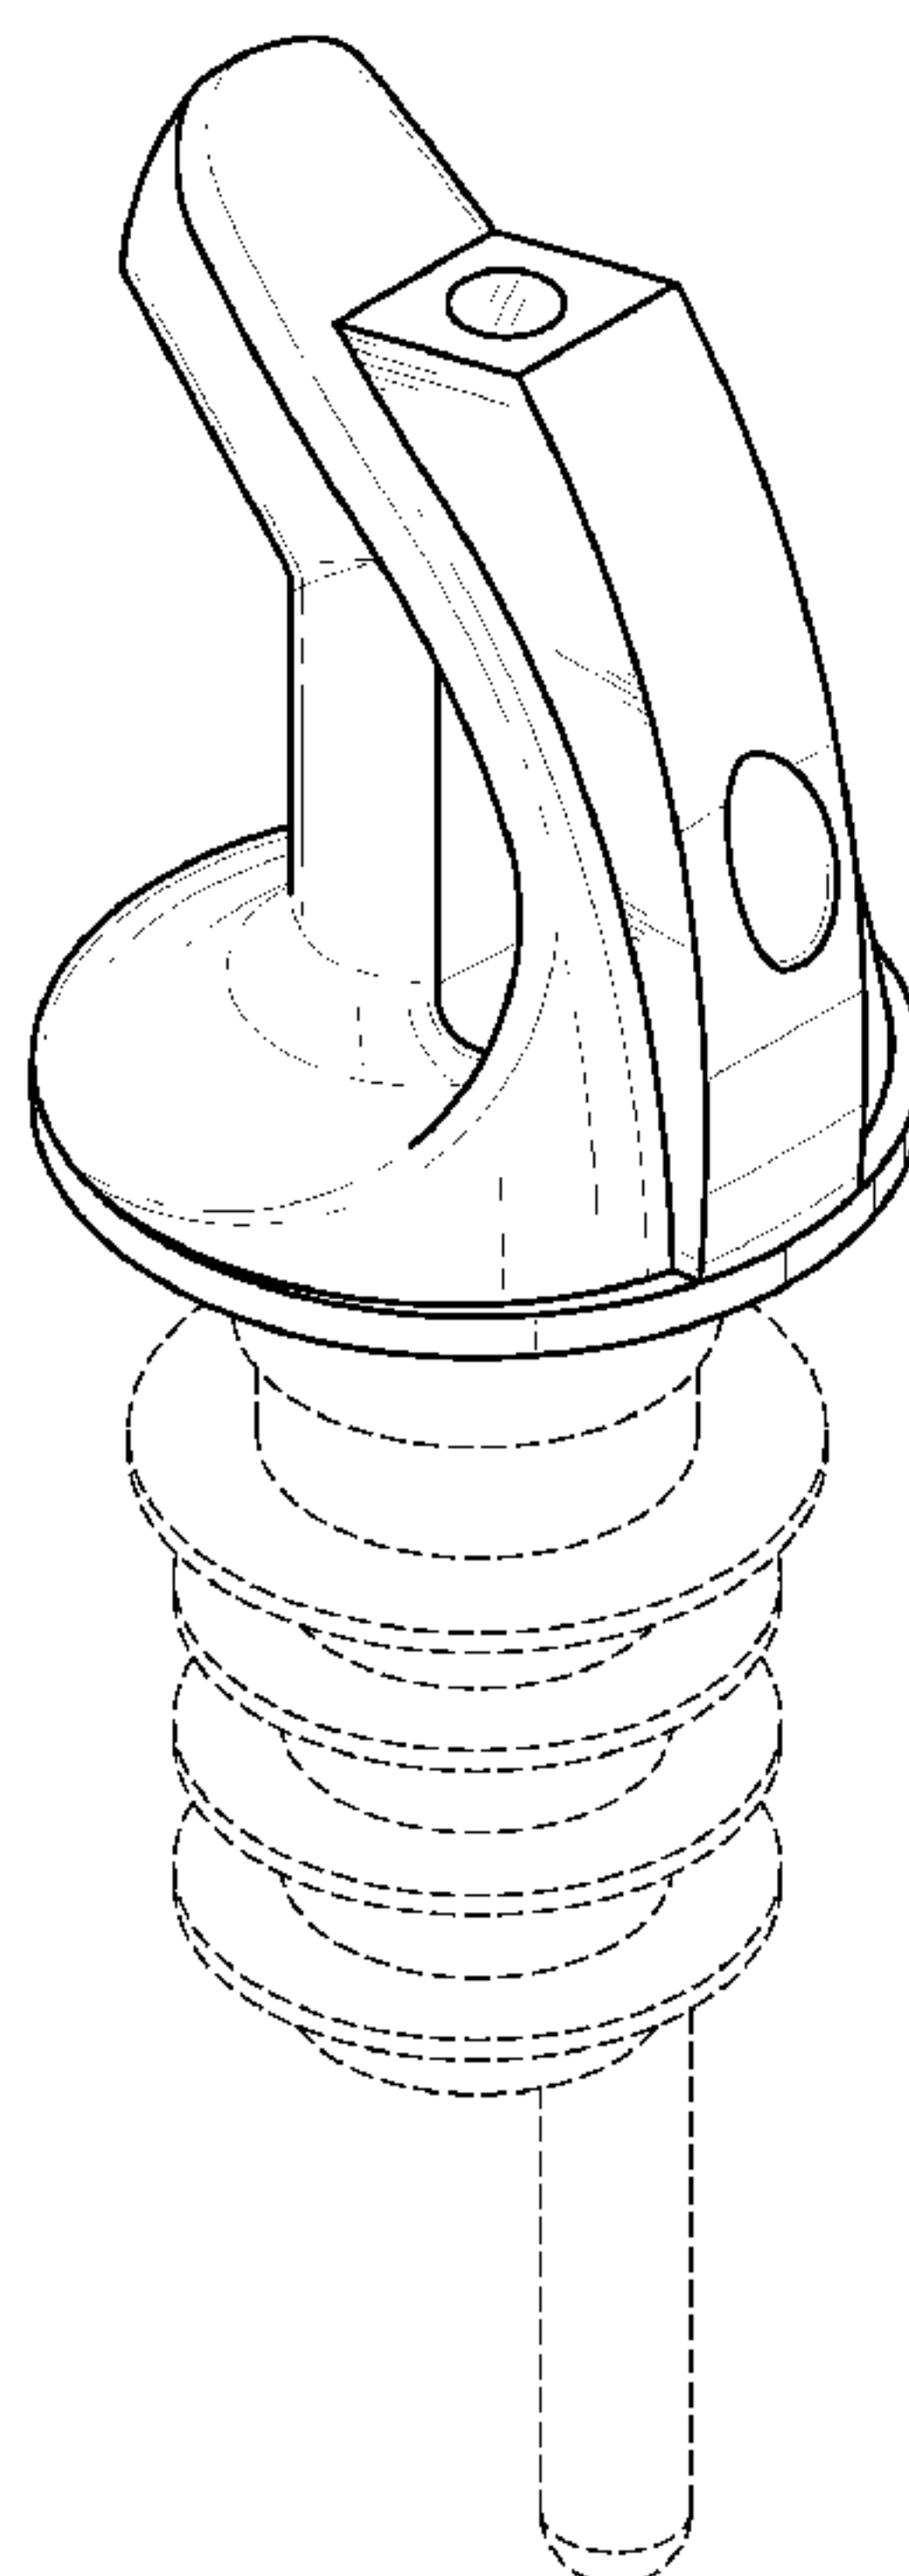

FIG. 1 is an illustration of a side view of the lighted beverage
pourer.

FIG. 2 is an illustration of a back view of the lighted beverage
pourer; and,

FIG. 3 is a perspective view of the lighted beverage pourer.

The broken lines in FIGS. 1–3 show the bottom part of a
beverage pourer, which actually fits into a beverage bottle.
This broken lined bottom part is not part of the claimed
ornamental design of the lighted beverage pourer.
