(57) **CLAIM**

The ornamental design of a portable carpentry workshop with sliding supports for a table saw and a miter saw, as shown and described.

DESCRIPTION

FIG. 1 is an all-closed top right isometric view of the carpentry workshop of the invention from its front;

FIG. 2 is an all-closed top left isometric view of the carpentry workshop of the invention from its front;

FIG. 3 is an all-closed rear isometric view of the carpentry workshop of the invention, encircled detail showing the pull pin is shown on FIG. 17;

FIG. 4 is an all-closed left side view of the carpentry workshop of the invention;

FIG. 5 is an all-closed front view of the carpentry workshop of the invention;

FIG. 6 is a top left isometric view of the carpentry workshop of the invention without the table saw;

FIG. 7 is an all-open top right isometric view of the carpentry workshop of the invention from its front;

FIG. 8 is an all-open rear isometric view of the carpentry workshop of the invention;

FIG. 9 is an all-open front view of the carpentry workshop of the invention;

FIG. 10 is an all-open right side view of the carpentry workshop of the invention;

FIG. 11 is a top right isometric view of the carpentry workshop of the invention showing the table saw in its centered position;

FIG. 12 is the side view of the same;

FIG. 13 is a top right isometric view of the carpentry workshop with the table saw shifted to the right;

FIG. 14 is the side view of the same;

FIG. 15 is a top right isometric view of the carpentry workshop with the table saw shifted to the left; and

FIG. 16 is the side view of the same; and,

FIG. 17 shows an enlargement of the encircled detail on FIG. 3 illustrating the pull pin.

The broken lines shown in the drawings are for illustrative purposes only and form no part of the claimed design.
