(57) **CLAIM**

The ornamental design for a vehicle lower bumper cover,  
shown and described.

**DESCRIPTION**

FIG. 1 is a front elevational view of a vehicle lower bumper  
cover;

FIG. 2 is a side elevational view of the vehicle lower bumper  
cover (both left and right side views being mirror images);

FIG. 3 is a top plan view of the vehicle lower bumper cover;

FIG. 4 is a bottom plan view of the vehicle lower bumper  
cover; and,

FIG. 5 is a rear elevational view of the vehicle lower bumper  
cover.

The vehicle lower bumper cover is styled independently of  
adjacent vehicle panels. To the extent that any feature lines are  
illustrated, they are intended to illustrate the crest and valley  
of the feature and are not necessarily sharp bends in the part.  
Shading is used to illustrate the curvature of the part and not  
color. Any functional features of the vehicle lower bumper  
cover are not claimed. Views are orthogonal projections rendered  
from computer aided design data. The various views are  
not necessarily to scale in order to better illustrate the design.
