DESCRIPTION

See application file for complete search history.

The telephone memory stick may be used for transferring information between a mobile phone and another device and/or storing information. In other words, the telephone memory stick may be used for downloading and uploading multiple type of information from a mobile phone, storing the information downloaded, downloading and uploading information from a computer.

FIG. 3 is a right side elevational view of FIG. 1, the left side elevational view is a mirror image of the right side.

Two types of broken lines appear in the figures. The broken lines immediately adjacent the shaded areas represent the bounds of the claimed design while all other broken lines are directed to environment and are for illustrative purposes only; the broken lines form no part of the claimed design. With the exception the left side elevational view, which was described in the above figure descriptions, the sides that are not shown are not claimed.
