(57) **CLAIM**

The ornamental design for an LED light fixture, as shown and described.

FIG. 1 is a perspective view, as seen from above, of a first embodiment of the LED light fixture;

FIG. 2 is an elevational view of one end of the LED light fixture of FIG. 1, enlarged relative to the view shown in FIG. 1, an opposing end of the LED light fixture being identical;

FIG. 3 is an elevational view of one side of the LED light fixture of FIG. 1, enlarged relative to the view shown in FIG. 1, an opposing side of the LED light fixture being a mirror image thereof;

FIG. 4 is a top plan view of the LED light fixture of FIG. 1, enlarged relative to the view shown in FIG. 1;

FIG. 5 is a bottom plan view of the LED light fixture of FIG. 1, enlarged relative to the view shown in FIG. 1;

FIG. 6 is a perspective view, as seen from below, of the LED light fixture of FIG. 1;

FIG. 7 is a perspective view, as seen from above, of a second embodiment of the LED light fixture;

FIG. 8 is an elevational view of one end of the LED light fixture of FIG. 7, enlarged relative to the view shown in FIG. 7, an opposing end of the LED light fixture being identical;

FIG. 9 is an elevational view of one side of the LED light fixture of FIG. 7, enlarged relative to the view shown in FIG. 7, an opposing side of the LED light fixture being a mirror image thereof;

FIG. 10 is a top plan view of the LED light fixture of FIG. 7, enlarged relative to the view shown in FIG. 7; and,

FIG. 11 is a bottom plan view of the LED light fixture of FIG. 7, enlarged relative to the view shown in FIG. 7.

In FIGS. 1, 3, 4, 5, 6, 7, 9, 10 and 11, the breaks and accompanying bracket indicate that the fixture has no specific length, and dashed lines indicate environmental structure that forms no part of the claimed design. A perspective view of the LED light fixture of FIG. 7, as seen from below, is identical to FIG. 6 (e.g., the perspective view as seen from below of the LED light fixture of FIG. 1).
