The ornamental design for a soccer ball shaped beverage container, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a soccer ball shaped beverage container of the new design, in which the lid is shown in the closed position, the handle is shown in an upright orientation, and the lid removal tab (top) is shown in the extended position; and,

FIG. 2 is a side view of the soccer ball shaped beverage container of the new design, in which the lid is shown in the open position (it is separated from the main body of the container), the handle is shown in an angled orientation, and the lid removal tab is in the closed position and is thus not shown (as it is not visible from the side of the container when in the closed position).
