(57) **CLAIM**

The ornamental design for a tire tread, as shown and
described.

DESCRIPTION

FIG. 1 is a perspective view of a tire tread showing our new
design, it being understood that the tread pattern repeats
circumferentially throughout the outer circumference and
shoulder of a tire;

FIG. 2 is a front elevation view thereof; and,

FIG. 3 is a right side elevation view thereof.

In the drawings, the dark stippled surface shading represents
the recessed groove portions of the tire tread having a depth as
best illustrated along the top and bottom edges of FIG. 2. In
the drawings, the broken lines defining the sidewall and inner
bead depict environmental subject matter that forms no part
of the claimed design.
