(57) **CLAIM**

The ornamental design for an exhaust system panel unit, as shown and described.

DESCRIPTION

FIG. 1 is a top view of the exhaust system panel unit of the present invention;

FIG. 2 is the right view of the exhaust system panel unit of the present invention;

FIG. 3 is a front view of the exhaust system panel unit of the present invention;

FIG. 4 is a perspective view of the exhaust system panel unit of the present invention;

FIG. 5 is another perspective view of the exhaust system panel unit of the present invention;

FIG. 6 is the top view of the rear panel member of the exhaust system panel unit of the present invention shown separately for clarity of illustration;

FIG. 7 is the front view of the rear panel member of the exhaust system panel unit of the present invention shown separately for clarity of illustration;

FIG. 8 is the back view of the rear panel member of the exhaust system panel unit of the present invention shown separately for clarity of illustration of the exhaust system of the present invention;

FIG. 9 is a perspective view of the rear panel member of the exhaust system panel unit of the present invention shown separately for clarity of illustration of the exhaust system of the present invention;

FIG. 10 is a top view of the front panel member of the exhaust system panel unit of the present invention shown separately for clarity of illustration of the exhaust system of the present invention;

FIG. 11 is the left view of the front panel member of the exhaust system panel unit of the present invention shown separately for clarity of illustration of the exhaust system of the present invention;

FIG. 12 is a front view of the front panel member of the exhaust system panel unit of the present invention shown separately for clarity of illustration of the exhaust system of the present invention; and,

FIG. 13 is a perspective view of the front panel member of the exhaust system panel unit of the present invention shown separately for clarity of illustration of the exhaust system of the present invention.
