(57) **CLAIM**

The ornamental design for a computer screen with a graphical user interface including an icon for map navigation, as shown and described.

DESCRIPTION

FIG. 1 is front view of a computer screen with a graphical user interface including an icon for map navigation showing the first sequential image of our new design;

FIG. 2 is front view thereof showing a second image;

FIG. 3 is a front view thereof showing a third image; and,

FIG. 4 is a front view thereof showing a fourth image.

The ornamental design for a computer screen with a graphical user interface including an icon for map navigation, as shown and described, sequentially transitions between the images shown in FIGS. 1–4. However, no ornamental aspects are associated with the process or period in which one image transitions to another image. Further, in FIGS. 1–4, the perimeters of the portion of the underlying portion of a computer screen and the outer rectangular border of the image are understood to be flush.

The portions of the graphical user interface shown in broken line forms no part of the claimed design.
