(57) CLAIM

I claim the ornamental design for a carry-on bag with easy access opening to interior, as shown and described.

DESCRIPTION

FIG. 1 is a front, right side perspective view of the carry-on bag according to the present invention with its access panel in the closed position;

FIG. 2 is a front, right side perspective view of the carry-on bag according to the present invention with its access panel in the open position, a baggage inspector's arm reaching into the interior, being shown in dashed lines for illustrated purposes only and forming no part of the claimed design;

FIG. 3 is a top perspective view of the carry-on bag with the access panel in the open position;

FIGS. 4 and 5 are front views of the carry-on bag with its access panel in the closed and open positions, respectively;

FIGS. 6 and 7 are right side views of the carry-on bag with its access panel in the closed and open positions, respectively;

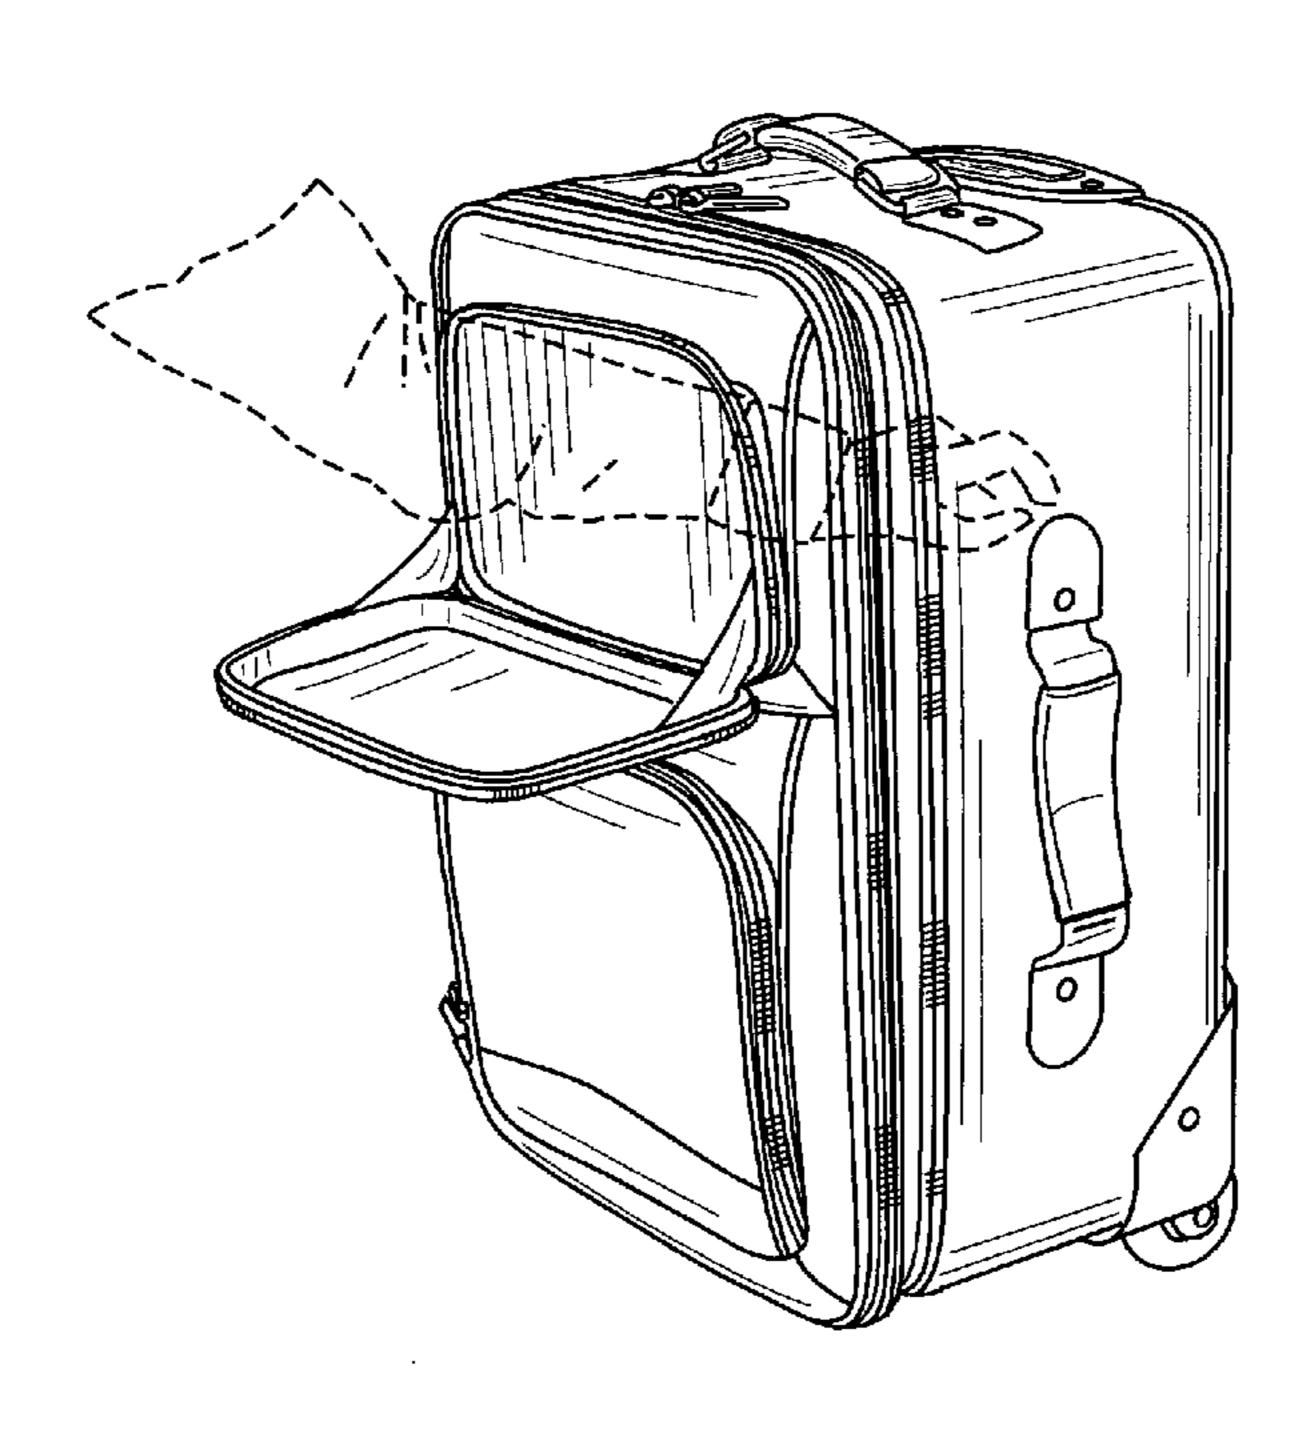

FIGS. 8 and 9 are left side views of the carry-on bag with its access panel in the closed and open positions, respectively;

FIG. 10 is a back view of the carry-on bag;

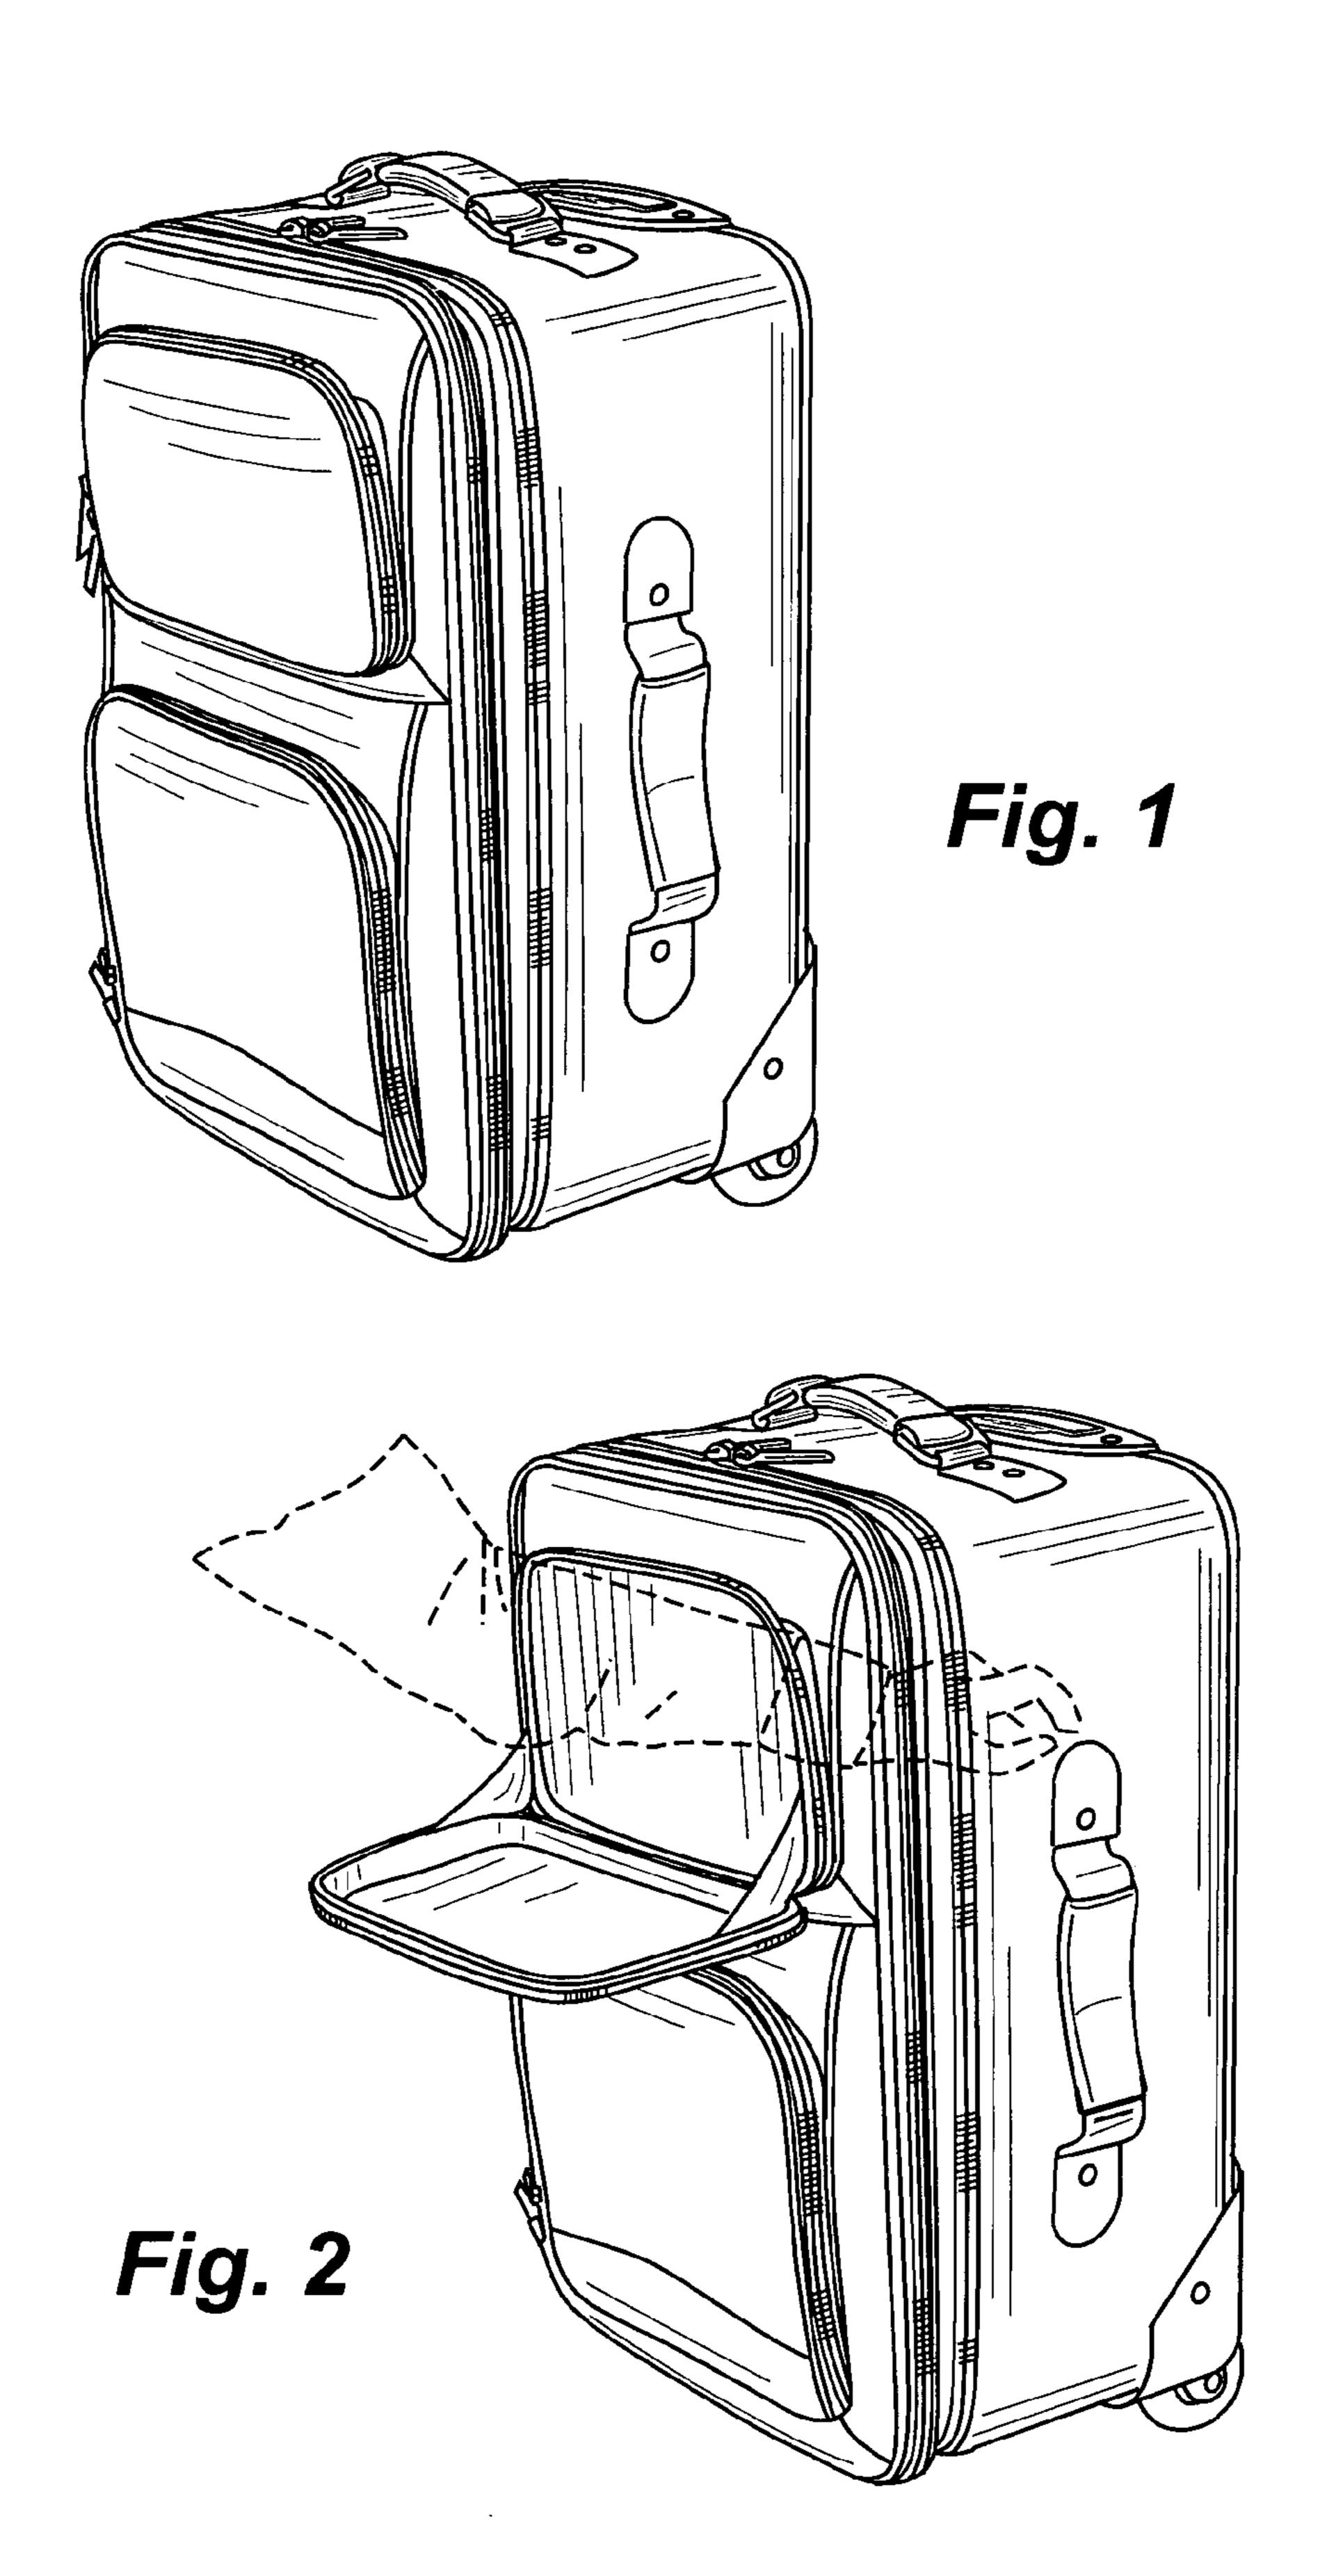

FIG. 11 is a bottom perspective view of the carry-on bag with the access panel closed; and,

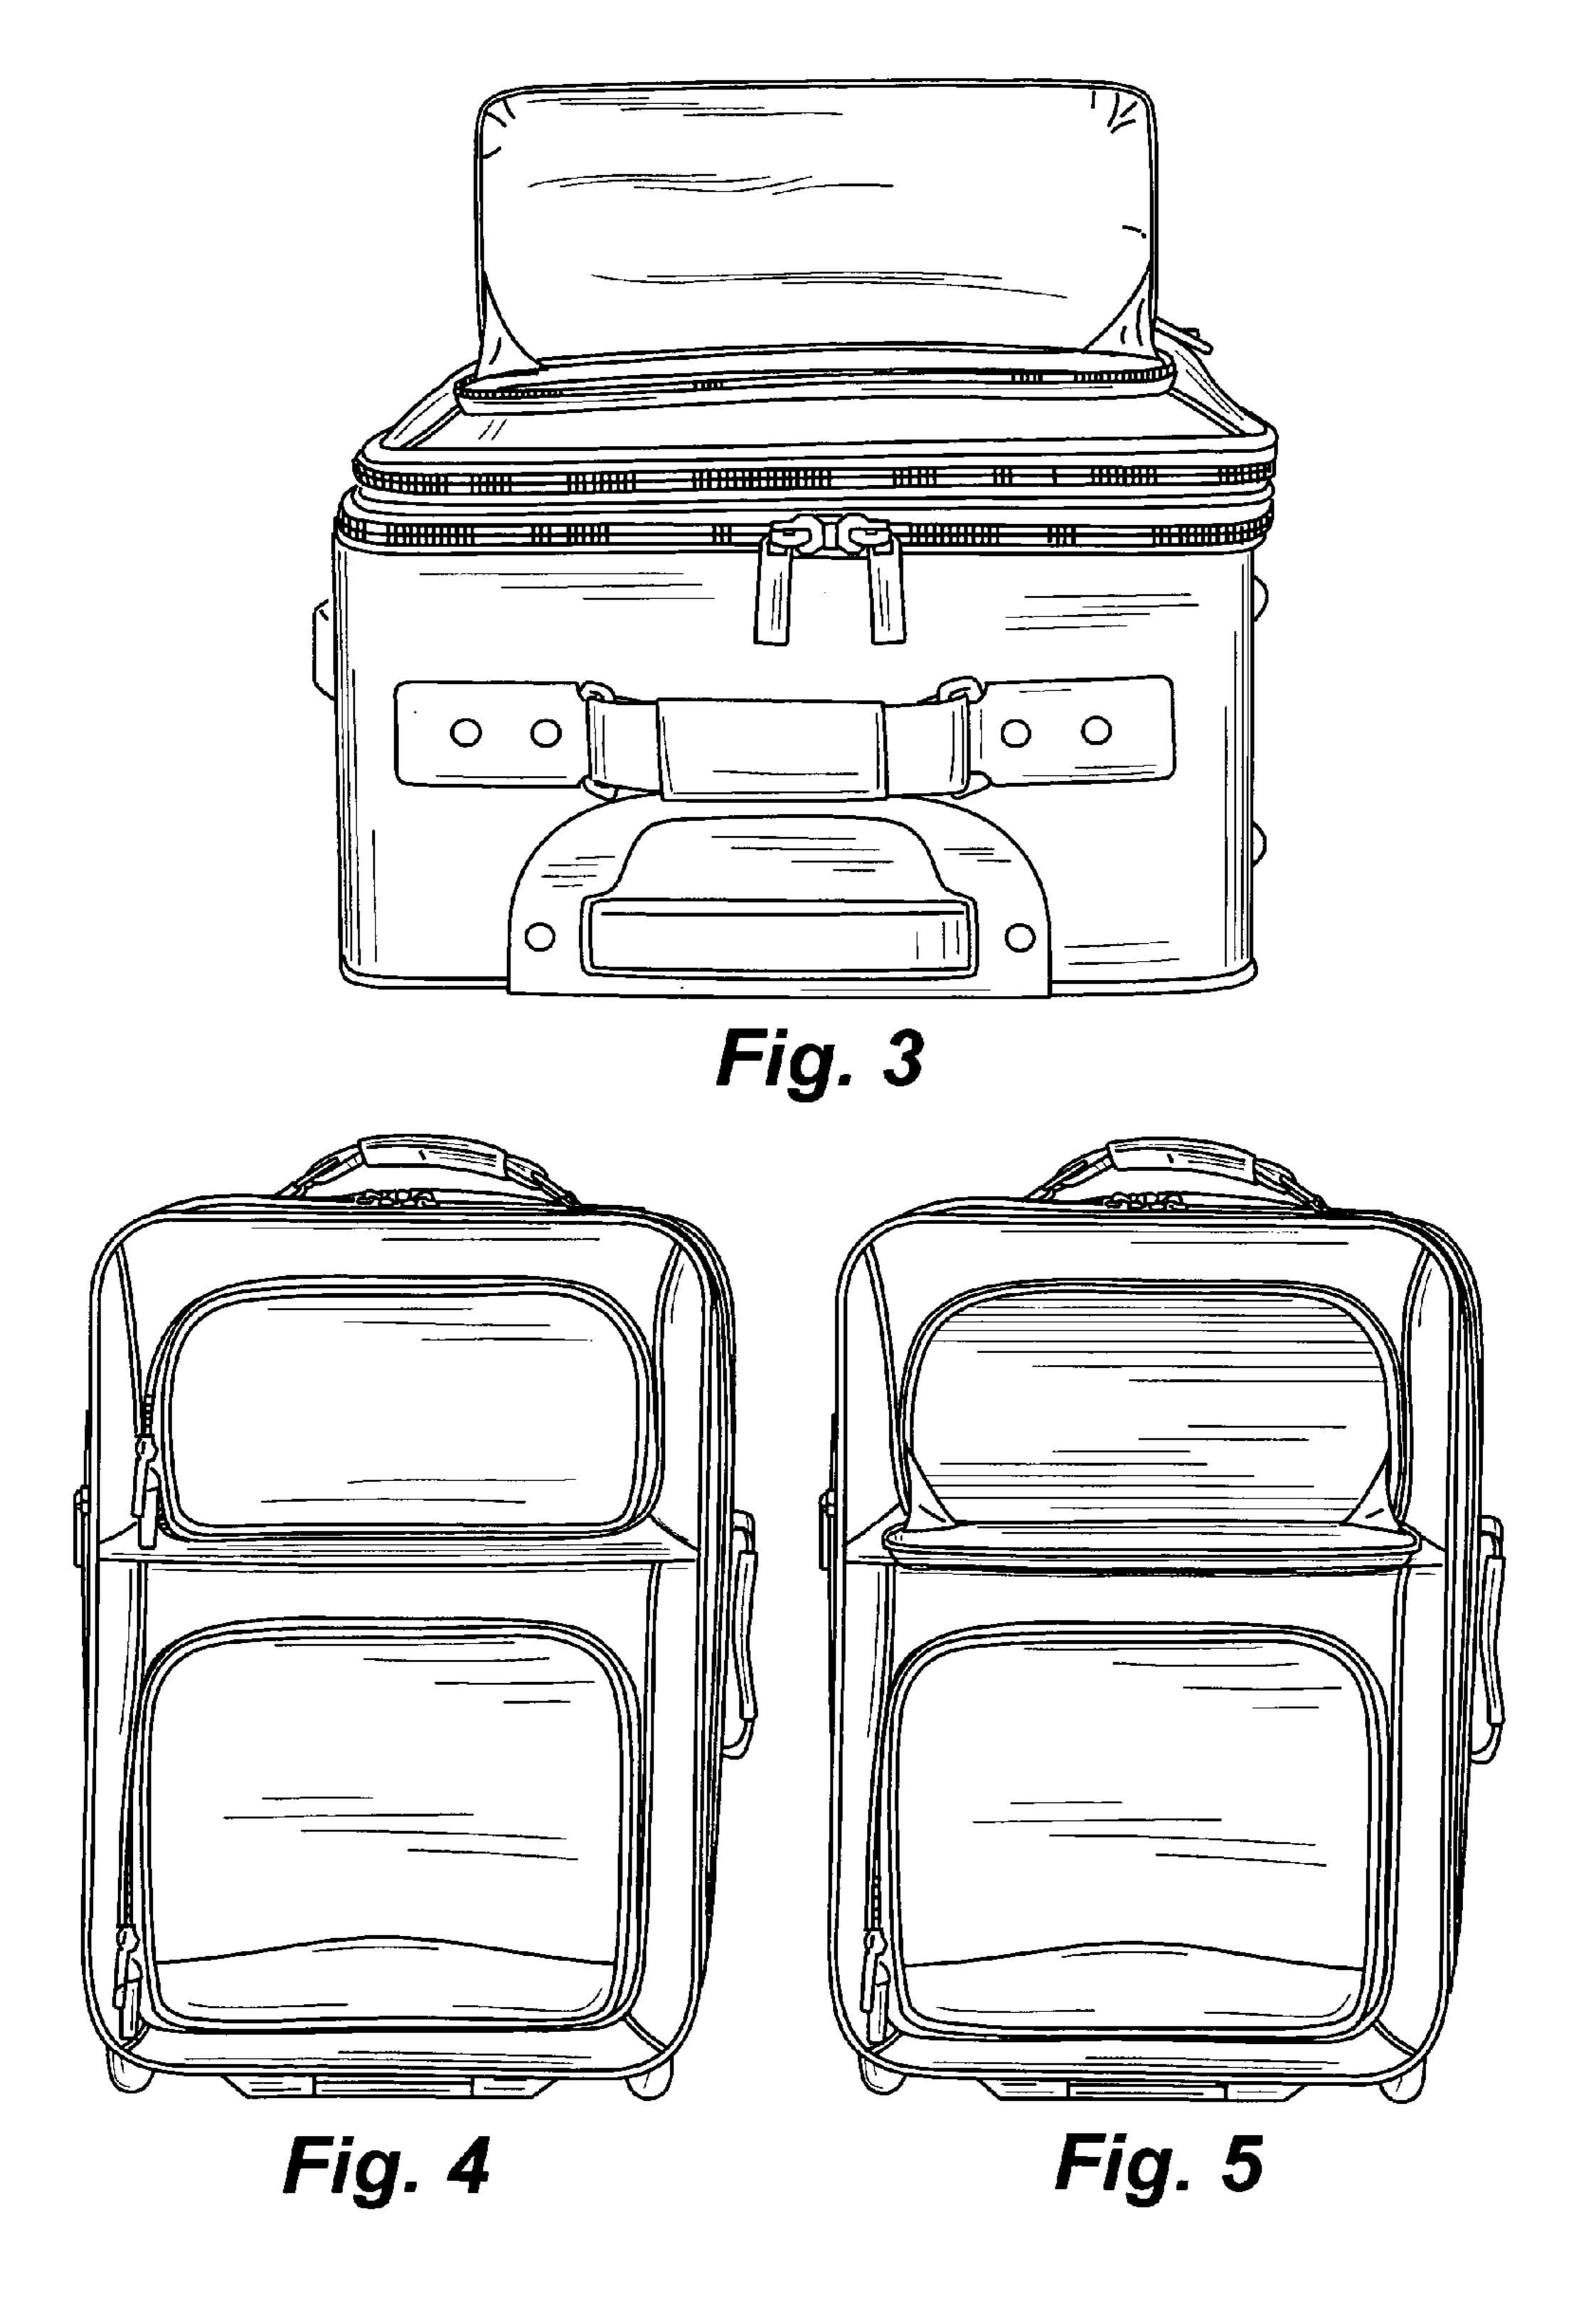

FIG. 12 is a back perspective view of the carry-on bag with its handle for rolling extended.
