(57) **CLAIM**

The ornamental design for an apparatus support device holder, as shown and described.

DESCRIPTION

The apparatus support device holder is used for supporting an apparatus support device specifically adapted to cradling a particular apparatus such as a wireless phone, GPS, a PDA device, a telephone or other equipment in a convenient position on a smooth surface such as a windshield of a motor vehicle.

FIG. 1 is a perspective left side front view of an apparatus support device holder,

FIG. 2 is a perspective right side front view of the apparatus support device holder shown in FIG. 1,

FIG. 3 is a left side view of the apparatus support device holder shown in FIG. 1,

FIG. 4 is a right side view of the apparatus support device holder shown in FIG. 1,

FIG. 5 is an end view of the apparatus support device holder shown in FIG. 1,

FIG. 6 is an another end view of the apparatus support device holder shown in FIG. 1; and,

FIG. 7 is a bottom view of the apparatus support device holder as shown in FIG. 4.
