See application file for complete search history.

DESCRIPTION

FIG. 1 is a front, left perspective view of a visor with a removable hairpiece of the claimed design;

FIG. 2 is a top plan view thereof;

FIG. 3 is a bottom plan view thereof, including a broken-line boundary illustrating the bounds of the claimed design, and which forms no part thereof;

FIG. 4 is a right side elevational view thereof;

FIG. 5 is a front view thereof;

FIG. 6 is a rear view thereof;

FIG. 7 is a folded front view thereof;

FIG. 8 is a top view of the claimed design, with the removable hairpiece not shown for ease of illustration; and,

FIG. 9 is a front perspective view of the removable hairpiece, with the visor/headband portion not shown for ease of illustration.

The broken lines shown on the inner and outer surfaces of the headband and the visor in the drawings illustrate stitching, which is part of the claimed invention. The stippling in FIGS. 6, 8 and 9 represents hook-and-loop fasteners. Also, while some hairs in the removable hair-piece are drawn single-lined while other hairs are drawn double-lined, it is understood that the different line types are intended to show the same densely clustered, synthetic randomly-oriented cone-shaped hairs with fine tips, being provided as such merely for the convenience of illustration.
