The ornamental design for the headrest for surgery, as shown in the accompanying figures.

**DESCRIPTION**

FIG. 1 is a right side isometric view of a headrest for surgery showing my new design, wherein a patient's head is shown in broken line in a supine position.

FIG. 2 is a left side isometric view of the headrest for surgery of FIG. 1, wherein a patient's head is shown in broken line in a prone position.

FIG. 3 is a top plan view of the headrest for surgery of FIG. 1.

FIG. 4 is a right side elevation view of the headrest for surgery of FIG. 1.

FIG. 5 is a left side elevation view of the headrest for surgery of FIG. 1.

FIG. 6 is a right end elevation view of the headrest for surgery of FIG. 1.

FIG. 7 is a left end elevation view of the headrest for surgery of FIG. 1.

FIG. 8 is a vertical section isometric view taken along the center of the headrest for surgery of FIG. 1.

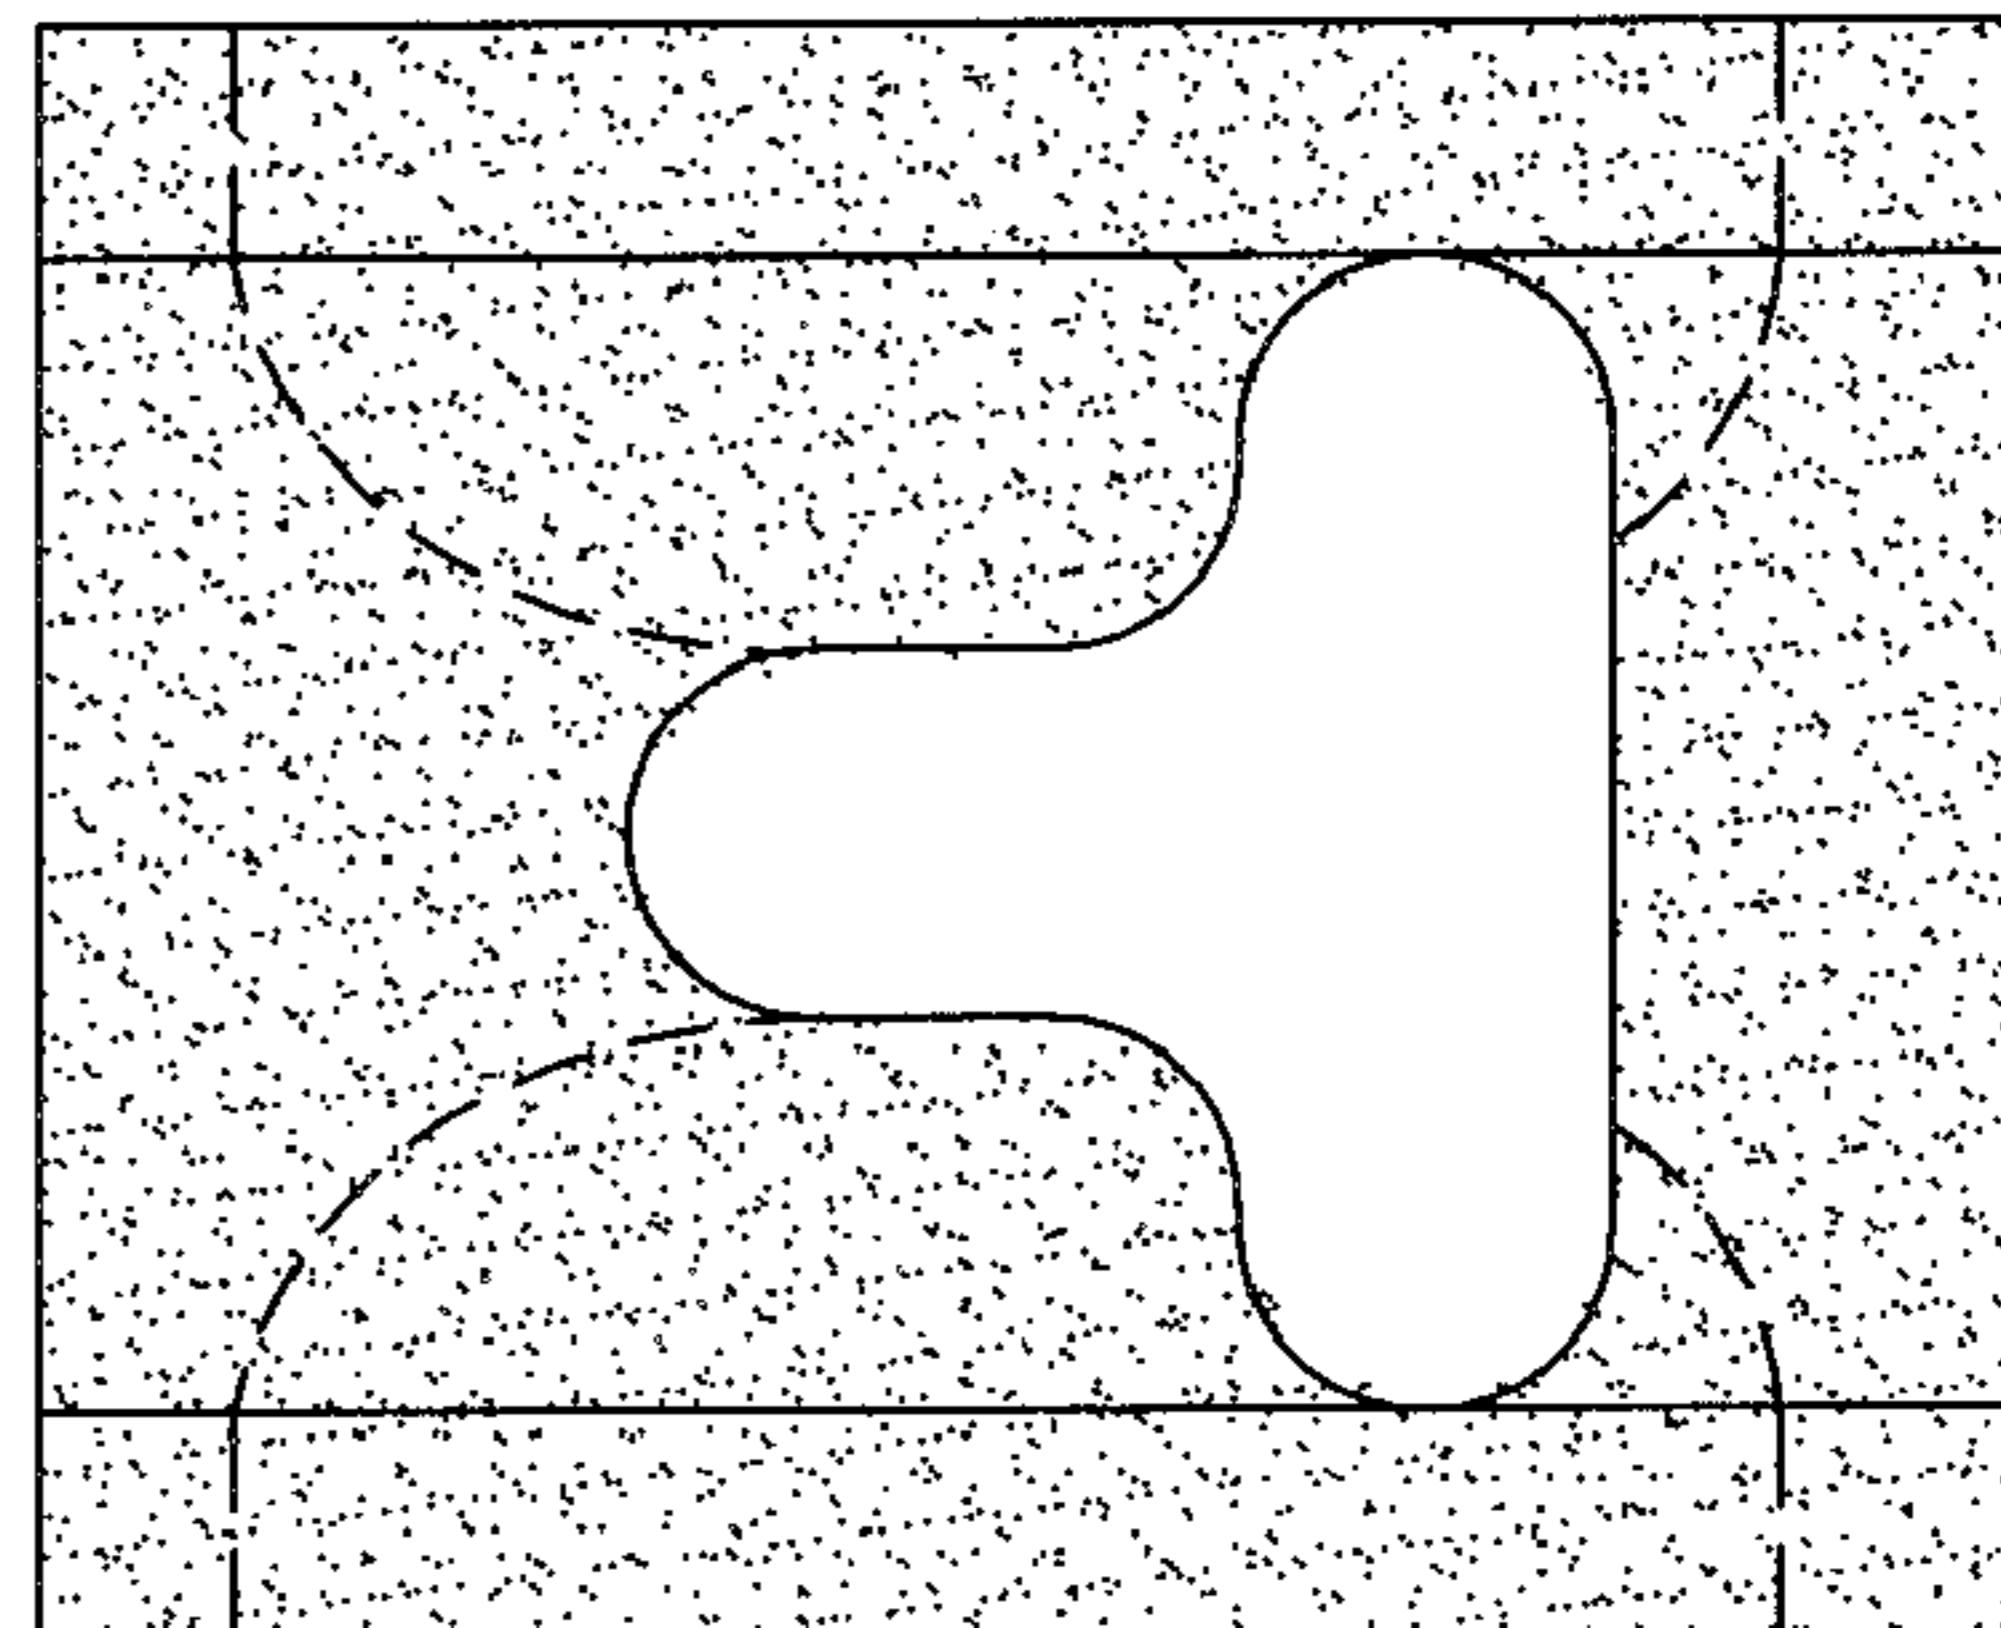

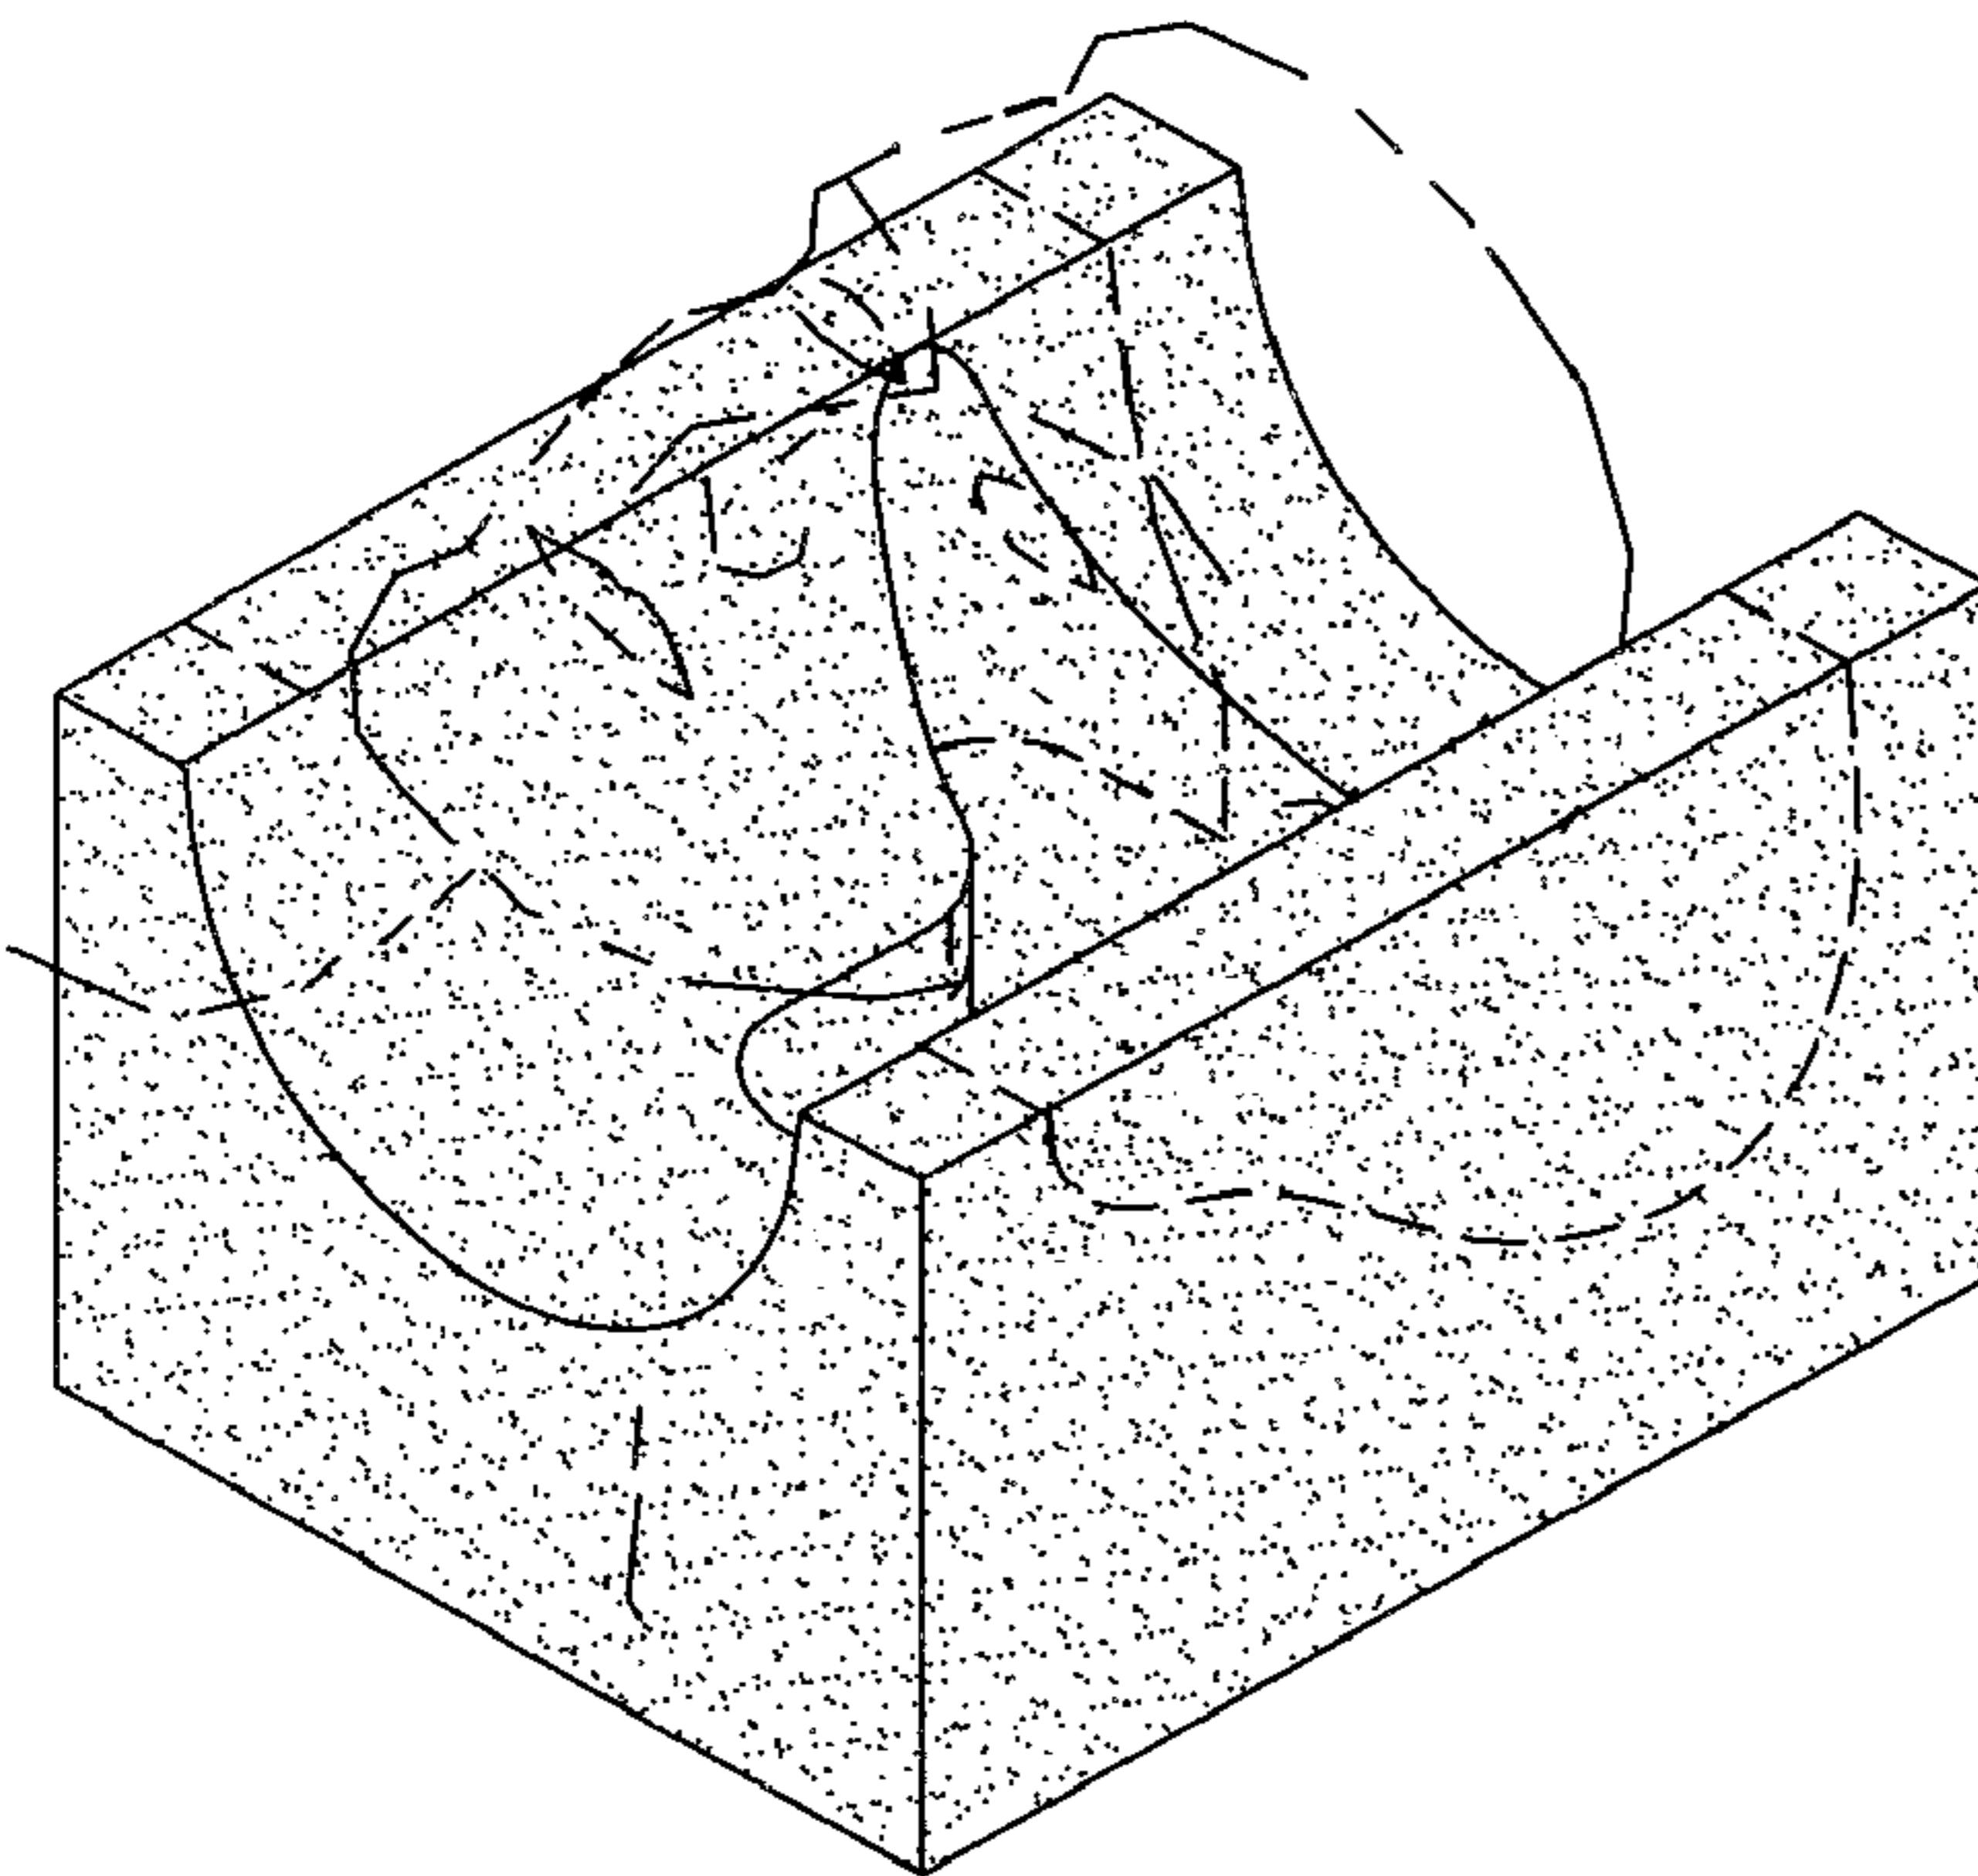

FIG. 9 is a right side isometric view of the headrest for surgery of FIG. 1 with the removable section removed; and,

FIG. 10 is a left side isometric view of the headrest for surgery of FIG. 1 with the removable section removed.

The bottom of the headrest for surgery is flat and devoid of surface ornamentation, and therefore not shown.

The broken line showing of a patient's head, seen in FIGS. 1, 2, 9 and 10 are for the purpose of illustrating environment only and form no part of the claimed design.

The broken line showing of the perforations along the removable sections are included for the purpose of illustrating a removable perforated section and form part of the claimed design.
