(57) **CLAIM**

The ornamental design for an animated image for a portion of a display screen, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a portion of a display screen with an animated image showing my new design, with the animate image having a first appearance state.

FIG. 2 is a front view thereof with the animated image having a second appearance state.

FIG. 3 is a front view thereof with the animated image having a third appearance state.

FIG. 4 is a front view thereof with the animated image having a fourth appearance state.

FIG. 5 is a front view thereof with the animated image having a fifth appearance state.

FIG. 6 is a front view thereof with the animated image having a sixth appearance state.

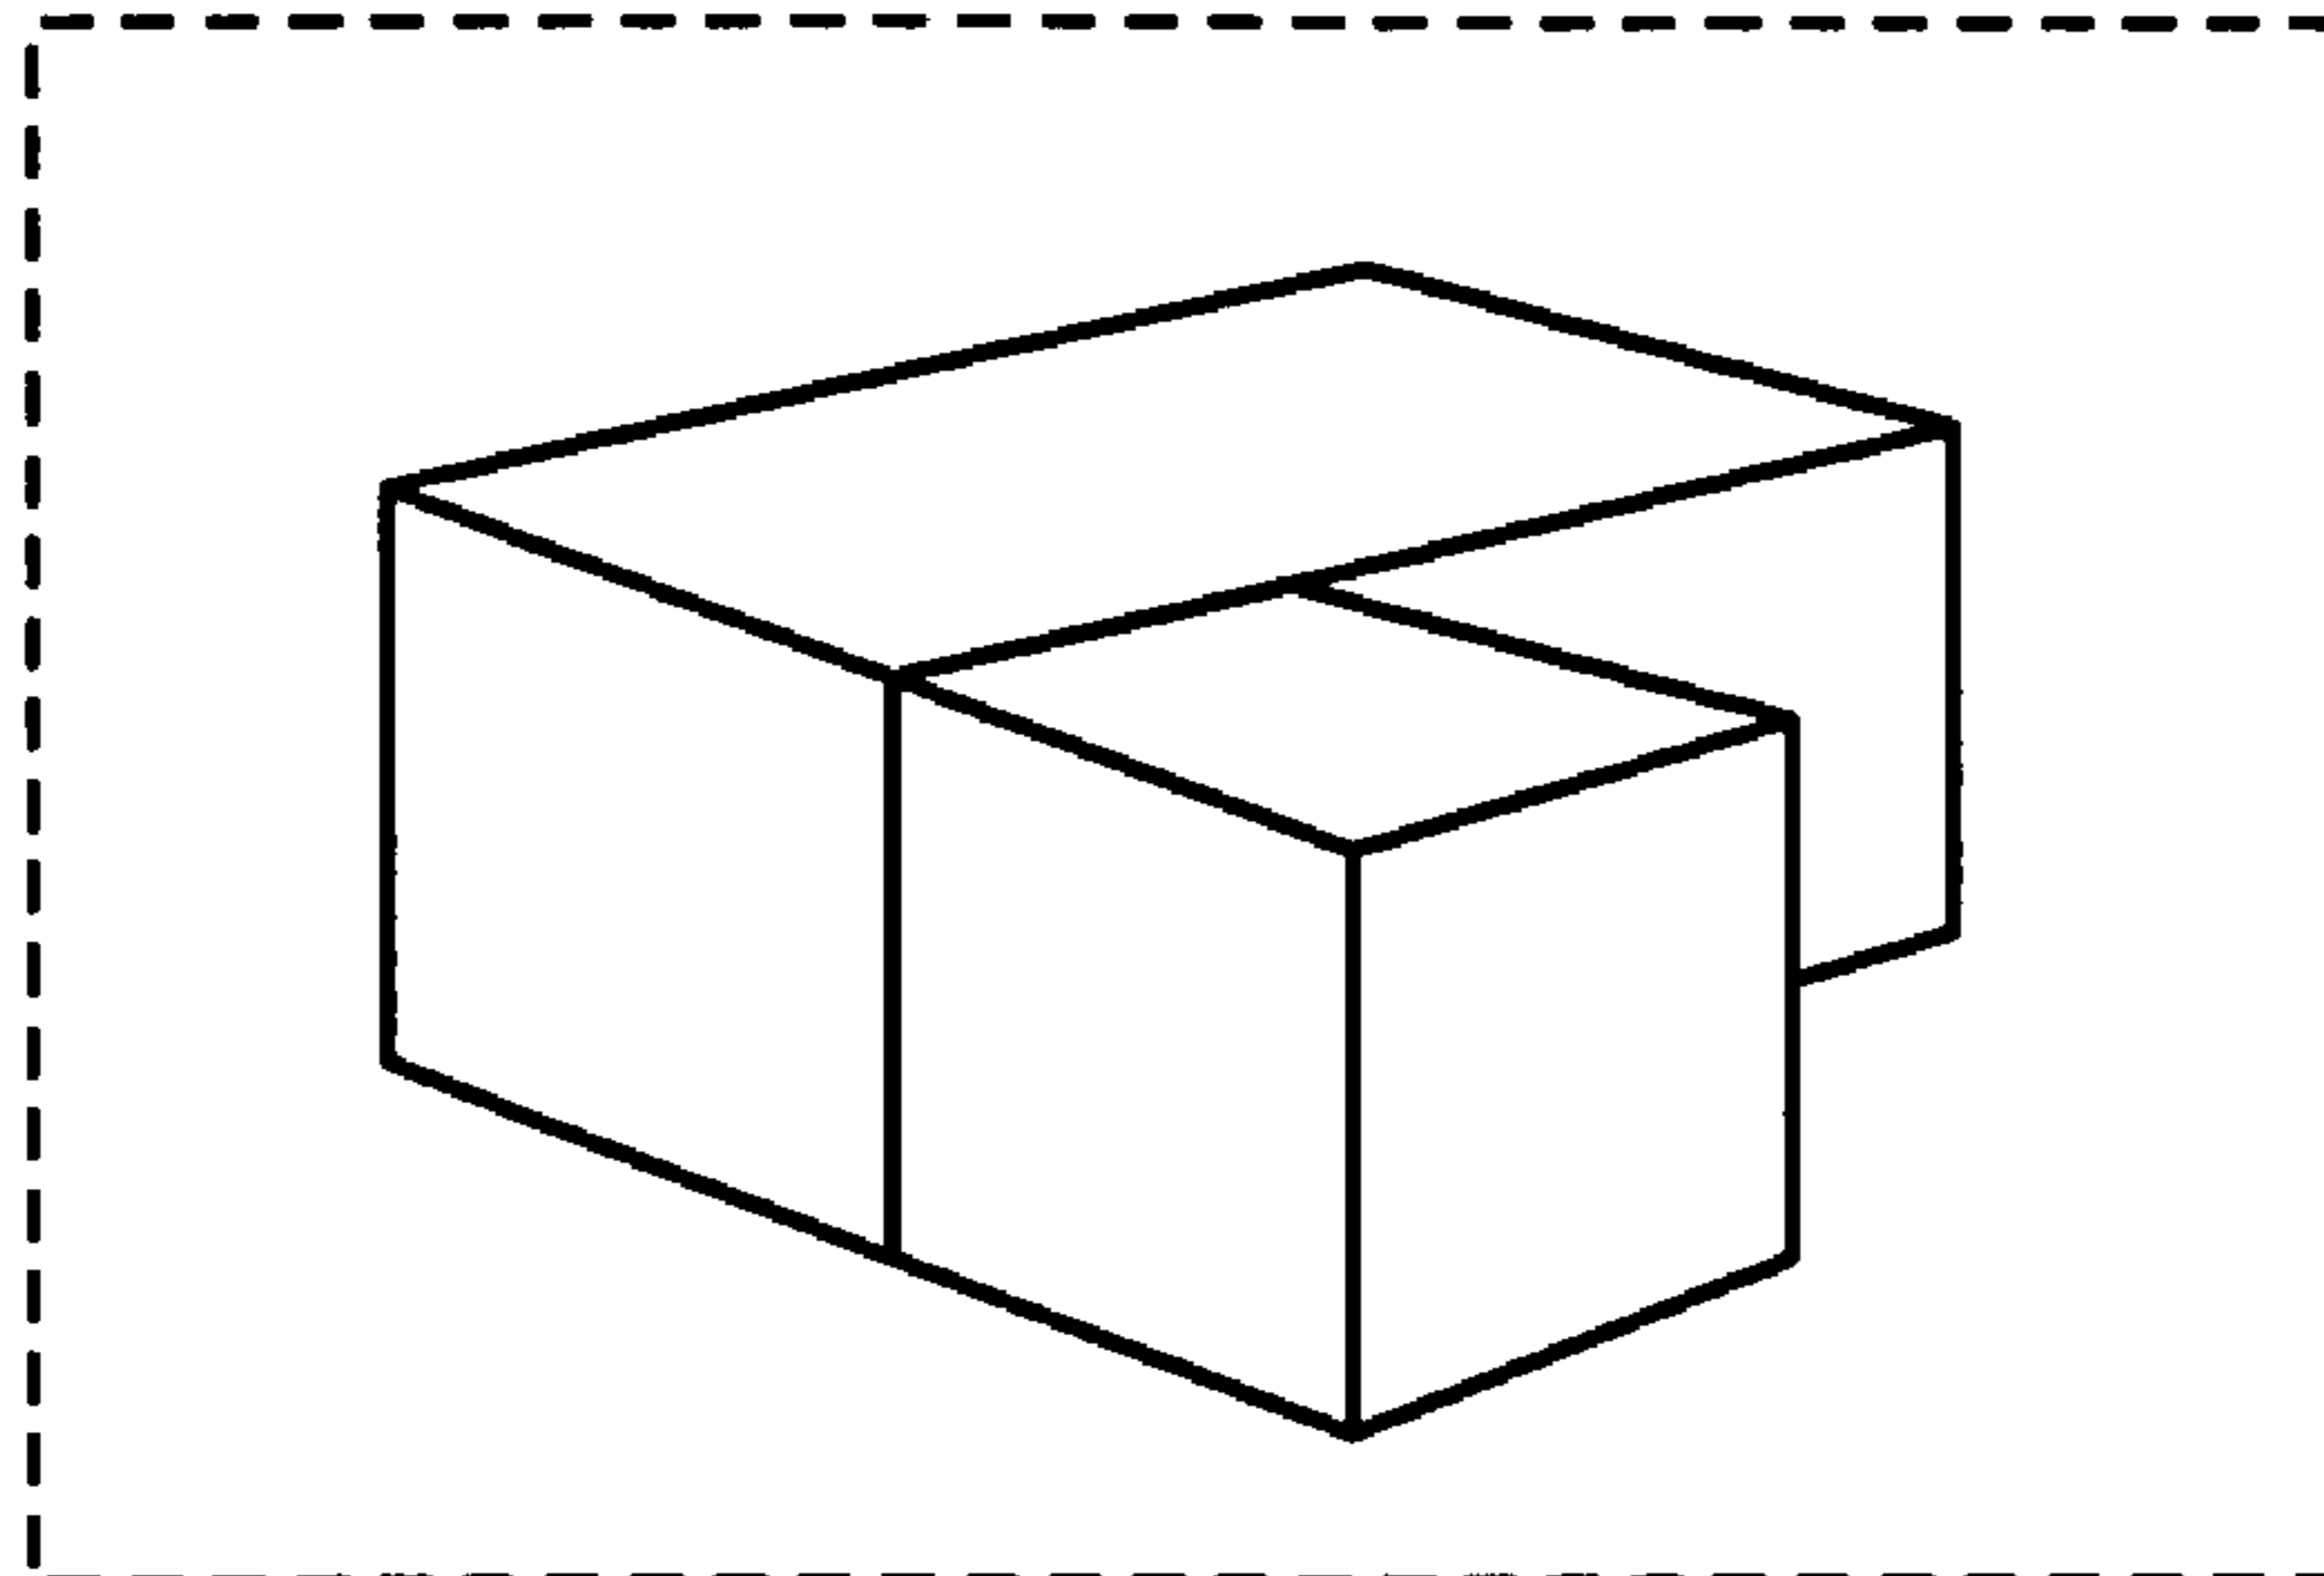

FIG. 7 is a front view thereof with the animated image having a seventh appearance state; and,

FIG. 8 is a front view thereof with the animated image having a eighth appearance state.

The appearance of the animated image is shown by the representative consecutive appearance states in FIGS. 1-8, and the animated image sequentially transitions between the appearance states shown in FIG. 1 and FIG. 8. The broken line drawing of the display screen and various graphical representations in all views is for illustrative purposes only and forms no part of the claimed design.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.
