DESCRIPTION

The application is directed to an automated food service system for remote recreational facilities. The invention shown herein is part of a system for providing safe, fresh uncooked meat products to a consumer.

FIG. 1 is a front perspective view of an automated food service system for remote recreational facilities showing our new design;

FIG. 2 is a front elevation view thereof;

FIG. 3 is a right side elevation view thereof; and,

FIG. 4 is a left side elevation view thereof.

The top, bottom and rear sides are not depicted. These sides are generally flat and unornamented.

In the drawings, the broken lines represent environmental structure forming no part of the claimed design.
